

Facilitator Guide

TAKE NOTE

This Manual should be used in conjunction with the Learner Guide and the Learner Workbook

Unit Standard Title: COACH A TEAM MEMBER IN ORDER TO ENHANCE INDIVIDUAL PERFORMANCE IN WORK ENVIRONMENT

Unit Standard No: 113909

Unit Standard Credits: 5

NQF Level: 3

Time allocation

Training: The following breakdown can be used for the program.

Session: 1 = 30 min	Study unit	Day	Type
		Day___	
		Day___	
		Day___	
		Day___	
		Day___	
		Day___	
		Day___	
		Day___	
		Day___	
		Day___	
		Day___	
		Day___	
	Summative assessment	Day___	

Time allocation

Block program: The block program is only a guideline to indicate what will be facilitated . It is important to note that the block program can be changed depending on the pace of the learners and how many learners attended the learning program.

DAY	08:00 TO 08:30	08:40 TO 09:10	09:20 TO 10:00		10:30 TO 11:00	11:10 TO 11:40	11:50 TO 12:30		13:00 TO 13:30	13:40 TO 14:10	14:20 TO 15:00		15:15 TO 16:00

Learning event plan

4

Use the format in table beneath to structure the content for a learning event. This provides guidelines for drawing up a facilitation plan in preparation for a presentation. An example of a facilitation plan is indicated in the next table.

Introduction	
Topic	♦ Select a suitable topic. ♦ Introduce the topic verbally. ♦ Display the topic visually.
Interest stimulus	♦ The aim of the interest stimulus is to obtain the learners' interest in the topic under discussion. ♦
Outcomes	♦ The outcome(s) state what the learners should be able to do after the learning event. ♦ Display the outcomes visually. ♦
Scope	♦ The scope of the presentation consists of all the main headings which will be covered in the theory lesson. ♦ Display the scope visually. ♦ Present the scope in a logical sequence. ♦
Importance	♦ The importance of the theory lesson must be stressed so that the learners realize how they will benefit by attending it. ♦
Ground rules	♦ The aim of establishing ground rules is to allow the learners to produce their own set of rules. ♦ Allow the learners to commit themselves to the ground rules by doing an observable activity. ♦
Physical environment	♦ The physical environment must be effective for learning. It includes aspects such as seating arrangement and equipment. ♦

Contents (Body)

Scope point no 1

The first scope point of the presentation will now be discussed in detail. Cover the rest of the scope points one by one.

- Establish a positive relationship with the learners (e.g. professional behavior).
- Indicate throughout the presentation which scope point is being discussed.
- Use at **least two relevant learning aids** (e.g. video, posters).
- The learning aids must support the theory.
- Present the theory lesson on the level of the target group.
- Explain the theory component by making use of appropriate examples.
- Allow the learners to ask questions or to comment.
- Apply effective verbal communication skills (e.g. speak loud enough, vary tone of voice).
- Apply effective non verbal communication skills (e.g. avoid irritating gestures, keep eye contact).
- Apply effective micro-skills (e.g. active listening, paraphrasing, summarizing).
- Control breathing so that voice usage is not affected by shortness of breath.
- Obtain maximum learner participation by including activities and group discussions.
- Keep control over disruptive influences (e.g. learners are not allowed to make unsuitable remarks and comments).
- Allow time for learners to ask questions during the presentation.

Closure

Summary

Questions

Summary

- ♦ Ask questions that are relevant to the outcomes stated.
 - ♦ Use different types of questions (e.g. close-ended, open-ended).
 - ♦ Avoid the use of questions such as leading, subjective, double-barreled etc.
 - ♦ Direct the questions to all the learners, instead of individuals.
 - ♦ Reinforce the questions and answers of the learners.
 - ♦ Provide positive feedback in time.
 - ♦ Allow activities to be performed to enable learners to reflect on the content.
 - ♦ Apply the theory to the practical situation (e.g. giving an example).
-
- ♦ Assess the learners by asking well selected questions concerning all the important aspects.

Assess

(It is very important that these questions are formulated in your planning phase and written into your presentation plan. It is thus determined whether the learners have achieved the outcome(s) of the theory lesson.)

Interest stimulus

- ♦ If there is a forthcoming presentation an interest stimulus must also be given to stimulate the interest of the learners for the next theory lesson.

Unit standard 113909: Coach a team member in order to enhance individual performance in a work environment	99
--	----

1. Introduction

This learning program is part of a complete qualification. For more details concerning the complete qualification please contact your service provider or alternatively the office of the SASSETA

2. Purpose of this learning program

This Unit Standard focuses on coaching individuals in a business environment in order to improve the level of performance to meet a teams required service levels. The learner is required to demonstrate knowledge and skill in an authentic work situation.

The qualifying learner is capable of

- ♦ Explaining the concept of coaching in a business environment.
- ♦ Demonstrating skills and techniques required of a coach.
- ♦ Developing an action plan to coach two team members.
- ♦ Gathering evidence and monitoring progress.

2.1 Target group

This program is compiled for the following **target group**:

- Security members
- South African Defense Force members
- South African Police Force members
- Correctional Services
- Individuals who wishes to complete the NQF level 3 National Certificate in security practices.

3. Standards and qualifications

It is important that you as the learner understand and realize that this training program is not presented in isolation, but that it was developed based upon nationally recognized standards known as unit standards.

Unit standards are the “building blocks” of qualifications. All qualifications are plotted on the National Qualifications Framework (NQF).

REMEMBER.....

Unit standards comprises of outcomes. An outcome is a statement that describes the required competency that must be demonstrated by the learner on successful completion of a training intervention.

4. Assessments

In order to assess whether a learner can actually demonstrate the desired outcomes, assessment criteria are included in the unit standard. Each outcome has its own set of assessment criteria.

REMEMBER.....

The assessment criteria describe the evidence that is needed that will show that the learner has demonstrated the outcome correctly.

Kindly refer to the unit standard attached hereto for the assessment criteria.

It is of utmost importance that the learner fully understands the assessment criteria as listed in the unit standard, as it is the only way in which the learner will know what he will be assessed against.

The **final or summative assessment** is the most important aspect of this training program. It is during this process that the learner will be declared competent or not yet competent.

The learner will know exactly how he will be assessed, and when and where he will be assessed. All of these details must be obtained from the training provider where the learner enrolled for his program.

5. Range statements

REMEMBER.....

Also included in the unit standard are the range statements in support of the assessment criteria.

The range statements indicate detailed requirements of the assessment criteria.

6. The learning guide

The learner guide is included in this material under various learning units. The learner guide has been designed in such a manner that the learner is guided in a logical way through the learning material and requirements of the unit standard.

On completion of this skill program, the learner will be assessed against the assessment criteria as stipulated in the unit standard.

Each of the modules consists of learner outcomes to be achieved during training and development interventions, work related experience or at your own time. The learner outcomes will enable you to achieve the required level of confidence and competence in order to undergo the summative (final evaluations) assessment.

The learner needs to assess his own knowledge and skill throughout the training process by completing the learner workbook. With the completion of the workbook you start collecting evidence to proof your competence. The learner workbook will be assessed (FORMATIVE ASSESSMENT)

TAKE NOTE

The learner guide will remain the property of the learner once the LEARNING PROGRAM has been completed.

TAKE NOTE

- The best results will be obtained if you start with Study Unit 1 in the Learner Guide, and work your way through it, study unit by study unit.
- All learning outcomes are vital and must be studied (and exercised for all practical requirements) thoroughly to ensure that enough evidence for all specific outcomes is generated.

7. Learning assumed to be in place

It is assumed that a learner which registers for this program have completed a program in communication at NQF Level 3 or equivalent.

It is imperative to understand that this program are only one of the building blocks to complete Skills program 1 The complete list of unit standards for Skills program appears on the next page.

7.1 Security program matrix

SKILLS PROGRAM 1: SASSETA E			
244177	Conduct a security patrol in area of responsibility	Level 3	7 Credits
244184	Apply legal aspects in a security environment	Level 3	8 Credits
244176	Use security equipment	Level 2	2 Credits
244179	Handle complaints and problems	Level 3	6 Credits
244181	Perform hand over and take over responsibilities	Level 3	2 Credits
244182	Give evidence in court	Level 3	4 Credits
12484	Perform basic fire fighting	Level 2	4 Credits
116534	Carry out basic first aid treatment in the work-place	Level 3	2 Credits

Patrol Security officer/Grade E

SKILLS PROGRAM 2: SASSETA D			
244189	Conduct access and egress control	Level 4	7 Credits
242825	Conduct evacuations and emergency drills	Level 4	4 Credits
11505	Identify, handle and defuse security related conflict	Level 4	12 Credits
117705	Demonstrate knowledge of the Firearms Control Act 2000 (Act No. 60 of 2000)	Level 3	3 Credits
113924	Apply basic business ethics in a work environment	Level 2	2 Credits
119465	Write/present/sign texts for a range of communicative contexts	Level 3	5 Credits
114979	Operate a computer workstation in a business environment	Level 3	2 Credits

Access control officer/Grade D

SKILLS PROGRAM 3: SASSETA C			
113909	Coach a team member in order to enhance individual performance in work environment	Level 3	5 Credits
13912	Apply knowledge of self and team in order to develop a plan to enhance team performance	Level 3	5 Credits
244578	Describe how to manage reactions arising from a traumatic event	Level 3	2 Credits
113852	Apply occupational health, safety and environmental principles	Level 3	10 Credits
13936	Outline the legal environment of a selected industry	Level 3	2 Credits
119472	Accommodate audience and context needs in oral/signed communication	Level 3	5 Credits
11983	Compile and administer a case docket for investigation purposes	Level 5	6 Credits

Asset & reaction officer/Grade C

UNIT STANDARD 113909: Coach a team member in order to enhance individual performance in a work environment

8. Preparation of summative assessment

After you have worked through the **LEARNER GUIDE** and you are satisfied that all theoretical and practical requirements/ evidence, as stipulated by the UNIT STANDARD, can be met, you need to make your own necessary arrangements with the assessor and/ or facilitator. The training establishment will then arrange a suitable date for you to attend your pre-assessment meeting and then arrange for a suitable date to complete the final assessment.

8.1 RPL assessment

The assessment of RPL learners will be conducted in the same way as for those of new learners. The assessment pack is exactly the same and will therefore be used for new learners as well as RPL Learners. It must however be noted that learners who are applying for RPL must provide proof of previous learning and subject related experience prior to the assessment.

This proof or evidence can be in the format of certified copies (certificates) of previous learning programs that have been attended.

All the evidence will be assessed and authenticated before a learner will be allowed to enroll for an RPL program.

9. Roles and responsibilities

9.1 Facilitator/instructor

- Prepare to facilitate.
- Transfer of knowledge and skills

9.2 The role of the assessor

- Plan for the assessment
- Prepare the learner for the assessment

9.3 The role of the Learner

- Prepare for assessment.
- Accept the responsibility of learning.
- Accept the responsibility to produce/deliver evidence.

STUDY UNIT 1

Introduction to coaching

LEARNING OUTCOMES

On completion of this study unit the student will....

- ♦ Define coaching as a method of teaching within the workplace.
- ♦ Identify and apply the basic principles of training.
- ♦ Distinguish between knowledge, skills and attitude.
- ♦ Know the difference between training and coaching.
- ♦ Know and apply the correct questioning technique during coaching.
- ♦ Identify and explain the role of a coach.
- ♦ Portray and know the characteristic of an effective coach.
- ♦ Explain the benefits for the organization when effective coaching is used.

1. Introduction

How often are you approached by individuals who ask you for help and guidance on how to handle a new or difficult task or situation?

How do you respond?

- ♦ Are you flattered?
- ♦ Do you try to impress the person with your skills and experience?
- ♦ Do you offer an immediate solution to the situation?

With this response you will do nothing more than stroke your own ego and bruise the other persons ego.

REMEMBER.....

By giving them the answer or solution to their problem, you have lost the opportunity of helping and guiding them to find the solution on their own. This is when people become dependent on you and will never find solutions on their own, thereby learning and growing.

What should you rather do?

- ♦ Listen to them.
- ♦ Help them think through what they can do and how to go about it.
- ♦ Confirm that the actions they are planning to take make sense.
- ♦ I.e. Coach them!

2. Definitions

DEFINITION

Business coaching is the practice of providing support and advice to an individual or group in order to help them recognize ways in which they can improve the effectiveness of their business. It can be provided in a number of ways, including one-on-one tuition, group coaching sessions and large scale seminars. Business coaches are often called in when a business is perceived to be performing badly, however many businesses recognize the benefits of business coaching even when the organization is successful.

DEFINITION

Business coaching is not the same as mentoring.

Mentoring involves a developmental relationship between a more experienced "mentor" and a less experienced partner, and typically involves sharing of advice. A business coach can act as a mentor given that he or she has adequate expertise and experience. A good business coach need not have specific business expertise and experience in the same field as the person receiving the coaching, in order to provide good business coaching.

DEFINITION

Coaching involves working one-on-one with people on an on-going basis to upgrade their skills. There are three steps in coaching:

- ♦ Encouraging people to build on their strengths
- ♦ Equipping people to tackle areas for improvement
- ♦ Enabling people to achieve on-going success.

Coaches realize that people have different styles of learning and will use this understanding to communicate knowledge in the most user-friendly way.

DEFINITION

Training refers to working with people one-on-one, on-the-job; in small or large groups in order to help them acquire the knowledge, skills and attitudes necessary to do the work for which they are employed or prepare them for future activities.

Knowledge: This refers to the teaching of theory, i.e. facts, information, principles, concepts, etc.

Skills: This refers to a physical act or action. For example typing, playing a trumpet, panel-beating a car, reconciling to documentation, etc.

Attitudes: An attitude is a way of thinking and is usually based on a person's beliefs, values and feelings. They influence, to some extent, how people behave. It is not easy to change people's attitudes and it is ethically questionable whether one should.

In all kinds of business coaching there is a process of inquiry, analysis, contemplation & resolution with the intention of furthering the development of both the individuals and the business itself. It is aimed not just at improving the performance of the team and of the business, but also at giving individuals the tools they need to successfully progress in their own career.

Often the coach will ask a series of questions, inviting the clients to analyze the situation and propose a course of action which will help the group as a whole to reach their shared and individual goals within the organization. The client can accept the outcome, reject it, or negotiate a compromise.

A business coach will often take a multifaceted approach to helping a business improve. In some cases, a top-down approach is needed; such as when a CEO with control issues is hindering the success of the company. In other cases, a Business Coach will work from the bottom-up, working with each associate to better their own potential.

3. Basic Principles of Training

The basic principles of training include:

- ♦ Explanation
- ♦ Demonstration
- ♦ Reviewing learner explanation
- ♦ Learner demonstration
- ♦ Feedback

3.1 Explanation

This refers to the trainer's ability to teach the required content / concepts / skill / tools to the learner. It is important that the learner understands these explanations and therefore the trainer may utilize a number of methods to assist.

For example use of OHP, chalkboard, whiteboard, videos, demonstration, role-play, etc.

3.2 Demonstration

This refers to the trainer showing the learner how to perform a specific task or displaying a desired behaviour. Through demonstration the trainer role models how the task or behaviour should occur.

For example a trainer may demonstrate good listening skills by listening to learners queries and paraphrasing; show a learner how to bake a cake; fix a puncture, etc.

3.3 Reviewing learner explanation

An aspect of training is evaluation, as the learner needs to know whether they have been successful or not.

The trainer will review learner's knowledge / skill / attitudes through "testing", either in the form of paper and pencil tests or by requesting the learner to demonstrate the skill and observing the learner.

The trainer and learners are able to compare where the learner is in relation to the required standard and identify strengths and areas for improvement.

