HOW THIS LEARNER WORKBOOK IS COMPILED

This learner workbook has been compiled to equip learners with the necessary skill, knowledge and attributes that will enable them to man an access control point. They will also be able to execute access control duties in a manner that will contribute towards the safety of an organisation or environment.

A person credited with this unit standard will be able to:

1. Explain access and egress control functions.
2. Control people, vehicles and materials at an access and egress control point.
3. Search people, goods and vehicles.
4. Escort authorized persons and vehicles.

You have to study the content and guidelines given in your learner reference guide to complete this workbook.

Remember that this completed workbook must be handed in as it will form part of your formative assessment and will play a role in awarding you the required 07 credits that are to be achieved upon completion of this module.

Write neatly and legibly and ensure that you do not simply copy the information contained in the learner reference guide into your workbook. Give your own opinion and ideas where applicable and write the answers in your own words to indicate your level of understanding and learning.

Good luck with the completion of this workbook.

LEARNING UNIT 1

Access and Egress Control

LEARNING OUTCOMES

A learning credited with this unit will be able to:

1. Define access control.
2. Explain the purpose for access control.
3. Explain the objectives of access control and egress control.
4. Explain the meaning of outer layer protection.
5. Identify and demonstrate knowledge and skills in the use of the various access control methods/aids.
6. Identify and demonstrate knowledge and skills in the use of the various access control identification system.
7. Explain the relation between access control measures and internal and external threats.
8. Explain the role of access control in the event of an emergency.

LEARNER ACTIVITY 1

Explain the purpose of having access control and egress control functions at a building.

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

LEARNER ACTIVITY 2**Explain the objectives of access control.**

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

LEARNER ACTIVITY 3**Explain the objectives of egress control.**

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

Demonstrate your understanding by providing three examples of each which can be found at your workplace.

[illegible]

Explain three identification system that can be used to offer effective access and egress control.

[illegible]

Discuss the role of access control officers during an emergency situation.

[illegible]

SELF-ASSESSMENT

The learner must make use of the following self-evaluation checklist to rate himself against the learning outcomes of this particular training module in establishing the level of mastery of the information.

1. Not able to comply
2. Reasonable compliance (Not acceptable for final evaluation)
3. Able to comply fully

LEARNING OUTCOMES		1	2	3
1	Define access control.			
2	Explain the purpose for access control.			
3	Explain the objectives of access control and egress control.			
4	Explain the meaning of outer layer protection.			
5	Identify and demonstrate knowledge and skills in the use of the various access control methods/aids.			
6	Identify and demonstrate knowledge and skills in the use of the various access control identification system.			
7	Explain the relation between access control measures and internal and external threats.			
8	Explain the role of access control in the event of an emergency.

LEARNING UNIT 2

Operating and maintaining access and egress sites.

LEARNING OUTCOMES

A learning credited with this unit will be able to:

1. Operate and maintain an access/egress control site in accordance with the relevant legal requirements and workplace procedures.
2. Conduct access/egress control of people vehicles and goods per workplace procedure.
3. Operate site-specific equipment in accordance with workplace procedures and manufacturer's specifications.
4. Deal with unauthorized/authorized people, vehicles and goods as per workplace procedure and relevant legal requirements.
5. Handle emergencies and irregularities according to workplace procedures and contingency plans.
6. Ensure appropriate interpersonal skills for effective customer relationships.

LEARNER ACTIVITY 1

As an access control security officer, it is expected of you to control all access and egress to the security area you are protecting. What are the five main aspects to be controlled during access and egress control?

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

LEARNER ACTIVITY 2

Work procedures for access and egress control must indicate the following:

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

LEARNER ACTIVITY 3

Your security manager approaches you to assist him in thinking of the current and additional measures that can be taken within your access control. There are five possible measures that can be taken. Name the five and give a short description of each.

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

Demonstrate your understanding of zoning by draw a picture of a typical floor plan of a building.

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins or other markings on the paper.