3.4 Learner demonstration

This is a practical, hands-on method of reviewing the learner's ability to perform particular tasks to meet the required standards.

It is also a way of encouraging learner participation during the training session and in this way re-enforcing the learning that is taking place.

Learner demonstration during training provides the learner with an opportunity to check out the accuracy of their responses and obtain immediate feedback and take corrective action should this be required.

3.5 Feedback

This is an important aspect of training. The trainer informs the learner where they are in relation to the required standard in terms of strengths and areas for improvement.

4. Differences between Training and Coaching

The differences between training and coaching include:

- ♦ The trainer fixes the training agenda, whereas in coaching, the individual sets the agenda.
- ♦ In training the change occurs outside the training environment, whereas with coaching the coach works with the learner to clarify values and enhance motivation.
- ♦ In training some trainees benefit from the training while others do not. In coaching, because the intervention is personalized and geared toward the individuals needs and aspirations, the individual benefits from it.
- ♦ In training it is often not voluntary, whereas in coaching it is voluntary.
- ♦ Training rarely involves feedback, whereas coaching involves ongoing feedback and continuous learning.
- ♦ Training tends to reinforce a traditional, hierarchical style of management, whereas coaching is considered a more democratic and collaborative process.
- ♦ Training tends not to bring about major shifts in thinking or action, whereas coaching is about sustained behavioural change.

5. Workplace counseling

Counseling is a preventative measure that will hopefully eliminate the need for corrective action or termination.

Employees should receive timely feedback and guidance from their supervisor.

- ♦ Employees should know their job description, role and performance expectations.
- ♦ Employees should be familiar with the Company's policies, procedures and standards.

5.1 Requirements when performing workplace counseling

- ♦ Supervisors should establish an environment where employees are comfortable discussing work related issues.
- ♦ Should an employee's job performance or behavior need improvement, a supervisor should start with informally coaching the associate and providing positive reinforcement and feedback.
- ♦ Should the performance fail to improve or meet minimum expectations, the supervisor may formally begin to counsel the employee.

TAKE NOTE

This is often done with a corrective action document explaining the situation, outlining a plan of action for the employee, and setting a deadline for improvement.

- ♦ A discussion between supervisor and employee to reach a mutual agreement on the situation is advised.
- ♦ Supervisors should maintain a personal "Note to file" folder that should be used to record notes of verbal counseling sessions. This is completed so that supervisors can reference back to the original date of the verbal warning if further counseling is required. These notes may become public at some point so please make ensure that they are objective, professional, and accurate.

5.2 Steps in the counseling process

- ♦ Explain the reason for meeting.

EXAMPLE:

"I wanted to take this time to speak with you about your lateness.

What is your understanding of our procedure and policy of becoming late for shift take over?

- ♦ State the standard or expected behavior.

EXAMPLE:

"When you were hired, we discussed the Company's policies and procedures and the standards of attendance. Each of us has a responsibility to report to work on time."

- ◆ State what improvement in behavior or performance is required.

EXAMPLE:

"My expectation is that you will be here on time to start your shift."

- ◆ Check for Understanding

EXAMPLE:

"Are you clear what the standards and expectations are?"

- ◆ Actively Listen: Make sure that there is a common understanding of performance expectations.
- ◆ Outline a plan and the follow up steps.

EXAMPLE:

"You are expected to be on time for each shift. Your failure to improve will result in disciplinary action. Let's pick a day to meet in 30 days from now for a follow up discussion and review of your progress."

- ◆ Follow Up

6. Questioning Techniques

IMPORTANT

Asking questions is a very important practice in training. By asking relevant questions at regular intervals during training you are able to establish and test the understanding of the learner and adjust the pace of training accordingly.

It is useful to use a range of questions during training so that you access different levels of learning. For example certain types of questions will provide you with learners theoretical understanding, whereas another type of question will allow you to assess their ability to apply the learning to other situations, etc.

6.1 Guidelines to effective questioning

The following are guidelines to effective questioning:

- ♦ Do not ask too many questions at once, as learners will feel overwhelmed and not know what to answer first.
- ♦ Do ask questions that serve a purpose.
- ♦ Ask open-ended questions.
- ♦ When asking questions keep the focus on the learner.

7. Types of questions

There are different types of questions, namely:

- ♦ **Open-ended questions:** These types of questions are used to encourage greater learner involvement, allow for follow up discussion, generate discussion and seek application of the concept or skill taught.
- ♦ **Close-ended questions:** These types of questions are used to probe for specifics, generate quick responses and do not encourage discussion.
- ♦ **Reflective questions:** These types of questions seek to clarify and ensure understanding on the part of the listener.

Open-ended questions that encourage involvement:

“What did you have in mind?”

Open-ended questions that encourage discussion:

“How does this compare with ...?”

Open-ended questions that allow for follow-up:

“Who can give me another example of that?”

Open-ended questions that seek application for concepts / skills taught:

“When would this apply?”

Closed-ended questions:

“What is your name?”; “Does training differ from coaching?”

Reflective questions:

“So what you are saying is that you do not know whether you should accept the promotion or not?”

8. Coaching Alternatives

Should the learner not be technically proficient enough to conduct coaching, the following alternatives are available:

- ♦ Other staff members who perform the same or similar function
- ♦ Supervisors or Head of Department
- ♦ Outside experts

9. What COACHING is and is not!

Coaching is

- ♦ A process of **establishing the right climate**: It is important to establish a climate that is relaxed, open and honest.
- ♦ **Committed and Supportive**: Both Manager and Subordinate must be committed to improving Subordinates skills and abilities and be supportive in allowing the subordinate to grow and develop.
- ♦ **Between the Manager and the Subordinate**: The immediate Superior is accountable for the development and training of his/her Subordinate.
- ♦ **Empowering** the Subordinate: The Superior should move towards empowering his/her Subordinate to grow, develop and become directly involved in producing results in the organization.

Coaching is not

- ♦ **A technique**: It is a way of relating which empowers an individual to grow, develop and achieve results.
- ♦ **An event that happens in isolation**: It has to form part of an overall strategy of integration in the organization.
- ♦ **Mentorship**: A mentor is someone who has the status, maturity and experience to become a source of inspiration and influence. He/she could either be a Superior, a Colleague or someone from outside the organization.
- ♦ **Playing the role of a father figure**: It does not involve patronizing the subordinate or bossing them around.

10. Role of a Coach

Minor (1995) identifies five roles that a coach may play. She uses the acronym SMART to discuss these roles. They are as follows:

Sponsor: In this role the coach provides an employee with important information, access to decision-makers and important information in the organization, as well as public recognition. This role is used when an employee has demonstrated outstanding skills and contributions and desires new challenges to grow.

Mentor: This is a life-long process of self-development. A mentor is someone who engages in on-going training in his/her respective field and understands networking. In this role they can assist an employee in prioritizing projects to be taken on and provide them with a set of “best practices” on how to approach problems. They could assist in breaking down barriers to performance.

Appraiser: In this role the coach would assist employees in assessing their strengths, developmental needs, blind spots, interests and career goals. By contracting with an employee a coach may observe performance and provide appropriate feedback and support.

Role-model: In order to perform this role the person must be seen as competent and credible. They will therefore demonstrate appropriate leadership styles on the job for employees.

Teacher: In this role the coach shares their knowledge and fosters an environment that makes learning enjoyable and effective. The coach would provide information concerning business strategy, vision, values, services and products, and customers to ensure the effective performance of employees. They also assist in providing employees with new job skills required.

11. Characteristics of coaching

- ♦ **Informal and Frequent:** It is less structured than a Performance Appraisal and occurs when the situation requires it.
- ♦ **Employee-specific:** It happens one-on-one between the Manager and employee and its purpose is to achieve goals which is specific to the employee.
- ♦ **Performance related:** It aims at improving the employee's performance and job satisfaction.

12. The effective coach

- ♦ Have you ever been coached at work, school, sport, etc?
- ♦ Think of a time, perhaps where someone has helped you work through a difficult problem. What qualities / traits or characteristics did this person/coach have?

13. Characteristic of the effective coach

- ♦ **Role Model:** Leads by example and effectively demonstrates the expected skills and behaviours.
- ♦ **Patient:** Takes the time to explain and ensure that individuals have a clear understanding of what must be done and how it should be done.
- ♦ **Supportive and Encouraging:** Supports and recognizes individual and team efforts. Encourages them to use their initiative.
- ♦ **Empathetic and a Good Listener:** Actively listens and shows understanding for other peoples' feelings.
- ♦ **Clarifies any uncertainties:** Asks appropriate questions to assist individuals to gain clarity of issues and possible strategies or action plans.
- ♦ **Proactive and Goal orientated:** Problems are solved jointly. Shows how actions and results relate to expectations.
- ♦ **Knowledgeable:** Understands methods and procedures required by the individual to perform effectively.

14. Benefits of coaching

- ♦ **Subordinates who feel empowered will perform better:** Subordinates who feel controlled or threatened will be less likely to perform optimally. Instead delegate, provide feedback and show trust.
- ♦ **Supportive climate:** A supportive climate or environment increases commitment to achieve common goals.
- ♦ **Learning and Development will happen on the job:** A supportive climate enhances learning and the desire to learn and grow.
- ♦ **The Manager is a key player:** You become the subordinate's role model who leads by example.
- ♦ **Ongoing Feedback:** Feedback will be constructive, specific and frequent.
- ♦ **Job Satisfaction:** Coaching helps employees perform their tasks better and gives them a sense of achievement.

14.1 Benefits for the coach

- ♦ Keeps individuals on track in a non-threatening way
- ♦ Individuals come to you with the solution rather than the problem
- ♦ The learner assumes most of the responsibility for tasks or actions
- ♦ Builds rapport and good interpersonal relationships
- ♦ Saves time long-term
- ♦ Improves quality of work

14.2 Benefits for the individual

- ♦ Ensures a positive and successful experience
- ♦ Enhances strengths, develops new skills and increases knowledge
- ♦ Develops skills required to perform at higher levels in the organization
- ♦ Creates opportunities to take on more challenging and difficult tasks
- ♦ Ongoing recognition and feedback

15. Criteria for successful coaching**The coach must be committed to the development of his/her subordinate**

- ♦ Show interest in and commitment to the development of the subordinate
- ♦ You must feel passionate about coaching

The coach must provide unconditional support

- ♦ No matter what the coach must be there for the individual, good times and the bad

The coach must have the ability to handle the coaching process and demonstrate the skills of coaching

- ♦ Make a conscious effort to use all the skills and techniques discussed in the course
- ♦ Be committed to the success of Coaching and Learning in the organization

Coaching must produce results

- ♦ Achieve results that are both measurable/tangible (e.g. increase in productivity/sales, etc.) or less observable (e.g. increase in subordinates self-confidence, etc.)
- ♦ Coaching must be a satisfying and rewarding experience for both the coach and subordinate

REMEMBER A COACH IS

C = CARING, CONSIDERATE

O = OPTIMISTIC, POSITIVE

A = APPROACHABLE

C = COMMITTED, COMPETENT

H = HELPFUL/SUPPORTIVE

[illegible]

STUDY UNIT 2

Communication

LEARNING OUTCOMES

On completion of this study unit the student will....

- Explain the objectives of communication.
- Understand and apply the complete communication process.
- Demonstrate knowledge of good listening habits.
- Apply good listening skills.

INTRODUCTION

Communication consists of the exchange of information. If communication skills are inadequate, or are not fully utilized, information and ideas could be incorrectly transferred and received. The supervisor should therefore be able to communicate efficiently in order to avoid conflict and unrest. Mutual communication between the supervisor and the subordinate reveals each person's different needs, feelings and approach to effect cooperation and achieve the set objectives.

Communication may therefore be described as a two-way process between people where one person, the sender, transmits meaningful information, ideas, thoughts, or messages to another person, the receiver, in such a manner that both the sender and the receiver come to understand the same thing.

1. Objectives of communication

The following are some objectives of communication:

- Creating a climate of trust, openness and support
- Building bridges and finding solutions for problems
- Passing on information
- Persuading
- Reminding
- Creating a healthy atmosphere
- Being understood
- Changing people's attitudes
- Sharing responsibilities and rewards
- Promoting motivation, study and growth

2. The communication process

The communication process (see figure 6) consists of:

- a sender
- sending a message
- by means of a medium
- to a receiver
- who internalizes the message (makes it his/her own) and replies by giving feedback or reacting to the message.

Lasswell (quoted by Smit & Cronjé: 1992) simplified this process by asking the following five questions:

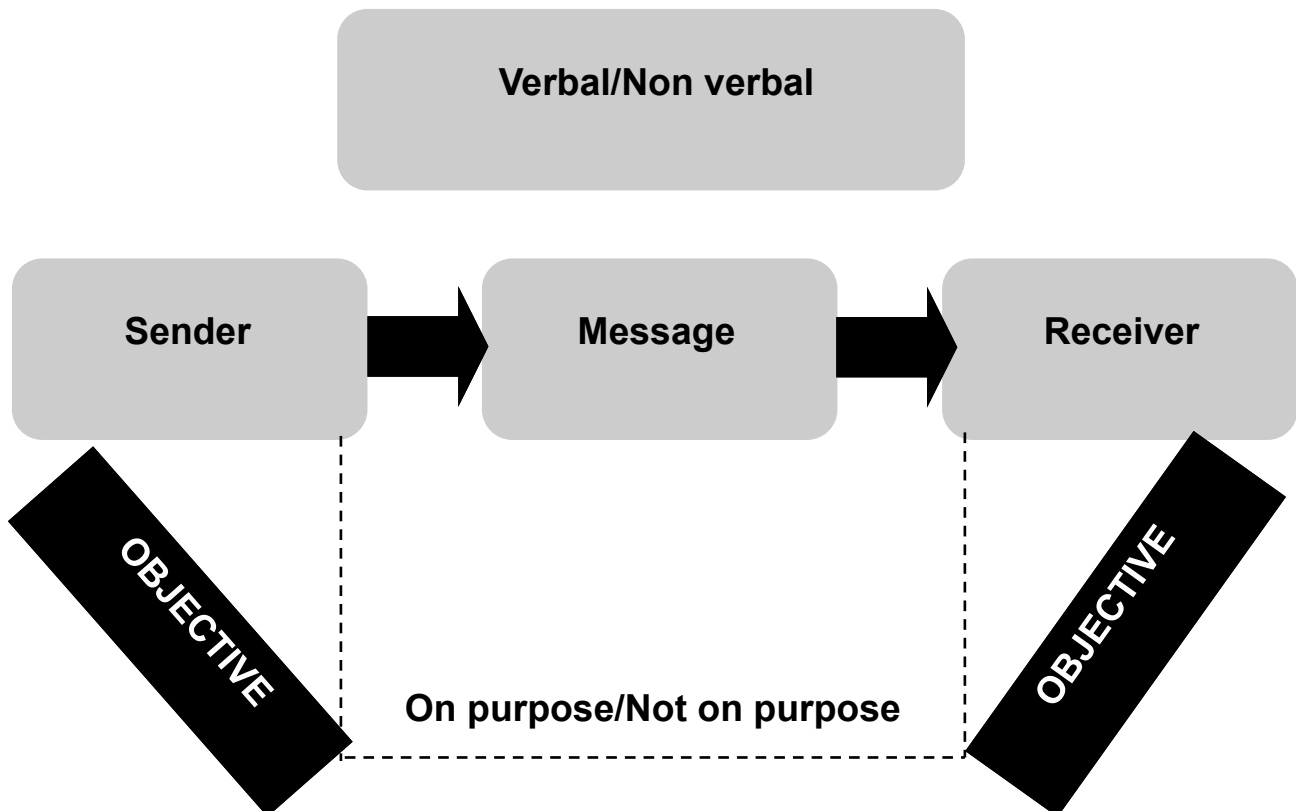

The sender (Who?). The sender sends a message to someone else.

The message (What does it say?). The message may be verbal or nonverbal. The contents of this message could communicate many things: it could contain feelings, information, figures, approaches, facts, persuasions, or ideas.

The medium (How?). The medium transmits the message from the sender to the receiver. This medium could for example be a telephone, a letter, verbal communication, the radio, TV, or a newspaper.

The receiver (To whom?). The receiver of the message is the person, group or institution to whom the message is addressed.

Feedback/reaction (What are the consequences?). Feedback is the information the sender receives back after communication. This reveals to the sender whether the message that was sent was received by the receiver in the way it was intended.

3 Characteristics of communication

- Communication makes contact.
- Symbols are used to communicate. Words, sounds, signs, gestures, traffic signs, dance movements, a nod, a smile, a frown, are all symbols to transmit specific thoughts or ideas.
- Communication takes place via a medium. You have to use a medium to make contact with other people, for example a telephone, letters, and so on.
- Messages are exchanged by communication. We send and receive messages. It is a reciprocal process.

- Communication is usually intentional to meet certain needs, and it has an objective.
- Communication is intended to have an effect. When we communicate, we are influenced by other people or they are influenced by us.
- Communication is significant. The messages we exchange express our feelings, ideas and opinions which we would like other people to understand.
- Communication is reciprocal.

4. Guidelines for effective communication

The sender must:

- be sure what he/she wants to transmit
- arrange the material to be communicated in a logical sequence
- make use of his/her experience when he/she wants to communicate
- try to communicate when the receiver/s would be receptive for such communication
- stimulate the receiver/s interest
- try to communicate in the receiver's mother tongue
- keep in mind that emotion is often more important than fact
- remember that too little is just as bad as too much

5. Steps to ensure effective communication

- Think about the message that has to be transmitted and make sure that it is clear and unambiguous.
- Determine whether the message has to be communicated verbally or in writing.
- Choose the medium that would best suit the circumstances, for example a letter, memorandum, report, personal interview or a telephone call.
- Establish whether the receiver has understood the idea, thought, information or message correctly.
- Keep in mind that the receiver could interpret the communicated message in his/her own way if it has not been transmitted absolutely clearly and unambiguously.
- Insist on feedback to ensure that there has been no misunderstanding.

6. Methods of communication

Two different types of communication are normally used, namely verbal and nonverbal communication.

6.1 Auditory communication**Verbal**

In verbal communication we receive symbols (letters, signs, sounds, words) in spoken or written form.

The following are suggested to help us improve our verbal communication skills in a training situation:

- Make sure that the receiver can hear you. If people cannot hear properly, they become distracted or frustrated and no longer pay attention.
- Vary the speed and tone of your words. This provides words with emotion and meaning.
- Adjust the tempo of your speech. Speaking too fast could lead to misunderstanding, and speaking too slowly could become boring.
- Make use of pauses to enhance clarity and emphasis. Your audience has an opportunity to interpret and process your message during the pause.
- Smile - it is an excellent way of reducing discomfort or stress.
- Relax and take your time. Don't be in a hurry.
- Maintain eye contact with the receiver.
- Wear suitable clothes. It denotes self-confidence, projects a professional image and shows respect.
- Use simple, explicit (clear), easily understood words.
- Use natural gestures to emphasize important points.

6.2 Visual communication

Nonverbal

We communicate with more than words. Nonverbal behavior often communicates our feelings. Such behavior includes gestures, body movements, facial expressions, and eye contact (fluttering, direction, duration of contact, wink, etc).

Gestures

Natural gestures are important because we use them to emphasize the points we make. Gestures will not distract attention from the message, but if you use your hands as follows, the message will be affected:

- Keeping your hands in your pockets
- Holding your hands behind your back
- Keeping your hands folded
- Nervously wringing your hands

Facial expressions and body movements

People rarely stand still while they are speaking. You move your face and body, and these movements reveal a lot about your feelings, emotions, reactions, and so on. These movements are sometimes conscious and deliberate, for example when you smile for your friend, or frown to show that you are not satisfied, or lift an eyebrow to express astonishment.

Some movements have become so habitual that they are unconscious. You may try to hide your feelings, but unconsciously betray yourself, for example the way in which you move towards or away from a person, how you sit in your chair (relaxed, tense, on the edge, bent over), when you lean forward when you feel involved and are interested but lean backwards when you are not.

Body language

Body language is an important part of nonverbal communication. Some of these gestures are listed below and you should be aware of them when you communicate with other people. These are generalizations and mostly apply to First World cultures.

Turning and wriggling in the chair. This could mean that the person finds the discussion unpleasant.

Rubbing your nose. This could mean that a person is nervous or does not agree.

Sitting with crossed arms. This could mean that the individual is adamant, apparently unyielding. His/her brain might be as tightly closed off as his/her crossed arms.

- **Sitting on the edge of the chair.** This could be confusing, because the exact meaning could be uncertain. It could either mean that the person is beginning to accept you and your ideas and is ready to cooperate, or that he/she is disapproving and wants to end the meeting.
- **Leaning back with the hands behind the head.** This shows arrogance, aggression, a tendency to dominate.
- **Exaggerated winking, coughing and/or throat clearing.** This could denote nervousness or fear of being pushed into a corner. It could also mean that the person feels guilty for some reason.
- **Steepling of fingers.** The fingertips of both hands are brought together to form a steeple. This generally denotes self-confidence, or certainty that what is being said is true.

7. Obstacles to communication

Obstacles are interruptions in the communication process that prevent the message from being clearly understood.

- Perception differences
- Language differences
- Noise
- Emotions
- Fear
- Age
- Too many messages
- Culture differences, and so on.

8 Listening habits

Without listening there is no communication, and communication is central to the communication process.

Most of us accept that listening is a natural human ability. It is true that one is born with the ability to hear, but this does not mean that one automatically has effective listening skills. Such skills have to be developed.

8.1 Learning how to listen

Selective listening - listening for facts

What is he trying to say? Will she ever get to the point? Have I missed something, or has he forgotten what he wanted to say?

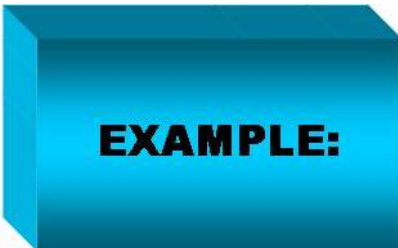

Have you ever asked yourself these questions? If you have, you were suffering from selective listening problems.

There are four phases of effective listening: perception, interpretation, evaluation and reaction. The brain can handle speech four times faster than average speech (some 200 words per minute). With all this extra time for thinking, the ineffective listeners attention tends to wander. His or her brain is busy with what happened yesterday, or is planning for the next day, or whatever.

Active listening: listening for habits

The technique of reacting to people's feelings is known as Active listening.

Not all communication is evident or clearly understandable.

EXAMPLE:

For example: The sentence ***What is the time?*** could be an attempt to find out what time of day it is, or the speaker could be hungry and wondering how long he or she will have to wait before it is lunch time. In other words, ***What is the time?*** could actually mean ***When are we going to have lunch?***

TAKE NOTE

You need active listening skills to interpret this message.

Use facial expressions and body movements to demonstrate to the speaker how well you understand his/her message. Sit on the edge of your chair and eliminate confusion between you and the speaker. Nod when you agree, lift your eyebrows when you are confused, smile when you are satisfied, show concern and interest by the way you hold your body. This would also help him or her to become a better speaker.

Eye-listening: listen with your body

The third part of listening is not directly related to listening: it is observation. Observe what people in the company of others do with their bodies, for example how they stand, move, behave, gesticulate and make eye contact, because it is all part of nonverbal communication.

9. Listening skills**9.1 Listening with your whole body**

One has to decide consciously to listen. For example, when a listener obviously listens, he/she informs the speaker that he/she wants to listen. The decision to listen gives a clear instruction to the brain to limit interruptions by external noise to the minimum and to focus on the concerns of the person who is speaking. The decision to listen will also stimulate the brain to use the extra thinking time to try to understand the other person's point of view.

9.2 Give verbal signs to the speaker

The speaker is on the look-out for verbal signs from the listener to help him or her communicate. Signs such as huh-huh? I'll see, and others will be signs to talk less rapidly, to talk faster, to stop talking, or to head in a new direction.

On the surface, listening requires simple reactions that open the door to further communication. Some of these door-openers are: Really?, Tell me more ..., and Lets discuss it.

9.3 Repeat the message

The TV networks use immediate repetition to make sure that their viewers realize what has happened. The same technique may be used to improve communication.

If you are not sure that you have understood the message the way the speaker meant it, stop him or her and say: This is how I interpret your message - am I right?, or say: In other words ... Repeat the message in your own words as you heard it and ask the

9.4 Listen to the message

Not all listening is of the same type or at the same level. Nor does it have to be. We do not listen to a TV advertisement with the same close attention as to the person who says I love you.

Facial expressions, gestures, tone of voice, eye contact and touch all help to transmit information. However, the unspoken (hidden) message that often contradicts the spoken message might elude you. A good listener listens to ideas as well as feelings.

9.5 Summarize while you are listening

Compile summaries while you are listening, as you would do during a lecture. Use key words to remind you of the main points. Don't try to remember every word. The more elaborate your notes become, the more difficult it becomes to listen. Prepare outlines and review them later.

9.6 Listen to yourself

William Shakespeare wrote: Go to your bosom, knock there and ask your heart what it do know. You listen to your children, your husband or wife, a speech, TV and radio programs, to friends and a thousand other voices, but you fail to listen to your own inner voice.

Take the trouble to look into your own thoughts, study your own feelings and take notice of your own opinions on specific issues. When you listen carefully to yourself, you begin to realize how other people see you. Use an audio tape to record your own voice and play the tape - it could be a very insightful learning experience.

9.7 Know when to keep quiet

Silence communicates, but the messages vary. There is the silence of isolation, the silence of anger, the silence of helplessness, and the very important silence of support.

10. Positive listening habits

The ten key points below could serve as a guide to improving your listening skill:

10.1 Ascertain areas of interest

- The poor listener switches off when the topic is not interesting.
- The good listener looks for opportunities and asks: How do I benefit from this?

10.2 Evaluate content, not presentation

- The poor listener switches off when the presentation is inadequate.
- The good listener evaluates the content and ignores presentation mistakes.

10.3 Rather keep quiet

- The poor listener is inclined to interrupt or to become involved in arguments.
- The good listener does not start to evaluate before he/she understands the entire message.

10.4 Listen for ideas

- The poor listener listens for facts.
- The good listener listens for central themes.

10.5 Be flexible

- The poor listener makes comprehensive notes and uses one system only.
- The good listener makes very few notes and uses different systems, depending on the speaker.

10.6 Listening is work

- The poor listener does not try hard; he/she only pretends to listen attentively.
- The good listener works hard and demonstrates active involvement of body and brain.

10.7 Distractions

- The poor listeners attention is easily distracted.
- The good listener ignores or avoids distraction, suffers bad habits, and knows how to concentrate.

10.8 Exercise your brain

- The poor listener does not like difficult visual material, and prefers lighter and less complicated material.
- The good listener listens continuously, despite more complicated material.

10.9 Prejudice

- The poor listener reacts emotionally to words.
- The good listener interprets words rationally; words do not bother him/her.

10.10 Concentration

- The poor listener is inclined to allow his/her thoughts to wander when the speaker is slow.
- The good listener challenges, anticipates, summarizes intelligently, assesses the signs, listens between the lines to tone of voice, and is familiar with the principles of nonverbal communication.

[illegible]

STUDY UNIT 3

The coaching process

LEARNING OUTCOMES

On completion of this study unit the student will....

- ♦ Identify the need for coaching
- ♦ Follow and apply the coaching process within a workplace scenario.
- ♦ Set up development review documentation to plan for the coaching session.
- ♦ Develop a coaching plan.

REMEMBER.....

Remember that coaching is ongoing and part of your role as a manager. You will need to be aware and on the look out for coaching opportunities, as employees might not ask you for help or guidance.

1. Need for coaching

There are three reasons why coaching may be required, namely:

- ♦ **To improve sub-standard performance:** The coach will be directive to set standards and review expectations if a learner does not know what to do or how to perform a particular task / function.
- ♦ **To maintain standard performance:** The coach will use a variety of reinforcement and reward strategies to ensure the ongoing interest and satisfaction of the learner, whilst meeting the demands and standards of the job.
- ♦ **Developmental coaching to exceed standard performance and develop new skills:** The coach assesses the development needs of the learner and provides customized opportunities for those already meeting the required standards. This is to ensure that learners are motivated to take on new tasks and responsibilities.

2. Informal and formal coaching

Coaching can happen informally or formally. Let us look at this in the working context.

Informal Coaching: Redressing the wrong

This happens when the subordinate

- ♦ doesn't have the know-how and you are required to TEACH them the new skills or knowledge
- ♦ makes a mistake and you CONFRONT them about it
- ♦ needs help or guidance and you need to GIVE ADVICE/GUIDANCE

Formal Coaching: Improving Performance

This happens when you need to evaluate your subordinate's performance and improve it. It is more formal because you make an appointment and keep a record for the discussion.

- ♦ Here you are required to REVIEW performance and provide FEEDBACK

3. Coaching opportunities

Proactive Coaching

- ♦ Occurs before the individual attempts a task.
- ♦ Shows that you care and want the person to succeed.
- ♦ It helps eliminate anxiety and steer the person in the right direction.
- ♦ It helps build the individuals confidence in dealing with a similar task in the future.

Reactive Coaching

- ♦ Occurs after the individual attempts a task which has not gone as well as expected.
- ♦ Occurs when you would like the subordinate to improve their performance.
- ♦ Normally initiated by the Manager, who ensures that employee performance is at acceptable levels.

4. Providing remedial support

Coaches spend the bulk of their time influencing learners, peers and other stakeholders.

Influencing others

Influence is the process whereby one person seeks to modify the attitudes or behaviour of someone else, while power is that which enables them to do so.

**(Based on Charles Handy (1993), Understanding
(Organizations)**

The changing nature of many organizational environments has increased the importance of effective influencing skills at work. With less emphasis on traditional structures where the line management relationship is the route for directing and controlling work, and greater emphasis on team working across functional boundaries, the issues of power and influence at work are increasingly important.

Management is a complex art with no 'right' answers, so it's all the more crucial for people to engage in the process of influencing as an integral aspect of their relationships with others in the workplace. This section focuses on the process of influencing and how power is used in organizations, to help you understand the context in which you can develop your influencing skills to operate effectively in today's working environment.

**The importance of influencing**

Although most communications have an element of mutual influence in the exchange, if we define 'influencing' as the process of achieving something through someone else, it begs the question 'who are we trying to influence, and why?'

The answer to the question 'who?' could include just about anyone, for example your team, colleagues, customers, suppliers, and more senior managers.

As for 'why?' the reasons are again likely to be as varied as the circumstances in which we find ourselves.

We may wish to influence other managers on resource issues; we may want to enlist the support of colleagues for a proposal; we may need to persuade customers of the benefits of products and services; we want suppliers to meet deadlines.

Circumstances where influencing skills are important include:

Managing others – you will achieve more by influencing other people than by simply ordering them to do things. When you have no direct line authority – you need the support and co-operation of other parts of the organization, and indeed of some external elements, to be an effective manager. Changing structures within organizations mean more project work and more and more informal networks – in both cases, you will only be able to perform by using influence.

Building relationships is one of the key purposes of any communication process, and this is particularly important when you are looking to influence others.

Influencing, which is an essential process at work, involves being open about our objectives, aims, values and assumptions (i.e. no hidden agenda). It has integrity at its core and productive purpose as its objective – it can help to build good relationships.