LEARNER ACTIVITY 5

Complete the attached registers. The assessor will provide you with handouts which consist of valuable information to be used

Requirements achieved	YES	NO
Comments in support of decision		

KEY CONTROL REGISTER							
ACTIVITY:							Page ____ of ____ pages
Key Code Number	Location	No. of Keys Issued	Date Issued	Issued By	Issued To:	Date Re-turned	Received By

Explain a typical access control site procedure that can be found at your workplace.

[illegible]

Entry and exit to premises are usually controlled by an access and egress control system. The functions of such a control system could include the following:

This image shows a blank sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

To control unauthorized and authorized people, vehicles and goods at an access control point, the following guidelines will make it difficult for unwanted persons to gain access to premises:

[illegible]

[illegible]Comments in support of decision

LEARNER ACTIVITY 9**Vehicle control is achieved by.....**

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

LEARNER ACTIVITY 10

Why is observation important for the success of a security officer doing duty at an access and egress control site.

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

LEARNER ACTIVITY 11

How should a security officer perform observation.

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

LEARNER ACTIVITY 12

Study picture below and answer the relevant questions

- ♦ Observe the picture for exactly 30 seconds. Look at everything you think might be important.
- ♦ After 30 seconds, answer the questions on the next page on a sheet of paper. (Do not read the questions before you look at the picture!)

- ◆ Are there cars parked on the sides of the road?
- ◆ What color is the pickup truck driving in the road?
- ◆ Any minivans around?
- ◆ What does the blue sign say?
- ◆ What's the speed limit?
- ◆ Are there any pedestrians on the road?

- ◆ Choose several people to be observers and choose two people to be investigators.
- ◆ Allow the observers to look at the picture for 30 seconds. The investigators should not look at the picture.
- ◆ After 30 seconds, the investigators should begin questioning the observers.
- ◆ Each Investigator should question each observer. Then, the Investigators should attempt to reconstruct the scene based on the "eyewitness testimony".

Investigators can use these questions to guide their inquiry, but may also think of their own questions.

- ♦ About how many cars can you see?
- ♦ Can you describe some of the cars in the lot?

Investigators can use these questions to guide their inquiry, but may also think of their own questions.

- ♦ About how many cars can you see?
- ♦ Can you describe some of the cars in the lot?

- ♦ How many cars were in the intersection?
- ♦ Across the street, are there any parked cars on the side?
- ♦ Can you describe at least one of the cars driving through the intersection?
- ♦ Are there any other potential witnesses?

If they answer yes, ask the following question:

- ♦ What was this witness doing?
- ♦ Where was he? They should have noticed a person mowing a lawn across the street.
- ♦ What was the speed limit? 35
- ♦ Was there anyone parked in the first parking spot? No

LEARNER ACTIVITY 13

CASE STUDY: Read the case study below and record the situation on the attached documentation.

♦ OB

Obtain all the necessary information from the case study below. The documentation needs to be complete and contain all the necessary and correct information as outlined in the case study.

The sound of thunder and bright flashes in the sky may have been a wonderful spectacle last night, but what I didn't realize was that it would cause one of the worst days of my life. I did not know about the power failure at three this morning because I was fast asleep. The first time I realized that my alarm did not go off, was at ¼ past five this morning – which meant that I was going to be late for work. I rushed while getting dressed and did not have time to iron my uniform because I had to run to get the last taxi. In my haste I forgot to put my pocket book in my pocket, and I could not find my shoes, so I wore takies instead.

I actually made it to work, only 7 minutes late. My co-worker that had just finished night shift was not very impressed with me because he still had to do the handover. He was going to miss his taxi and would have to wait at least ½ hour for the next one. Because I felt guilty about coming late, I told him to go – I would read the OB to get the details of the night shift....

It looked like things were eventually settling down to a normal, boring working day. Cars stop, "morning sir", "who are you visiting sir", "that would be at block C – second building on the left", "have a nice day sir". The same thing, over and over. Sometimes I feel like a tape recorder. Cars come, cars go.

In the mean time I'm still a bit unsettled from all the rushing around this morning and tired from lack of sleep because I had to settle the kids down who were crying because they're scared of the thunder and lightning.