Manipulation, on the other hand, is about 'playing games' with others who remain unaware of the true agenda or aims – it can be deliberately misleading and deceptive, destroying trust and good relationships. It may well be a commonly used technique, but it's disempowering for everyone.

5. Sources of power

Since influence derives from power (of one sort or another), you need to be aware of the main sources, to help you use your own power appropriately and work with others effectively. “Power” has connotations of corruption and manipulation, but is simply the ability to influence others – unavoidable in constructive working relationships.

Everyone has the ability to influence and use power – the way in which you use the power you have is always a personal choice. We can identify the following six main sources of power, based on:

- ♦ Social and political skills. Interpersonal skills – such as active listening, negotiating, persuading are very important. This is a source of personal power we all have access to.
- ♦ Position. This is based on the power attached to certain positions in the organization, linked to aspects such as line authority, budgetary and other resource control or scope of decision making. Despite changes in modern organizational structures which stress empowered rather than hierarchical working practices, this can still be a significant source of power.
- ♦ Fear or coercion. This can relate either to real or perceived threats, usually more of a psychological than physical nature. Threats of humiliation, exclusion, withdrawal of promotion or other rewards, intimidation and blame can all be used destructively. It's usually more effective against individuals than teams – a collective response against such threats can render them useless.
- ♦ Knowledge. Expertise and knowledge that's perceived to be valuable is an important source of power, especially when shared. Some people believe withholding information and knowledge is a source of power, but in fact if this happens continually, the person requiring the expertise will go elsewhere, reducing the withholder's power over the long term.
- ♦ Rewards. There are practical rewards that can be used (e.g. salary increases and perks), and other rewards that can also have a motivation impact (e.g. giving constructive feedback, recognition for achievement).
- ♦ Contacts. 'Who you know' can be an important source of power – many organizations stress the value of networking; some people make reference to senior or influential people within and outside of the organization to support their arguments.

IMPORTANT

The impact of using these sources of power will vary, their effectiveness depending on a number of variables such as the relationship between the people involved, the objectives of the discussion, the context, and the preferences of the individuals. Not all sources are valid if the objective is to build relationships through the process of influencing.

TAKE NOTE

Not all sources of power are based on ethical values, some can have very damaging short and long term effects. Using fear and coercion is clearly the most negative approach, which can only have a destructive effect on working relationships, individual motivation and also organizational performance. Using position power is often an inadequate base, particularly when organizational structures are constantly changing.

The only sustainable source of power is personal power; we all have this to a varying degree, but it is possible to develop it further. The communication skills we explored in Section 1 are all important here:

The ability to listen actively, show empathy for others, question appropriately, and give and receive feedback are all valuable contributors to the good relationships that provide the foundation for personal power. High degrees of competence, specialist skills or expertise are also valued in the workplace and can be an effective source of power when used positively.

Identifying (realistically) the type of power you have will help you to use it more effectively when you need to draw upon it. For example, if in a particular situation you have the power of expert knowledge, then the influencing style you choose can help you to apply it most effectively. Identifying types of power can also help you to assess what source other people may be drawing upon.

We've explored a range of different sources of power, and these are all linked to the way in which such power is used when influencing others, or your style of influencing.

This rest of this module looks at the key role you can play while carrying out development activities, particularly in terms of encouraging and reviewing development.

How do you think you can provide support for the development activities contained in a Personal Development Plan (PDP)?

Comment

Whatever encouragement you provide, the guiding principles must be that development activities are:

- ♦ Consistent with your team objectives.
- ♦ Consistent with the development goals.
- ♦ Consistent with the preferred learning styles you identified.

There are a variety of ways in which you can provide encouragement including:

- ♦ Providing information and advice
- ♦ Organizing learning opportunities that fit the PDP.
- ♦ Provide instruction when appropriate.
- ♦ Providing feedback, which we look at in the next section.
- ♦ Monitoring progress on a continuing basis.
- ♦ Identifying and removing obstacles using your position as a manager.

You may have thought of other activities that you can use in your organization.

Three specific types of support which you can offer others:

- ♦ Coaching.
- ♦ Mentoring.
- ♦ Monitoring.

This section explores the skills you need to be effective in each of the three areas mentioned above.

6. Coaching

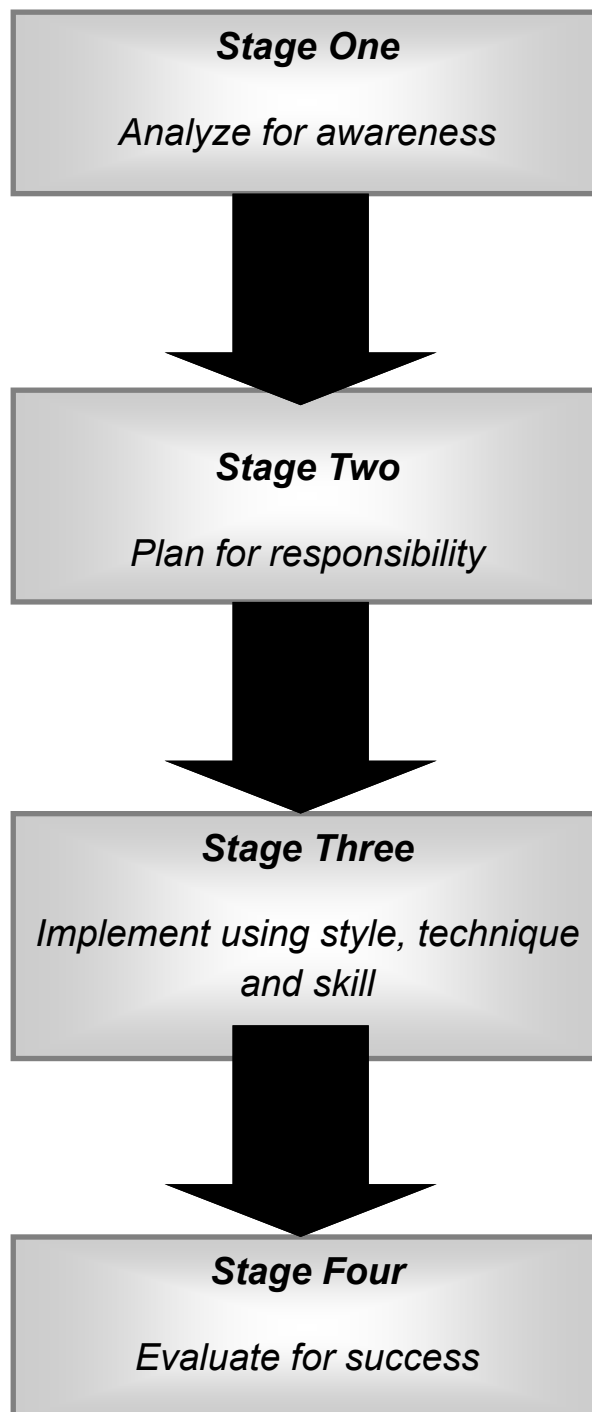

Coaching is becoming increasingly important for managers, as more organizations have recognized the necessity for continuous development. Clearly it would be impractical for most organizations to put continuous development into practice using solely off-the-job training so much of the responsibility lies on you, the manager, and on the individuals themselves.

Coaching is...

...is a process that enables learning and development to occur and thus performance to improve. It also provides a model for an effective management style. To be a successful coach, you require knowledge and understanding of the process as well as the variety of styles, skills and techniques that are appropriate to the context in which the coaching takes place.

The coaching process is illustrated below:

You can see a clear link between coaching and the development process that we have been following in this workbook. What does a coach do? Let us look at each stage more closely.

7. The coaching process**Stage One: Analyzing for awareness**

- ♦ Help individuals develop an awareness of the need to improve their performance by learning.
- ♦ Establish clear standards or performance competences for individuals to aim for.
- ♦ Encourage individuals to carry out self-assessment as a basis for subsequent discussion.
- ♦ Use regular appraisals (quarterly) to identify and agree desired performance requirements.

Stage Two: Planning for responsibility

- ♦ Actively involve individuals in decision-making and agreeing a PDP.
- ♦ Link PDP's to organizational objectives as well as individual aspirations.
- ♦ Ensure that PDP's answer the key questions.
- ♦ What is to be achieved?
- ♦ How will it be done?
- ♦ Where will it be done?
- ♦ When will it start and end?
- ♦ Who will be involved?
- ♦ Who needs to agree the plan?

Stage Three: Implementing

- ♦ Use appropriate coaching styles and techniques.
- ♦ Use personal coaching skills namely, listening, observing, questioning and giving feedback.
- ♦ Grasp opportunities for coaching which arise on many different occasions during the working day and when they occur.
- ♦ Create an awareness of coaching and plan properly for coaching.

Stage Four: Evaluate for success

- ♦ Review the PDP once it has been completed.
- ♦ Answer these key questions:
 - Were the performance goals achieved?
 - Did the different components of the PDP work in the sequence intended?
 - What changes, if any, were made to the PDP and why?
 - Was the PDP cost-effective?
 - Were there any unexpected benefits?
 - What would you do differently next time?
 - Is there a need for a new PDP to improve performance still further?

If your answer is 'yes' to the final question, the coaching process starts all over again.

8. Coaching teams

As a manager and a coach, you would normally expect to coach all the members of your team. In practice, coaches are expected to be effective with teams of up to fifteen people after which more than one coach is necessary.

The basic rules of coaching (a process requiring the application of styles, techniques and skills) still apply when coaching a team. In addition, you need to understand what makes teams 'tick', the characteristics and dynamics of teams, and the different ways in which individuals can contribute to the team.

Much has been written on the factors that contribute to successful teams, and these factors include:

- ◆ The objectives of the team are understood and accepted by members of the team.
- ◆ Team discussions are relevant to the task and everyone participates.
- ◆ Most decisions are reached by consensus.
- ◆ Team members listen to each other.
- ◆ The team monitors itself and its progress.
- ◆ Criticism is frequent, constructive, frank and does not create discomfort.
- ◆ There is disagreement, but this does not create discomfort in the team. Such disagreement is an expression of a genuine difference of opinion and not a device to 'put others down.'
- ◆ There is no 'hidden agenda' and people are free to express their feelings.
- ◆ There is an atmosphere, which tends to be comfortable, informal, relaxed and lacking tensions.

The coach needs to articulate this view of team working behaving in a way that reinforces and supports these factors. The coach should also regularly and openly discuss with team members how close they feel they are to achieving this vision of an effective team. Identifying and swiftly dealing with problems requires good communications skills and decisive action from the coach.

Coaching a team will require you to operate with groups of staff as well as in one-on-one situations. Successful team coaches adopt a 'helicopter' approach (hovering above day-to-day events to get a detached, objective overview of what is happening and what is on the horizon, but retaining the ability to swoop down and help correct individual problems).

9. Monitoring

Implementing the PDP, whether it is your own or someone else's, generates a momentum all of its own, but regular monitoring is vital. Monitoring ensures that the development plan is kept to, and progress is made. If for any reason this is not happening, monitoring enables changes to be made, both to the PDP and to expectations.

Before we look at monitoring more closely, let us clear up on any confusion between monitoring and evaluation, which will be considered in the next section of this workbook.

Monitoring and evaluation are terms which are often used interchangeably, but there is a difference and the distinction is useful in relation to the process of continuous development.

Mentoring is...

...an ongoing activity which is necessary throughout the development plan to ensure that the activity results in constructive progress towards the objective. It measures progress.

Evaluation is...

...a one-off activity carried out once the development plan is complete. It is concerned with collecting, analyzing and interpreting information about any aspect of a development activity, as part of a recognized process of judging its effectiveness. It measures outcomes.

The result of both monitoring and evaluation is information that can feed back into the development process, helping you to set new objectives which will contribute to developing potential.

Monitoring through performance or progress reviews is essential because it provides an opportunity to carry out the following:

- ◆ Identify and resolve problems.
- ◆ Give and seek feedback.
- ◆ Ensure that the development activity is keeping on track.
- ◆ Modify goals or objectives again and clear up any misunderstandings by mutual agreement.

Effective monitoring depends on the following factors:

- ◆ Clearly defined (SMART) development goals.
- ◆ An effective review procedure.
- ◆ Constructive feedback.

Development goals

Do not confuse monitoring development with performance monitoring. We are not referring to monitoring tasks or activities which have performance criteria associated with them. In simple terms, the end result of a personal development plan is the ability to perform in the future and monitoring the progress of the PDP means ensuring that learning activities are taking place, and that they contribute to the development goals set out in the PDP.

10. Review procedure

Reviews may be:

Informal: seeking and receiving information and feedback on an informal basis, as and when required, or appropriate.

Formal: pre-arranged meetings, which may form part of an appraisal scheme.

The length of time between review sessions will at the end of the day depend on the following:

- ♦ The individual.
- ♦ The type and complexity of the development goal.
- ♦ The need for support.

Monitoring needs to be systematic and relevant. Experience has shown that two techniques greatly assist in this crucial aspect of developing potential. Without these, good intentions can quickly disappear under the constant pressure from the normal daily work and social environment.

The two techniques are listed below:

- ♦ The development review.
- ♦ The learning log.

We will consider each of these techniques in more detail, as they are both practical ways to help ensure you monitor progress effectively. You can put them into practice as they are described or you can take the key principles and adapt them to suit your own situation.

10.1 Development review

The involvement, encouragement and practical input from the coach is a crucial aspect of successful development. In practice, much of your contact is most likely to be informal or concerned with other day-to-day operational matters. It is therefore important however, that you find time for a structured review meeting on a regular basis for instance, once a month. To help this to happen it is useful to prepare a simple agenda and keep a record of any action points you agree on.

A development review form, such as the one provided below, enables you to:

- ◆ Focus on the key agenda items.
- ◆ Note any measures of progress made.
- ◆ Record any changes agreed to the PDP.
- ◆ Highlight any action points you need to implement.

Date: 15 May 2003
Agenda Items: Report back on progress chairing weekly continuous improvement group meetings. Spreadsheet training – still not ale to progress this. Agree firm dates for any three meetings.
Issues discussed: ◆ Problems controlling Edward when he tries to dominate meetings – need to be more assertive. ◆ IT departments dragging feet in providing help on my Excel training – ignoring my requests. ◆
Action points: ◆ Read up on techniques for dealing with difficult people in meetings – John to dig out book he has at home. ◆ John to speak to IT department about organizing spreadsheet training.
Date of next meeting: 15 June 2003

10.2 Learning log

An integral part of the process which drives development is reflection. As development is about changing behaviour to achieve higher levels of performance it is important to get into the habit of reflecting on any learning event in a systematic way. The discipline of keeping a Learning Log encourages reflection.

Keeping a Learning Log to record these events, reflections and conclusions is an important part of a systematic approach. The information can be stored and retrieved for use in the evaluation phase and to help make future develop decisions.

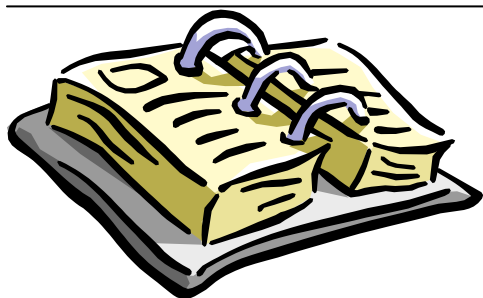

A learning log enables you to:

- ◆ Note the event and describe objectively what happened and why.
- ◆ Record reactions including thoughts, feelings and actual behaviour.
- ◆ List the points learned or perhaps discovered accidentally.
- ◆ Record conclusions and future intentions.

There is an example of an extract from a Learning Log below. As you can see that individual has recorded their reactions to an event at work and reflecting on what happened has helped them to decide on action that will help to avoid a repetition of the problem.

Date: 15 May 2003
Event what happened and why: I was criticized by my team member for not completing the report on customer complaints in time for the quality review meeting.
My reaction (thoughts, feelings and behaviour) I was defensive and reacted negatively by giving reasons for delay to report. I was too aggressive in my response – probably because I knew she was correct and I felt guilty about it.
What did I learn and discover? On reflection, I realized that it would have been better for me to let Angie know in advance that the report would not be available and explore the options with her. I placed Angie in a difficult position as she needed the information to produce a summary for the Board meeting. I realized that I could have produced it in time had I given it the priority it required.
What am I going to do about it? If I have a deadline I cannot meet in future, I will let the person know well in advance. I will set aside time in my diary to complete the job like this so that they do not get overtaken by events.

The development review and learning log forms we have included here are just examples of the type of documentation you could use to make monitoring more systematic. You may already have something suitable in your own organization, or you may devise forms that are customized to your own requirements. However, we are including blanks of both the forms so that you can copy and use them if you wish to.

11. Problems and potential Solutions

Possible problems	Potential Solutions
Coach imposes solutions rather than the subordinate	Ensure that you ask 80% and tell 20%. In this way you will ensure coaches commitment to the solutions.
The coaches implements the solutions but they do not result in the required changes	Coaches again to explore further options and find new solutions.
The coach does not believe in the coaches solutions and puts up barriers	Ensure that you spend more time exploring options before deciding on solutions.
Coaches is unwilling to admit that there is scope for improvement	Diagnose the coaching barriers and emphasize the factual evidence for the need to improve or ask the coaches to coach you.
The coaches mistrusts the organization	Build the trust
The coaches has a temporary lack of available time	Agree on a later session
The coaches has an unhelpful historical relationship with you	Attempt to “bury the hatchet” and if all else fails suggest an alternative coach
There is a major difference between her / his style and yours	Discuss styles explicitly and attempt to accept style differences if possible
The coaches perceives your role in the organization as being highly evaluative	Be explicit about your role. For example whether you determine the coaches remuneration. Stress that coaching is non-evaluative. If all else fails suggest an alternative coach.
Person feels that coaching is a prelude to dismissal	Ensure that coaching is separate from the disciplinary process. Be explicit about this

12. Developing a coaching plan

The following are guidelines for developing a coaching plan in your area of responsibility:

- ♦ Obtain support from your immediate manager / supervisor prior to embarking on the following.
- ♦ Establish what the needs are in your area of responsibility in terms of on-the-job coaching. That is who requires coaching and in what areas.
- ♦ Identify members of staff who are able to assist with on-the-job coaching.
- ♦ Estimate the amount of time required to meet these needs.
- ♦ Establish when would be the best time to carry out on-the-job coaching.
- ♦ Approach the people in your area of responsibility and discuss on-the-job coaching with them. Obtain their agreement prior to the implementation of any on-the-job program.

[illegible]

STUDY UNIT 4

Coaching skills and techniques

LEARNING OUTCOMES

On completion of this study unit the student will....

- ♦ Apply coaching skills and techniques by coaching an employee within the workplace environment.

1. Prepare for coaching

The following guidelines are suggested in preparing for a coaching session:

- ♦ In conjunction with the learner set up a date, time and venue for the coaching session.
- ♦ Review the material / task to ensure that you understand the content / concepts / skill / tools that you wish to convey to the learner.
- ♦ Practice explaining difficult content / concepts / skill / tools.
- ♦ Understand what method of conveying this information you are going to use. For example are you simply going to teach the theory or can you include a practical demonstration.
- ♦ If required prepare notes.
- ♦ Complete the activity by yourself as if you were a learner.

2. Theory and knowledge

The following is provided as a guideline for communicating theory and knowledge during the coaching session:

- ♦ Describe the task or activities that will take place.
- ♦ Explain why learning the task or procedure is important to the company, team or individual.
- ♦ Break the task or procedure into smaller chunks or steps.
- ♦ Verbally explain how to perform each step of the task or procedure in a logical sequence.
- ♦ When possible, show how the task or procedure should be performed.
- ♦ Allow the learner to practice or demonstrate the task or procedure in front of you.
- ♦ Provide positive feedback when possible and make specific corrections. See Section 3 for further details on this.
- ♦ Provide learners with further opportunities to practice and provide them with reinforcement.
- ♦ Request that learners explain when and how this skill can be used.
- ♦ Ask learners how you can provide them with ongoing support in using the new skill.

3. Clarify problem/expectations**Strong Communication skills**

- ♦ Choose your words carefully and show that you're listening:
- ♦ "Did I hear you say ...?"
- ♦ "So, do we agree (disagree) that ...?"
- ♦ "Do I understand correctly that you're saying ...?"

Maintain a calm, friendly and relaxed tone of voice.

- ♦ Use body language that invites participation and allows the individual to relax. Maintain eye contact, smile and use nodding to show agreement/understanding. Avoid folding your arms or looking over the individuals shoulder when communicating.

4. Agree on solutions/action**Initiative/Creative skills**

- ♦ Think laterally and be open to suggestions, input and feedback.
- ♦ Hear the other person out and remain optimistic and enthusiastic.

Solution/Action orientated

- ♦ Focus on the solution, rather than the problem.
- ♦ Encourage the individual to think of possible solutions to problems, before informing you of only the problems.
- ♦ Way up the pros and cons of the solution and highlight any possible risks.
- ♦ Consider alternatives or back-up plans.

Strong Listening skills and Empathy

- ♦ Actively listen to individuals ideas, inputs and suggestions
- ♦ Nod to show interest and understanding
- ♦ Paraphrase what's being said to check understanding
- ♦ Make a mental note to remember what is being discussed so that you can refer to it later or take notes
- ♦ Show understanding of individuals concerns and feelings
- ♦ "I hear what you're saying ...?"
- ♦ "I can understand that you feel ...?"

Delegation skills

- ♦ Delegate certain tasks or actions which need to be taken
- ♦ Allow the individual a certain degree of freedom in using their initiative and making their own decisions
- ♦ Don't abdicate responsibility
- ♦ alternatives/options.

Good Sense of Judgment and Consideration for detail

- ♦ Get the basics right first.
- ♦ Don't rush into any decisions.
- ♦ Consider all the facts/risks/

5. Review and follow-up**Good Time Management skills**

- ♦ Plan what must be done, when and how.
- ♦ Prioritize and don't neglect any areas of concern.
- ♦ Make time to meet and make contact with the individual.

Conflict Management skills

- ♦ Disagree on the issue, not the person.
- ♦ Listen carefully and don't interrupt.
- ♦ Ensure that you have heard correctly, ensure clarity.
- ♦ Think before you respond and be honest in the reply you give.
- ♦ Don't jump in and kill the objection.
- ♦ Don't try to bluff your way out of a situation, you may lose credibility.
- ♦ Maintain the individuals self-esteem.

6. Steps to a coaching team**6.1 Set the Foundation of Growing and Nurturing a Team**

- ♦ Set the parameters
- ♦ Identify each others values and ways of thinking (cultural or social)

6.2 Bridge the Gap

- ♦ Become one of the team players
- ♦ Accept each other's differences

6.3 Organize your Team

- ♦ Assess their performance
- ♦ Help them identify their strengths and development areas

6.4 Allow for Open, Honest Communication

- ♦ Admit to past mistakes
- ♦ Ask for ideas, suggestions and feedback
- ♦ Provide regular feedback and support

6.5 Establish Common Goals

- ♦ Identify what goals you want to reach as a team
- ♦ Together determine the strategy

6.6 Continuously Motivate each other

- ♦ Know what motivates each individual and yourself
- ♦ Don't only leave it up to you, as the manager, to motivate the team

6.7 Continuously Provide Guidance and Support

- ♦ Where there is failure – create hope and encourage improvement

[illegible]

STUDY UNIT 5

Feedback

LEARNING OUTCOMES

On completion of this study unit the student will....

- ♦ Provide detailed feedback to the appropriate role players.
- ♦ Explain the purpose of providing feedback

DEFINITION

forms part of the communication process where you inform an individual of his/her progress and measure this progress against specific objectives and performance standards, as well as highlight the acceptable behaviour.

1. Why feedback

- ♦ **Provide Information on Progress:** It tells the individual how they are doing and what they should be focusing on.
- ♦ **Allows Change or Correction:** It allows people to change their course of action and/or make corrections where necessary.
- ♦ **Shows Care, Concern and Interest:** It should not be viewed as verbal punishment. Feedback must demonstrate care and concern for individuals feelings and concerns and development. The Coach must show genuine interest in the individuals growth and development.
- ♦ **Provides Direction:** It should be used to guide and direct an individual towards achieving a desired outcome.

2. Reviewing and giving feedback

The objective of reviewing and giving feedback is to create a 'base' upon which subordinates can build and gradually improve his/her performance.

Steps to follow when Reviewing and Giving Feedback:

1. Review duties, responsibilities, goals and performance standards
 - ♦ Have a clear idea of 'where things stand'; i.e. where the employee is at and what he/she must still do to achieve the desired goals/level of performance.
2. Evaluate actual performance against performance standards
 - ♦ On your own measure and evaluate your subordinate's performance against the agreed standard. Get specific examples to prove your ratings.
3. Hold performance review discussions
 - ♦ Use the steps identified in the Coaching Process
 - ♦ Clarify Problem/Expectation
 - ♦ Generate ideas/suggestions
 - ♦ Agree on solution/action plan
 - ♦ Implement action plan
 - ♦ Review and follow-up
 - ♦ Ongoing recognition and support

4. Record, assess and follow up

- ♦ Make notes of the contents of the discussion
- ♦ Review your own performance as a coach
- ♦ Follow up on any action plans

3. DO'S & DON'T'S

DO.....

- ♦ Focus on observable behaviours and be critical about the behaviour - not the person
- ♦ Recognize any contributions and efforts
- ♦ Give advice and feedback on any on-going problems
- ♦ Establish firm goals and performance standards expected for the next review

DON'T

- ♦ Only give feedback on what he/she did wrong (negatives), highlight the positives too
- ♦ Show signs of personal biases or prejudices
- ♦ Focus on personality traits or things which might offend the person
- ♦ Rely on impressions or hearsay or focus on things which are beyond the control of the subordinate

4. Tips for effective feedback

- ♦ **Be specific:** Avoid statements or feedback such as “You’re doing really well/great” or “You may need to improve or put some work into this”. These statements are general and doesn’t tell the person exactly what they’ve done right or wrong. Tell the subordinate exactly what they did and why it was effective/ineffective
- ♦ **Balanced:** What would happen if your manager only gave you negative feedback or only told you what you were doing wrong? When giving feedback make sure that you give a bit of both positive and negative feedback. Too much negative feedback can make someone feel despondent, resentful, defensive and unwilling to listen or learn. Start with something positive and then move into the negative, but end on positive note.
- ♦ **Timely:** Provide feedback as soon as it’s needed, don’t wait too long, as the impact will wear off. Where you cannot provide feedback immediately, record all the details and refer back to it later.
- ♦ **Accurate:** Check your sources and ensure that they or you have not been biased in any way. Ensure that your feedback is based on fact.

- ♦ **Relevant:** Focus on the agreed performance/expectations and behaviours. Avoid irrelevant feedback/information.
- ♦ **Provide Alternatives:** Don't just discuss the wrongs; also consider the options available to improve performance. Consider the action plan to improve and alternative courses of action. Try to generate ideas from the person themselves, however provide suggestions where necessary.

5. Providing a variety of rewards

POSSIBLE REWARDS

We know that we cannot always offer monetary rewards or promotions, so we need to be more creative in the ways we recognize and reward individuals.

Here are some of possibilities:

- ♦ **You:** Have an 'open-door' policy, i.e. be available for advice and suggestions. Consult your subordinate from time to time for his/her advice. Provide personal attention and concern and make the individual feel valued and important.
- ♦ **Increase job responsibilities:** Consider ways to increase the subordinates responsibilities, again showing their worth/value. Consider tasks/activities which you can delegate. Empower and trust your subordinate to make decisions on their own.
- ♦ **Further training:** Offer training courses as a reward. This could lead to greater satisfaction, create more learning opportunities and increase their self-esteem. Consider long-term growth opportunities and succession planning.
- ♦ **Praise:** If there is respect your subordinate will value your praise. Where you can publicly praise subordinates (i.e. Staff member of the month or using the subordinates performance/behaviour as an example to others). Get higher management to also acknowledge achievements and success.

[illegible]

STUDY UNIT 6

Assessment

LEARNING OUTCOMES

On completion of this study unit the student will....

- ♦ Define assessment.
- ♦ Distinguish between formative and summative assessment.
- ♦ Apply principles of assessment during the assessment process.
- ♦ Identify evidence.
- ♦ Collect the correct type of evidence by measuring it against the criteria of evidence.

1. Formative assessments

Coaches need to ensure that no learner is being left behind, so regular consolidation is essential to good group learning. One of the best ways to consolidate is to use formative assessments to establish where the learners are in the learning.

Before we can understand assessment, we need to know how education and training has changed. You will remember from the previous module that the NQF recognizes that learning is a lifelong process. We are faced with such rapid change in our lives that we must continue to learn - formally and/or informally - throughout our lives. Even those things we already know in order to do our jobs change because of new technology or better ways of doing things. To make things more difficult, the speed and frequency of change force most skilled workers to relearn their jobs many times throughout their career. The worker who wants to advance to a higher level of work (more difficult work or a job with more responsibility) must learn new skills and duties.

But one does not only learn in order to improve one's competence in a specific job. One must also learn how to be an effective parent, a responsible citizen, appreciate the arts, and how to understand the changes in the world and their effects on each of us.

We are learning all the time – whether we are aware of it or not.

If we say that learning never stops, we also say that people need to feel capable of learning, and they need to continually develop and use 'tools' in order to learn by themselves. A learner must ensure that he/she develops a broad knowledge-base because this will help him/her to solve problems and make decisions in different situations. Assessment is a useful tool to tell a learner and his/her facilitator whether that knowledge- and skills-base is developed well enough for the learner to perform well on the job. One of the tools that may be used to help people to continue learning, is assessment.

**Assessment must be used to support learning,
and not only to test past or current
achievement.**

2. What is assessment?

We constantly make assessments in our everyday lives: if you are deciding what sort of car to buy, you will assess a range of options and collect evidence about price, specifications, quality, design and other factors. You will have criteria to match the evidence against – it must be within a certain price range, have the latest safety features, be economical, red and sporty. You will probably watch 'Drive Time' on television as they might be test-driving the kind of car you have in mind. As you collect more information, you narrow down the field and then make a decision.

Assessment is...

- ♦ Assessment is a process of passing judgment on individual competence in a given situation. (Source: ETD Practices Project)
- ♦ Assessment is a structured process whereby different types of evidence are collected, using a variety of assessment methods. Judgments are made in order to take a decision on an individual's performance based on national standards. (Source: International Competency Network)
- ♦ Assessment is a strategy for measuring knowledge, behaviour or performance, values or attitudes. It is a data-gathering strategy. The measurement of data you gain from assessment helps you to evaluate. (Source: Outcomes-based education, Kais Publishers)

3. Assessing learning in the workplace

Remember that we are not making small changes to the way we assess learners. In fact, we are changing the whole way we think about assessment. You have heard about “making a paradigm shift” – this means not making little changes here and there, but change that goes right to the heart of the matter. That has not happened in most organizations yet.