Then the blue BMW stops at the gate about 09:20 . He hoots. So I wasn't quite as observant as I am supposed to be – I am tired, you know. I paste my smile on my face and walk up to the driver's window.

I get as far as saying: "Good morning, Sir."

"Good? – good???; so what's good about it?"

"Where is Mr. Brown? It's ten past nine. These \$%# taxis! They caused an accident that has made me late! Open this #%^ boom!"

You are escorting Mr Sithole from the control room to Mr Bembe the Financial Director of the company on 20 July 2006 at 14:00. You arrived at 14:30 at Mr Bembe's office. On the way Mr Sithole complains about walking all the way to Mr Bembe. Use the information in the case study to make an entry in your 'pocket book'.

Pocket book entry

2007/05/15 06:00	<u>Housebreaking and Theft Report</u> : On 2007/05/15 at 06:00 during a routine patrol I discovered a housebreaking and theft at the computer lab of Building BB. No suspects or witnesses could have been identified. I secured the crime scene and no one was allowed to enter the scene.
	I reported the matter to Mr Maseko my security manager, and the SAPS investigated the crime scene. SR Reference Number 13/08/2005 and OB Reference Number 123/05/2007. Signed: J Ramoba

LEARNER ACTIVITY 14

How should a security officer deal with a member of the public.

Requirements achieved	YES		NO

LEARNING UNIT 5

Escorting

LEARNING OUTCOMES

A learning credited with this unit will be able to:

1. Identify the threat before undertaking an escort.
2. Name the resource requirements during escorting.
3. List the different security tasks during escorting.
4. Explain the actions for planning and preparing for escorting.
5. List the criteria when planning a route map and explain the steps when planning a route map.
6. Explain contingency plans for valuables, persons or suspects.
7. Identify all valuables/persons or suspects to be escorted.
8. Determine classification / recent behaviour of valuables / persons or suspects and identify special needs when preparing for escort assignments.
9. Perform suspect search when required according to relevant legislation.

LEARNER ACTIVITY 1

You have to escort a suspect from the control room to a police station and you have to do a threat assessment. You will need certain knowledge with regard to the threat before you can do the threat assessment. What would that be?

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

LEARNER ACTIVITY 2

You have received an operational instruction to escort valuables from the control room of your company to the human resource department. The valuables will arrive at the control room on Tuesday, 12 July 2006 at 09:00. You have to escort the valuables from the control room to Mr Strydom. Before you can undertake the escort, you have to do a complete threat assessment. Discuss the steps that you will follow when doing a threat assessment. (Guidelines for progression of the threat assessment)

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

LEARNER ACTIVITY 3

You have received an operation instruction and you have to escort a truck with mine debris or waste. The threat has already been identified that suspects might “hijack” the truck. Evaluate the identified threat. You are also allowed to use site-related examples.

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

LEARNER ACTIVITY 4

There are three different types of escorting. Name the different types of escorting and give examples in your answer (you are allowed to give site related examples).

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

LEARNER ACTIVITY 5

Escorting can take place on foot or by vehicle. Explain when you would do an escort on foot and when you would do an escort with a vehicle.

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

LEARNER ACTIVITY 6

Complete the following table with regard to determining the special needs or requirements for escort. Fill in the missing information.

- ♦ Category 1:
- ♦ Suspects:
- ♦ Category 3:

How should the goods be handled, packed, transported and delivered?

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

SELF-ASSESSMENT

The learner must make use of the following self-evaluation checklist to rate himself against the learning outcomes of this particular training module in establishing the level of mastery of the information.

1. Not able to comply
2. Reasonable compliance (Not acceptable for final evaluation)
3. Able to comply fully

LEARNING OUTCOMES		1	2	3
1	Identify the threat before undertaking an escort.			
2	Name the resource requirements during escorting.			
3	List the different security tasks during escorting.			
4	Explain the actions for planning and preparing for escorting.			
5	List the criteria when planning a route map and explain the steps when planning a route map.			
6	Explain contingency plans for valuables, persons or suspects.			
7	Identify all valuables/persons or suspects to be escorted.			
8	Determine classification / recent behaviour of valuables / persons or suspects and identify special needs when preparing for escort assignments.