**Hey, but we're doing
new paradigm
assessment in our
company, aren't we?**

**No. New paradigm
assessment is not just
a new name for the way
we've always been
doing assessment!**

A new approach to assessment allows us to use the collected evidence in many different ways to the benefit of the learner. (The company also benefits, because we build up a workforce that is better skilled for the work they need to do.) We can -

- ♦ assess if a learner has reached the set standard. The learner is given feedback on his/her performance, with advice on how to improve;
- ♦ assess a learner's capability (knowledge, skills and values);
- ♦ assess whether a learner has been able to transfer his/her learning to other situations. Feedback is given, as well as a plan for further development to help the learner improve on transfer of learning;
- ♦ assess how a person performs on the job in order to pinpoint where he/she may improve;
- ♦ assess how the learner is progressing in a learning situation or on a learning pathway;
- ♦ motivate the learner by recognizing his/her strengths and discussing ways to improve where there are weaknesses; (identifying strengths and weaknesses in order to further develop the learner);
- ♦ diagnose /find out any learning problems the learner may have;
- ♦ diagnose what remedial help the learner needs;
- ♦ give recognition for prior learning or experience (RPL).

It is clear that assessment is about much more than writing an end-of-year exam or testing a learner's 'intelligence'.

The results of a single test or examination should not make or break your career any more. Through standards-based on-going assessment your progress will be monitored continuously. This will HELP your learning!

In a standards-based (or outcomes-based) system, learners are assessed when they (and others involved - facilitator, for example) are sure that they are ready to be assessed. If they do not achieve the standard the first time they can be coached or trained further and then assessed again later.

There is no such thing as 'pass' or 'fail', only 'competent' or 'not yet competent'—this means the competence can be achieved later, through remedial education and training, more on the job exposure, etc. Assessment is seen as a process, not a single event, and this process is about collecting evidence that will prove the learner has met the standard.

Learners know beforehand what outcomes they must achieve, and know how they would best be able to demonstrate their competence. (For example, some learners may feel more comfortable doing an oral examination than a written one, or would prefer being observed while performing in a workplace setting than doing a written examination or structured interview.)

4. Using an assessment template as planning guide

Once you have completed the planning process, it is necessary to document all the information in a structured way. This is important as the following persons will need to have the details about the assessment process:

- ♦ The learner who will be assessed
- ♦ The assessor (yourself or another person who may have to take your place as assessor in case you cannot undertake the assessment)
- ♦ The employer
- ♦ The body handling an appeal in terms of a particular assessment (e.g. the ETQA / SAQA). They would need to see that there was transparency around the assessment. The fact that the assessment plan is documented clearly and available for all stakeholders will only help in case of an appeal.

We recommend that you use an 'assessment template' (or own version thereof) as a guide when you document your assessment plan. This will ensure that critical aspects that you have considered in the design phase are also documented. An example of an assessment template / plan is given in the Additional Reading Section of Module 2 as part of the Assessment Guide.

REMEMBER.....

Remember that this is only an example, you might well draw up a different format you are comfortable with, as long as the critical information is recorded in such a way that other assessors, the learner, the employer and an appeals body will find it user-friendly.

- ♦ **Title:** The title should clearly show the type of assessment and the national qualification, standards and competence/outcomes that the learner will be assessed on.
- ♦ **Description:** A short explanation of the assessment process should be given and how the assessment will help in assessing the outcomes or competence stated in the standards.
- ♦ **Learning outcomes/Assessment criteria:** These may be incorporated into the assessment tool, or it can be attached to the completed assessment template as a reference for the learner. (All assessment criteria must be available to the learner before undertaking the assessment.)
- ♦ **Scope of assessment:** This explains the duration and extent of the assessment. The particular tool/s you are designing may be part of a larger assessment. (For example: Part A – Written assessment; Part B – Practical assessment). It is important to document all the tools that will be used in the entire assessment, which may span across a period of time.
- ♦ **Resources:** The resources that will be given must be indicated, (resources include equipment, materials, personnel).
- ♦ **Location (if applicable):** It is important to indicate whether the assessment is 'on the job' or 'under actual production conditions' or in a 'training room' etc.
- ♦ **Clear directions for learner:** While the assessor is responsible for explaining the process, it is necessary to have clear written instructions for learners to follow. This is critical for projects, assignments, case studies, and written and self-assessments, where the learner will rely on the written instructions for completing the assessment task in the correct way. Instructions may of course also be needed for other assessors who may use the tool in future.

Special instructions about how to use a particular assessment tool must be attached to the assessment tool itself. For example: You might want a role-play to be carried out in a particular way, with feedback given halfway through the role-players well as at the end; these special instructions about carrying out the role-play must be attached to the role-play design itself.

- ♦ **Assessment policy:** Often an 'assessment template' may include a general outline of the organization's assessment policies regarding competence achieved, not yet achieved, appeals process, confidentiality, records kept, outcomes of assessments, etc. Such an assessment policy may form the cover sheet for all assessment plans.
- ♦ **Information:** Space must be provided for the learner's name, date, result, assessor's name, signature, comments, review of improvements to process, tool/s, etc. Space can also be provided for the candidate to suggest improvements or make comments on the assessment.
- ♦ **Records management:** Details must be given of where copies of the assessment record are to be sent or filed.

5. Principles of assessment

A set of principles of assessment has been developed to help assessors carry out good assessment and make sound judgments. We feel that there are six key principles of assessment in a standards-based (outcomes-based) system. We have described them for you. You should however, internalize these principles and define them within your environment.

- Validity
- Reliability
- Authenticity
- Fairness

These are the trademarks of the assessment **PROCESS**, and they influence the **RESULTS** we get through assessment.

5.1 Validity

Assessment is valid if it measures what it claims to measure. Validity is achieved when:

- The assessor is fully aware of what is to be assessed (source: standards and outcomes)
- Evidence is collected from activities, tasks, behavior, etc. that can be clearly related to the standard or outcomes
- Evidence shows that the assessment criteria have been met
- Evidence is sufficient (enough) to prove competence.

5.2 Reliability

Reliability refers to the consistency of the assessment results. It is important to ensure appropriate judgment of evidence takes place where there may be an inconsistency of one assessor amongst learners or inconsistency among assessors in a particular unit standard or qualification. For example:

EXAMPLE:

- Different assessors applying different standards
- Assessor stress and fatigue
- Not enough evidence gathered
- Assessor assumptions about the learner based on previous performance

It can be avoided if:

- Assessors give clear, consistent instructions to learners
- Adherence to criteria and guidelines for unit standards
- Assessors meet and talk to each other
- Assessors have knowledge of their learning field
- There are clear and systematic recording systems and the same administration for each learner
- Assessors use checklists where appropriate

5.3 Authenticity

Is the product / document / outcome being assessed truly the work of the learner?

EXAMPLE:

(E.g. a photograph of a house built by the candidate to be assessed on bricklaying competence?)

5.4 Fairness

Assessment is fair if it does not disadvantage particular persons.

Fairness can be achieved by making sure that:

- the learner understands clearly what is expected of him/her;
- the learner knows how he/she will be assessed
- the assessment does not favor any particular learner or group of learners;
- the assessment procedure supports learning;
- the learner is involved with the assessor in developing the assessment process;
- the assessment is as fair as possible for different races, gender, ethnic backgrounds, or disabilities; (a person with a disability may have particular needs that the assessor needs to keep in mind when planning an assessment);
- Test questions and other materials used during assessment do not contain language or content that might offend the person being assessed.

6. Evidence

Evidence is a set of information or observations that provides proof of the learner's competence.

Assessment is the process of collecting evidence about a person's competence and interpreting it in order to decide whether a certain standard has been reached.

By comparing the evidence with the assessment criteria in a standard, an assessor can draw accurate conclusions about the learner's competence.

Learners need to be fully aware of the standards against which they are being measured. They must preferably be involved in identifying and collecting evidence of their achievements.

Criteria for evidence

These three sources of evidence are complimentary sources of information about the learner's competence; they are best used in a mix of all three. Used together they can give a balanced picture of the learner's performance. Using a good mix of all three sources of evidence means that the task of assessing competence can be kept manageable and cost effective. The evidence collected must be:

- **VALID** and fit for purpose.
- **DIRECT** and collected under circumstances that are as close to actual workplace conditions as possible.
- **AUTHENTIC** – the judgment must be based on work done by the learner him/herself.
- **SUFFICIENT** to establish that all the assessment criteria have been met and to prove that the performance can be repeated consistently.

7. Types of evidence

- ♦ DIRECT
- ♦ INDIRECT
- ♦ SUPPLEMENTARY

DIRECT	INDIRECT	SUPPLEMENTARY
 DEFINITION The assessor directly observes the learner's actual performance in a workplace.	 DEFINITION When it is not possible or desirable for the learner to be assessed on her actual performance in a workplace due to cost or risk/danger. Evidence provided about the learner by the learner him/herself or by another source.	 DEFINITION This type of evidence allows the assessor to infer the learner's competence. (infer = to draw a conclusion by judging evidence)

EXAMPLE + LIMITATIONS	EXAMPLE + LIMITATIONS	EXAMPLE + LIMITATIONS
Evidence collected through: ♦ Assessor views video of actual performance. ♦ Assessor directly observes performance in workplace. ♦ Assessor examines a product made in the workplace by the learner. <u>Limitations:</u> ♦ Cost ♦ Risk/Danger ♦ Lack of available opportunities.	Evidence collected through: ♦ Projects ♦ Simulations ♦ Role-plays ♦ Performance appraisal ♦ Documented evidence such as written testimony of a learner's competence; training records. <u>Limitations:</u> ♦ The assessor must draw conclusions about learner's performance in the workplace. ♦ Actual performance may differ from performance in simulated situations.	Evidence collected through: ♦ Certificates and qualifications. ♦ Performance records ♦ Written or oral questioning. ♦ Assessments done off-the-job. ♦ Third-party sources, e.g. team members or manager. <u>Limitations:</u> ♦ Authenticity is not guaranteed. This must be determined carefully (time consuming) ♦ Third parties may not be able to give information due to confidentiality.

8. Feedback

Constructive feedback is an integral part of all assessment. When you plan learning, it is important to link it to applied or simulated learning wherever possible.

Consolidate the learning activity

In Mr. P's session, once he had allowed the learners to identify the problem areas and discuss, he allowed them to move into a new learning environment and observe the skills performed in practice.

To further consolidate the learning, the learners could have demonstrated the requirements of the outcome in a simulated environment, prepared a check list detailing the requirements or orally preset the requirements.

Feedback from learners should always be encouraged. For example, in Mr. P's session the learners may have found it difficult to imagine the layout of a storage area and suggested to him that seeking the inside of the area first would have helped them identify specific areas before they marked their drawn plan. Next time Mr. P had learners to train, he would implement this suggestion.

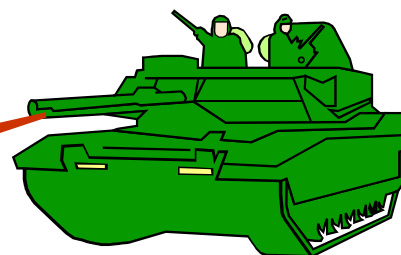

Feedback is a valuable learning strategy. It must be positive and constructive. Not only the facilitator gives feedback. In peer evaluation learners are asked to give feedback to other learners. Feedback should always start with a positive response and then give constructive suggestions e.g. "I was please to see you identified the hazardous areas but, you must remember to locate the position of the fire walls."

Learners should be encouraged to debate and negotiate, yet guided to reach a consensus in order to progress. If learners are involved in selecting and debating the criteria for the evaluation of a task, it helps to consolidate and keep learners on track.

**DO NOT ATTACK WITH CRITICISM THAT IS
NOT CONSTRUCTIVE!**

CRITICISM

[illegible]

STUDY UNIT 7

Evaluating the learning process

LEARNING OUTCOMES

On completion of this study unit the student will....

- ♦ Evaluate a coaching session.

1. Evaluate learning processes

How can practitioners evaluate the impact of a course? First you must decide what you want to evaluate, since there are four levels and they range from easy to difficult to measure: The four levels are as follows:

- ◆ Level One – Reaction (did they like it?) – End-of-course rating sheets.
- ◆ Level Two – Learning (did they learn it?) – Criterion tests and simulations.
- ◆ Level Three – Application (did they use it?) – Measures of on-the-job performance.
- ◆ Level Four - Results (Did the training pay?) – Cost and benefit analysis.

The time to determine which of these four levels will be evaluated and what methods will be used is before a course is launched, not after the course. Course designers and developers are normally responsible for providing the instruments and methodology of the evaluation.

As for follow up, the conscientious practitioner is interested in seeing that participants apply at work what they achieved and acquired during training. There are many things a practitioner can do to improve transfer of learning from workshop to workplace.

Here are some means of learning transfer:

- ◆ Have each participant prepare an action plan that will be shared with the immediate supervisor and that spells out the new skills, procedures and concepts to be used on the job.
- ◆ Prepare the supervisors of participants for their role in recognizing and reinforcing new behaviors back on the job, and in giving additional coaching as required.
- ◆ Schedule time for participants to come together for three to four hours several months after the course is over in order to report on the results they are getting in applying what they learned.
- ◆ Form an informal association ("The Graduates") of everyone who completed the course to meet on a monthly basis for ongoing growth and development (speakers, reports, additional learning exercises).
- ◆ Use surveys, questionnaires and follow up visits to your participants and their supervisors so that you can assess the impact of training, modify the course if appropriate and reinforce the desired performance.

Some examples of evaluation forms are shown on the following page:

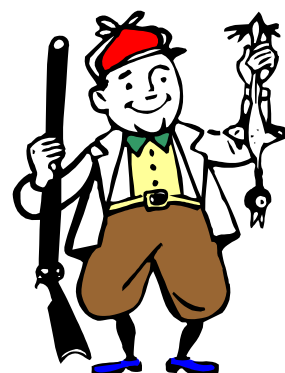

Can you evaluate a learning activity?

Was the outcome achieved?	Tick the appropriate block		
I achieved learner participation...	Successfully	Partially	Not at all
I felt that the learners understood...	Successfully	Partially	Not at all
The learners showed evidence of progress...	Successfully	Partially	Not at all
I created a learning environment that encouraged effective learning...	Successfully	Partially	Not at all
I encouraged dialogue between learners and between learners and myself...	Successfully	Partially	Not at all
I recapped knowledge so that learners drew on previous learning...	Successfully	Partially	Not at all
I clarified the outcomes and the aim...	Successfully	Partially	Not at all
I encouraged interactive learning...	Successfully	Partially	Not at all
I observed and monitored the progress of the learners...	Successfully	Partially	Not at all
I managed the learning activity effectively...	Successfully	Partially	Not at all
I created opportunities for learners to apply their new knowledge...	Successfully	Partially	Not at all
I consolidated learning by encouraging feedback...	Successfully	Partially	Not at all
I consolidated learning by encouraging the learners to be actively involved in the assessment...	Successfully	Partially	Not at all

To be successful you need to be honest with yourself.

Evaluate your performance and make the necessary changes.

Was the learning activity successful?

You are to discuss and decide whether the learning activity you have just completed addressed the outcome.

How was the outcome achieved?	Tick the appropriate block		
We were all encouraged to participate	Successfully	Partially	Not at all
We all understood	Successfully	Partially	Not at all
We feel we are ready to progress	Successfully	Partially	Not at all
We worked in an environment that helped us to learn	Successfully	Partially	Not at all
We were encouraged to discuss with other learners and the facilitator	Successfully	Partially	Not at all
The facilitator recapped so that we remembered what we learnt before	Successfully	Partially	Not at all
The facilitator clearly stated the outcomes and the aim	Successfully	Partially	Not at all
The facilitator encouraged us to work together	Successfully	Partially	Not at all
The facilitator watched and listened to use while we worked. He / she advised when necessary	Successfully	Partially	Not at all
The facilitator made sure we focused on what he / she had planned for us	Successfully	Partially	Not at all
The activity included an opportunity for us to practice our new learning	Successfully	Partially	Not at all
The facilitator asked us questions that allowed us to demonstrate understanding	Successfully	Partially	Not at all
The facilitator allowed us to decide what we should be able to do before we were evaluated	Successfully	Partially	Not at all

Was there anything about the learning activity that you found difficult?

If so, suggest how the facilitator could present it to make it easier to understand.

[illegible]

WORDS/ACRONYMS	EXPLANATION OF ACRONYMS
ASSESSMENT	“A structured process of gathering evidence and making judgments about an individual’s performance in relation to registered national standards and qualifications”
ASSESSMENT CRITERIA	It describe the evidence that is needed to show that the learner has demonstrated the outcome correctly. A list of evidence to be supplied by the candidate as proof of his / her ability to integrate all of the competencies listed earlier in the standard.
COMPETENCE	Competence is the ability to do certain things in a range of different environments with knowledge and understanding about what is being done and the effect this has on others. It includes <u>Knowledge, skills, attitudes, values and ethics.</u>
CREDIT	Each unit standard is worth a number of credits which gives an indication of the size and scope of the unit standard, the standard is worth. (1 credit = 10 notional hours of learning)
CRITICAL CROSSFIELD OUTCOMES	critical cross field outcomes is to direct educational activities towards development of the learners within a social and economic environment.
EMBEDDED KNOWLEDGE	Body of theory essential for understanding and applying the standard. Principles, methods and techniques that would underpin good practice of this unit standard.
EVIDENCE	Evidence is a set of information or observations that provides proof of the learner’s competence.
FORMATIVE ASSESSMENT	Aims to assist the learner to identify any knowledge/skills gaps when demonstrating his/her current competence. Diagnostic assessment supports learning and progress of the learner.
INTEGRATED ASSESSMENT	Integrated assessment refers to: • assessing a number of outcomes together • assessing a number of assessment criteria together • assessing a number of unit standards together • using a combination of assessment methods and instruments for an outcome/s • collecting naturally occurring evidence in the workplace • Acquiring evidence from other sources such as supervisor’s reports, testimonials, portfolio of work previously done, logbooks, journals etc.
LEARNING ASSUMED TO BE IN PLACE	Building blocks (knowledge, skill and understanding) assumed to be in place
LEARNING PROGRAM	A “learning program is a set of learning activities in which the learner will be involved in working towards the achievement of one or more outcomes.
LEVEL	Each unit standard is registered on the NQF at a particular level based on the complexity of the outcomes and stringency of the standards.
NQF	National Qualifications Framework
RANGE STATEMENTS	The range statements indicate detailed requirements of the assessment criteria.

RE-ASSESSMENT	• The same method and instrument may be used, but, the task and materials should be different • The task and materials should, however, be of the same complexity and level as the previous ones. • In case the methods and instruments are changed it must be ensured that they are appropriate for the outcomes specified.
RPL ASSESSMENT	RPL is a way of recognizing what individuals already know and can do. The basic premise underlying it is that people, especially mature adults, learn many things inside and outside the formal structures of education and training and that irrespective of where, how and when learning was acquired, subject to assessment, it can be worthy of recognition and credit.
RPL	Recognition of prior learning
SASSETA	Safety & security sector education and training authority.
SAQA	SOUTH AFRICAN QUALIFICATION AUTHORITY
SPECIFIC OUTCOMES	An outcome is a statement that describes the required competency that must be demonstrated by the learner on successful completion of a training intervention. Key performance areas in the standard are given, the focus is <i>not</i> only on current competence, but also on future competence in this standard.
SUMMATIVE ASSESSMENT	Assessment used to record the level of competence achieved by a learner over a period of time, e.g. at the end of a program, term or year.
QUALIFICATIONS	Represent a planned combination of learning outcomes which has a defined purpose and intended to provide learners with applied competence and a basis for further learning
UNIT STANDARDS	the “building blocks” of qualifications. All qualifications are plotted on the National Qualifications Framework (NQF). “A statement of the outcomes that the learner must achieve to earn credit. Standards are nationally agreed and internationally comparable.”

PURPOSE OF THE UNIT STANDARD

This Unit Standard focuses on coaching individuals in a business environment in order to improve the level of performance to meet a team's required service levels. The learner is required to demonstrate knowledge and skill in an authentic work situation.

The qualifying learner is capable of

- Explaining the concept of coaching in a business environment.
- Demonstrating skills and techniques required of a coach.
- Developing an action plan to coach two team members.
- Gathering evidence and monitoring progress.

LEARNING ASSUMED TO BE IN PLACE AND RECOGNITION OF PRIOR LEARNING

There is open access to this Unit Standard. Learners should be competent in Communication and Mathematical Literacy at NQF Level 2.

UNIT STANDARD RANGE

The typical scope of this Unit Standard is:

- An action plan should include, but is not limited to reference to key performance areas (KPA's), assessment of the situation, gaps in performance, contracting with learners, time frames, resources required, planned outcomes and the measurement of those outcomes.

UNIT STANDARD OUTCOME HEADER

N/A

Specific Outcomes and Assessment Criteria:

SPECIFIC OUTCOME 1

Explain the concept of coaching in a business environment.

ASSESSMENT CRITERIA**ASSESSMENT CRITERION 1**

1. The concept of coaching is explained with examples.

ASSESSMENT CRITERION 2

2. Coaching, counseling, training and mentoring as management tools are explained and an indication is given of when each is appropriate.

ASSESSMENT CRITERION 3

3. The qualities required of an effective coach are listed and related to the role of team leader or supervisor.

SPECIFIC OUTCOME 2

Demonstrate skills and techniques required of a coach.

ASSESSMENT CRITERIA**ASSESSMENT CRITERION 1**

1. The importance of effective listening is explained and an indication is given of the consequences when managers have poor listening skills.

ASSESSMENT CRITERION 2

2. Questions are asked to establish the learner's level of understanding and competence in a specific task.

ASSESSMENT CRITERION 3

3. The skills required to give different types of feedback are demonstrated for three different scenarios.

ASSESSMENT CRITERION 4

4. Techniques for leading learners to reflect on their own performance are demonstrated for three different authentic work situations.

SPECIFIC OUTCOME 3

Develop action plans to coach team members.

ASSESSMENT CRITERIA**ASSESSMENT CRITERION 1**

1. The process to be followed in coaching is applied and action plans are developed to coach two team members in specific tasks.

ASSESSMENT CRITERION 2

2. The roles and responsibilities of coach and learner are explored in order to clarify expectations.

SPECIFIC OUTCOME 4

Gather evidence and monitor progress.

ASSESSMENT CRITERIA**ASSESSMENT CRITERION 1**

1. Evidence of achievement or progress is gathered and a decision is made to sign off, continue coaching or refer the learner for two case studies.

ASSESSMENT CRITERION 2

2. Feedback from the learner is used to adapt an action plan or change a coaching approach for two different case studies.

ASSESSMENT CRITERION 3

3. The impact of a coaching process on the performance of a learner is assessed in order to determine return on effort.

UNIT STANDARD ACCREDITATION AND MODERATION OPTIONS

Accreditation for this Unit Standard shall be obtained from the relevant Education and Training Quality Assurance Body, through summative and formative assessment by a registered assessor.

- Assessors must be registered as an Assessor with the relevant ETQA
- Moderators must be registered as assessors with the relevant ETQA, or with an ETQA that has a Memorandum of Agreement with the relevant ETQA.
- Training providers must be accredited by the relevant ETQA.

Moderation should include both internal and external moderation where applicable.

UNIT STANDARD DEVELOPMENTAL OUTCOME

N/A

UNIT STANDARD LINKAGES

N/A

Critical Cross-field Outcomes (CCFO):**UNIT STANDARD CCFO IDENTIFYING**

The learner is able to identify and solve problems by assessing a situation; determining the gaps in performance and proposing a development plan for two learners.

UNIT STANDARD CCFO WORKING

A learner is able to work as a member of a team in coaching a team member to improve individual performance in the team.

UNIT STANDARD CCFO ORGANISING

The learner is able to organise and manage his/her activities responsibly and effectively when coaching a team member and giving feedback.

UNIT STANDARD CCFO COLLECTING

The learner is able to collect, organise and evaluate information gathering evidence of achievement and assessing return on effort.

UNIT STANDARD CCFO COMMUNICATING

A learner is able to communicate effectively using in coaching individuals and giving feedback.

UNIT STANDARD CCFO DEMONSTRATING

A learner is able to demonstrate cultural sensitivity in coaching individuals to improve their level of skill.

UNIT STANDARD CCFO CONTRIBUTING

A learner is able to act as a responsible citizen in the organisation by identifying gaps in knowledge and skill required to meet a team's service levels.

UNIT STANDARD ASSESSOR CRITERIA

The program has been accredited by SASSETA in the Republic of South Africa.

Material compiled by: Training Dynamics Africa

HOW THIS LEARNER WORKBOOK IS COMPILED

This learner workbook has been compiled to guide you through the on coaching individuals in a business environment in order to improve the level of performance to meet a team's required service level.

1. Explaining the concept of coaching in a business environment
2. Demonstrating skills and techniques required of a coach
3. Developing an action plan to coach two team members
4. Gathering evidence and monitoring progress

You have to study the content and guidelines given in your learner reference guide to complete this workbook.

Remember that this completed workbook must be handed in as it will form part of your formative assessment and will play a role in awarding you the required 05 credits that are to be achieved upon completion of this module.

Write neatly and legibly and ensure that you do not simply copy the information contained in the learner reference guide into your workbook. Give your own opinion and ideas where applicable and write the answers in your own words to indicate your level of understanding and learning.

Good luck with the completion of this workbook.

LEARNING UNIT 1

Introduction to coaching

LEARNING OUTCOMES

A learning credited with this unit will be able to:

1. Define coaching as a method of teaching within the workplace.
2. Identify and apply the basic principles of training
3. Distinguish between knowledge, skills and attitude
4. Know the difference between training and coaching.
5. Know and apply the correct questioning technique during coaching
6. Identify and explain the role of a coach.
7. Portray and know the characteristic of an effective coach.
8. Explain the benefits for the organization when effective coaching is used.

LEARNER ACTIVITY 1 (page 15)**Define coaching**

Business coaching is the practice of providing support and advice to an individual or group in order to help them recognize ways in which they can improve the effectiveness of their business. It can be provided in a number of ways, including one-on-one tuition, group coaching sessions and large scale seminars. Business coaches are often called in when a business is perceived to be performing badly, however many businesses recognize the benefits of business coaching even when the organization is successful.

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

LEARNER ACTIVITY 2 (page 16)

Explain the difference between coaching and mentoring.

Coaching involves working one-on-one with people on an on-going basis to upgrade their skills. There are three steps in coaching:

- ♦ Encouraging people to build on their strengths
- ♦ Equipping people to tackle areas for improvement
- ♦ Enabling people to achieve on-going success.

Coaches realize that people have different styles of learning and will use this understanding to communicate knowledge in the most user-friendly way.

Mentoring involves a developmental relationship between a more experienced "mentor" and a less experienced partner, and typically involves sharing of advice. A business coach can act as a mentor given that he or she has adequate expertise and experience. A good business coach need not have specific business expertise and experience in the same field as the person receiving the coaching, in order to provide good business coaching.

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

LEARNER ACTIVITY 3 (page 16)

Explain the difference between:

Knowledge

Skills

Attitude

Motivate your answer by providing examples within your workplace where you will address each of the above

Knowledge: This refers to the teaching of theory, i.e. facts, information, principles, concepts, etc.

Skills: This refers to a physical act or action. For example typing, playing a trumpet, panel-beating a car, reconciling to documentation, etc.

Attitudes: An attitude is a way of thinking and is usually based on a person's beliefs, values and feelings. They influence, to some extent, how people behave. It is not easy to change people's attitudes and it is ethically questionable whether one should.

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

LEARNER ACTIVITY 4 (page 17)

List the basic principles of training. Provide workplace example for each principle.

The basic principles of training include:

- ♦ Explanation
- ♦ Demonstration
- ♦ Reviewing learner explanation
- ♦ Learner demonstration
- ♦ Feedback

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

LEARNER ACTIVITY 5 (page 18)

Explain the difference between training and coaching

- ♦ The trainer fixes the training agenda, whereas in coaching, the individual sets the agenda.
- ♦ In training the change occurs outside the training environment, whereas with coaching the coach works with the learner to clarify values and enhance motivation.
- ♦ In training some trainees benefit from the training while others do not. In coaching, because the intervention is personalized and geared toward the individuals needs and aspirations, the individual benefits from it.
- ♦ In training it is often not voluntary, whereas in coaching it is voluntary.
- ♦ Training rarely involves feedback, whereas coaching involves ongoing feedback and continuous learning.
- ♦ Training tends to reinforce a traditional, hierarchical style of management, whereas coaching is considered a more democratic and collaborative process.
- ♦ Training tends not to bring about major shifts in thinking or action, whereas coaching is about sustained behavioural change.

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

LEARNER ACTIVITY 6 (page 18)**Define counseling**

Counseling is a preventative measure that will hopefully eliminate the need for corrective action or termination.

Employees should receive timely feedback and guidance from their supervisor.

- ♦ Employees should know their job description, role and performance expectations.
- ♦ Employees should be familiar with the Company's policies, procedures and standards.

Requirements achieved	YES		NO	
Comments in support of decision				

LEARNER ACTIVITY 7 (page 19)

Explain the basic process of workplace counseling

- ♦ Explain the reason for meeting.
- ♦ State the standard or expected behavior.
- ♦ State what improvement in behavior or performance is required.
- ♦ Check for Understanding
- ♦ Actively Listen: Make sure that there is a common understanding of performance expectations.
- ♦ Outline a plan and the follow up steps.
- ♦ Follow Up

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

LEARNER ACTIVITY 8 (page 21)

List three types of questions. Provide practical workplace examples of each question type.

- ♦ **Open-ended questions:** These types of questions are used to encourage greater learner involvement, allow for follow up discussion, generate discussion and seek application of the concept or skill taught.
- ♦ **Close-ended questions:** These types of questions are used to probe for specifics, generate quick responses and do not encourage discussion.
- ♦ **Reflective questions:** These types of questions seek to clarify and ensure understanding on the part of the listener.

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

LEARNER ACTIVITY 9 (page 23)

Discuss the role of the coach within the workplace.

Sponsor: In this role the coach provides an employee with important information, access to decision-makers and important information in the organization, as well as public recognition. This role is used when an employee has demonstrated outstanding skills and contributions and desires new challenges to grow.

Mentor: This is a life-long process of self-development. A mentor is someone who engages in on-going training in his/her respective field and understands networking. In this role they can assist an employee in prioritizing projects to be taken on and provide them with a set of “best practices” on how to approach problems. They could assist in breaking down barriers to performance.

Appraiser: In this role the coach would assist employees in assessing their strengths, developmental needs, blind spots, interests and career goals. By contracting with an employee a coach may observe performance and provide appropriate feedback and support.

Role-model: In order to perform this role the person must be seen as competent and credible. They will therefore demonstrate appropriate leadership styles on the job for employees.

Teacher: In this role the coach shares their knowledge and fosters an environment that makes learning enjoyable and effective. The coach would provide information concerning business strategy, vision, values, services and products, and customers to ensure the effective performance of employees. They also assist in providing employees with new job skills required.

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

LEARNER ACTIVITY 10 (page 24)

List five characteristics of an effective coach

- ♦ **Role Model:** Leads by example and effectively demonstrates the expected skills and behaviours.
- ♦ **Patient:** Takes the time to explain and ensure that individuals have a clear understanding of what must be done and how it should be done.
- ♦ **Supportive and Encouraging:** Supports and recognizes individual and team efforts. Encourages them to use their initiative.
- ♦ **Empathetic and a Good Listener:** Actively listens and shows understanding for other peoples' feelings.
- ♦ **Clarifies any uncertainties:** Asks appropriate questions to assist individuals to gain clarity of issues and possible strategies or action plans.
- ♦ **Proactive and Goal orientated:** Problems are solved jointly. Shows how actions and results relate to expectations.
- ♦ **Knowledgeable:** Understands methods and procedures required by the individual to perform effectively.

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

LEARNER ACTIVITY 11 (page 25)

Explain the benefits for the organization when effective coaching is used.

- ♦ **Subordinates who feel empowered will perform better:** Subordinates who feel controlled or threatened will be less likely to perform optimally. Instead delegate, provide feedback and show trust.
- ♦ **Supportive climate:** A supportive climate or environment increases commitment to achieve common goals.
- ♦ **Learning and Development will happen on the job:** A supportive climate enhances learning and the desire to learn and grow.
- ♦ **The Manager is a key player:** You become the subordinate's role model who leads by example.
- ♦ **Ongoing Feedback:** Feedback will be constructive, specific and frequent.
- ♦ **Job Satisfaction:** Coaching helps employees perform their tasks better and gives them a sense of achievement.

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

SELF-ASSESSMENT

The learner must make use of the following self-evaluation checklist to rate himself against the learning outcomes of this particular training module in establishing the level of mastery of the information.

1. Not able to comply
2. Reasonable compliance (Not acceptable for final evaluation)
3. Able to comply fully

LEARNING OUTCOMES		1	2	3
1	Define coaching as a method of teaching within the work-place.			
2	Identify and apply the basic principles of training			
3	Distinguish between knowledge, skills and attitude			
4	Know the difference between training and coaching.			
5.	Know and apply the correct questioning technique during coaching.			
6.	Identify and explain the role of a coach.			
7.	Portray and know the characteristic of an effective coach.			
8.	Explain the benefits for the organization when effective coaching is used.

LEARNING UNIT 2

Communication

LEARNING OUTCOMES

A learning credited with this unit will be able to:

1. Explain the objectives of communication
2. Understand and apply the complete communication process
3. Demonstrate knowledge of good listening
4. Apply good listening skills

LEARNER ACTIVITY 1 (page 31)

In your own words, explain what communication is:

Communication consists of the exchange of information. If communication skills are inadequate, or are not fully utilized, information and ideas could be incorrectly transferred and received. The supervisor should therefore be able to communicate efficiently in order to avoid conflict and unrest. Mutual communication between the supervisor and the subordinate reveals each person's different needs, feelings and approach to effect cooperation and achieve the set objectives.

Communication may therefore be described as a two-way process between people where one person, the sender, transmits meaningful information, ideas, thoughts, or messages to another person, the receiver, in such a manner that both the sender and the receiver come to understand the same thing.

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

LEARNER ACTIVITY 2 (page 31)

Discuss why it is important to communicate effectively

- Creating a climate of trust, openness and support
- Building bridges and finding solutions for problems
- Passing on information
- Persuading
- Reminding
- Creating a healthy atmosphere
- Being understood
- Changing people's attitudes
- Sharing responsibilities and rewards
- Promoting motivation, study and growth

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

LEARNER ACTIVITY 3 (page 35)

Discuss the following methods of communication.

- ♦ Visual communication with special reference to gestures, facial expressions, and body language.

Nonverbal

We communicate with more than words. Nonverbal behavior often communicates our feelings. Such behavior includes gestures, body movements, facial expressions, and eye contact (fluttering, direction, duration of contact, wink, etc).

Gestures

Natural gestures are important because we use them to emphasize the points we make. Gestures will not distract attention from the message, but if you use your hands as follows, the message will be affected:

- Keeping your hands in your pockets
- Holding your hands behind your back
- Keeping your hands folded
- Nervously wringing your hands

Facial expressions and body movements

People rarely stand still while they are speaking. You move your face and body, and these movements reveal a lot about your feelings, emotions, reactions, and so on. These movements are sometimes conscious and deliberate, for example when you smile for your friend, or frown to show that you are not satisfied, or lift an eyebrow to express astonishment.

Some movements have become so habitual that they are unconscious. You may try to hide your feelings, but unconsciously betray yourself, for example the way in which you move towards or away from a person, how you sit in your chair (relaxed, tense, on the edge, bent over), when you lean forward when you feel involved and are interested but lean backwards when you are not.

Body language

Body language is an important part of nonverbal communication. Some of these gestures are listed below and you should be aware of them when you communicate with other people. These are generalizations and mostly apply to First World cultures.

Turning and wriggling in the chair. This could mean that the person finds the discussion unpleasant.

Rubbing your nose. This could mean that a person is nervous or does not agree.

Sitting with crossed arms. This could mean that the individual is adamant, apparently unyielding. His/her brain might be as tightly closed off as his/her crossed arms.

Sitting on the edge of the chair. This could be confusing, because the exact meaning could be uncertain. It could either mean that the person is beginning to accept you and your ideas and is ready to cooperate, or that he/she is disapproving and wants to end the meeting.

Leaning back with the hands behind the head. This shows arrogance, aggression, a tendency to dominate.

Exaggerated winking, coughing and/or throat clearing. This could denote nervousness or fear of being pushed into a corner. It could also mean that the person feels guilty for some reason.

Steepling of fingers. The fingertips of both hands are brought together to form a steeple. This generally denotes self-confidence, or certainty that what is being said is true.

Requirements achieved	YES		NO

LEARNER ACTIVITY 4 (page 36)

List four obstacles of communication

- Perception differences
- Language differences
- Noise
- Emotions
- Fear
- Age
- Too many messages
- Culture differences, and so on.

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

LEARNER ACTIVITY 5 (page 38)

Discuss six factors which contribute to good listening skills.

Listening with your whole body

One has to decide consciously to listen. For example, when a listener obviously listens, he/she informs the speaker that he/she wants to listen. The decision to listen gives a clear instruction to the brain to limit interruptions by external noise to the minimum and to focus on the concerns of the person who is speaking. The decision to listen will also stimulate the brain to use the extra thinking time to try to understand the other person's point of view.

Give verbal signs to the speaker

The speaker is on the look-out for verbal signs from the listener to help him or her communicate. Signs such as huh-huh? I'll see, and others will be signs to talk less rapidly, to talk faster, to stop talking, or to head in a new direction.

On the surface, listening requires simple reactions that open the door to further communication. Some of these door-openers are: Really?, Tell me more ..., and Lets discuss it.

Repeat the message

The TV networks use immediate repetition to make sure that their viewers realize what has happened. The same technique may be used to improve communication.

If you are not sure that you have understood the message the way the speaker meant it, stop him or her and say: This is how I interpret your message - am I right?, or say: In other words ... Repeat the message in your own words as you heard it and ask the speaker to confirm whether that was what he or she meant.

Listen to the message

Not all listening is of the same type or at the same level. Nor does it have to be. We do not listen to a TV advertisement with the same close attention as to the person who says I love you.

Facial expressions, gestures, tone of voice, eye contact and touch all help to transmit information. However, the unspoken (hidden) message that often contradicts the spoken message might elude you. A good listener listens to ideas as well as feelings.

Summarize while you are listening

Compile summaries while you are listening, as you would do during a lecture. Use key words to remind you of the main points. Don't try to remember every word. The more elaborate your notes become, the more difficult it becomes to listen. Prepare outlines and review them later.

Listen to yourself

William Shakespeare wrote: Go to your bosom, knock there and ask your heart what it do know. You listen to your children, your husband or wife, a speech, TV and radio programs, to friends and a thousand other voices, but you fail to listen to your own inner voice.

Take the trouble to look into your own thoughts, study your own feelings and take notice of your own opinions on specific issues. When you listen carefully to yourself, you begin to realize how other people see you. Use an audio tape to record your own voice and play the tape - it could be a very insightful learning experience.

Know when to keep quiet

Silence communicates, but the messages vary. There is the silence of isolation, the silence of anger, the silence of helplessness, and the very important silence of support.

LEARNING UNIT 3

The coaching process

LEARNING OUTCOMES

A learning credited with this unit will be able to:

1. Identify the need for coaching
2. Follow and apply the coaching process within a workplace scenario.
3. Set up an development review documentation to plan for the coaching session.
4. Develop a coaching plan.

LEARNER ACTIVITY 1**Scenarios:**

Mr P is an education, training and development practitioner in another freight handling company. He has organised with the company's management that he has the assistance of 5 experienced freight handlers. They meet with him and the learners in a large, unused store room which he has carefully prepared for learning to take place. There is a place for learners to work in groups and there is a place where they can bring their chairs to listen, watch and ask questions. There is also a place where individuals can sit and work. The store room is air and cool. Each learner is supplied with a plan of a freight storage area.

1. Mr. P begin by saying:

Good morning all! Welcome to this morning's session. So far, this learnership, you have learnt how important it is to handle freight carefully and why we need to comply with ship-pers' specifications. We also learnt about customer requirements and how to deal with them. Today we will address the importance of allocating spaces for hazardous goods so that they are separated from other goods in an effort to keep our storage areas safe. In front of you is a picture of a freight storage area. Please work in your groups of 4 and spend 15 minutes deciding where you would store hazardous goods. Also discuss why it is important to keep them separated.

2. Mr. P continues:

Right, that is time up. I have been looking at some of your responses. Very good indeed! The group in the far corner can start. Will the spokesperson report back on what the group decided?

After the reports, Mr. P goes on to say:

Excellent. Most of you focused on the areas demarcated for hazardous goods. You also notice that these areas have specially installed fire walls.

I was especially pleased to notice that some groups addressed the precautionary measure that should be adhered to. This shows me that you have been taking the trouble to find information on your own.

Good as it is important to be responsible for your own learning.

Once Mr. P is satisfied that all the learners have participated and understood, he explains that in the future session, they will learn the importance of maintaining hygiene by carefully monitoring the temperatures in refrigerators and pre-cooled areas. He explains that they will be able to apply to be assessed to see if they are competent in these skills. He allocates them into groups to an experienced freight handler to observe and identify the areas. He gives each learner a 'check sheet' detailing the checkpoints to mark while they observe. He tells them to meet him in half an hour for consolidation. During the consolidation session, he gives them a self-assessment sheet to complete. The sheet focuses on the checkpoints required to meet the outcome.

Taking the two scenarios mentioned on the previous pages, can you decide:

- ♦ Which is an effective learning environment and why?
- ♦ Whether the environments are suitable for adult learners?

Think about the following questions when you record your answer:

- ♦ Which of the two training sessions was facilitated in an outcomes-based environment. Explain how this was created.
- ♦ Which facilitator encouraged an open, interactive and participative approach? How did he do this?
- ♦ Which facilitator could monitor learners' participation and understanding during the activity? How did he do this?
- ♦ Which facilitator planned for outside assessment from skill people? How did he do this?
- ♦ Which facilitator created opportunities to apply the new knowledge in real life contexts? How did he do this?
- ♦ Which facilitator encouraged problem solving? How did he do this?
- ♦ Which facilitator encouraged co-operative learning? How did he do this?
- ♦ Which facilitator encouraged learners to critically analyse their progress? How did he do this?

Who would you rather be??

Mr. TOR Mr. P

Explain on the following page why you would not like to be a facilitator like the one you did not choose! Make notes of any points other learners have made that you did not think of.

LEARNER ACTIVITY 2 (page 45)

Explain why it would be necessary to coach an employee

There are three reasons why coaching may be required, namely:

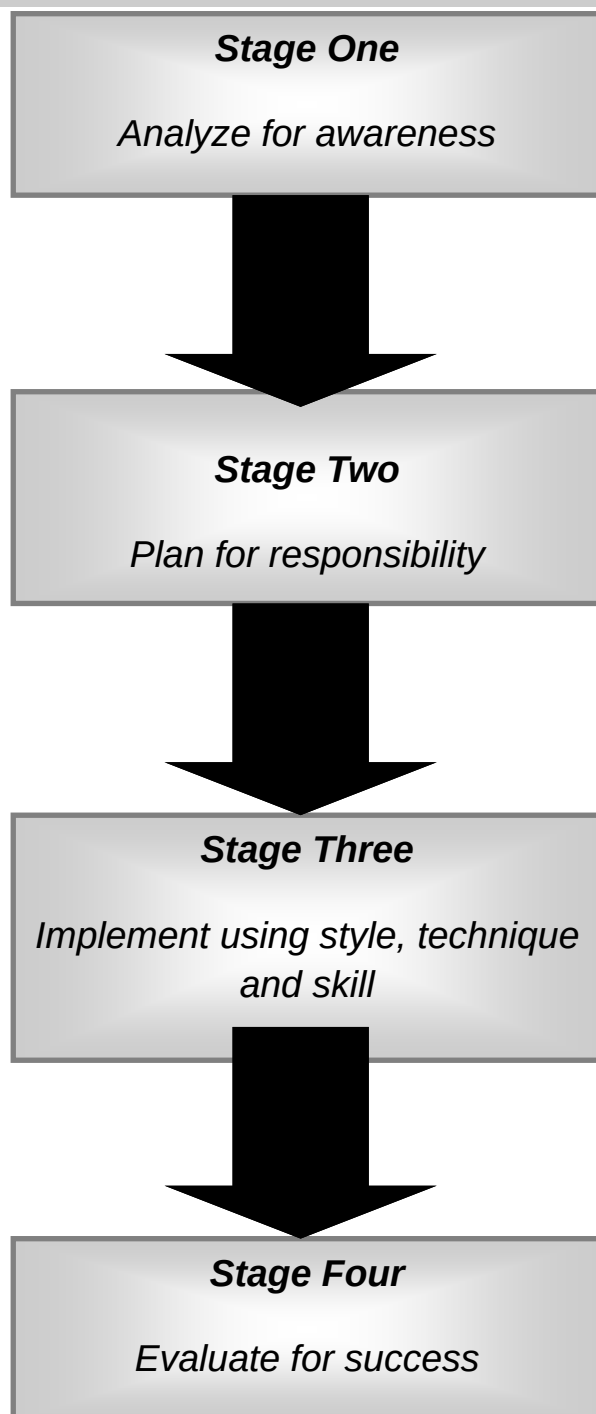

- ♦ **To improve sub-standard performance:** The coach will be directive to set standards and review expectations if a learner does not know what to do or how to perform a particular task / function.
- ♦ **To maintain standard performance:** The coach will use a variety of reinforcement and reward strategies to ensure the ongoing interest and satisfaction of the learner, whilst meeting the demands and standards of the job.
- ♦ **Developmental coaching to exceed standard performance and develop new skills:** The coach assesses the development needs of the learner and provides customized opportunities for those already meeting the required standards. This is to ensure that learners are motivated to take on new tasks and responsibilities.

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

LEARNER ACTIVITY 3 (page 51)

Explain each of the phases of the coaching process.

Requirements achieved	YES		NO	
Comments in support of decision				

LEARNER ACTIVITY 4

From the following instruction set up a development review document to outline the review procedures during coaching.

It is important throughout this exercise that both the coach and the learners act as though the learners have absolutely no prior knowledge of this activity.

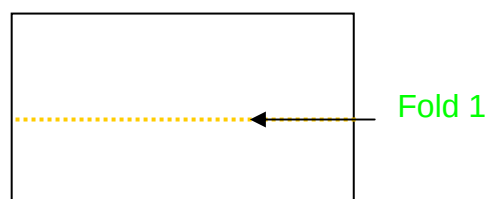

Equipment needed:

- ♦ A4 medium weight paper (enough sheets for everyone plus spares);
- ♦ White board/flip chart
- ♦ Appropriate pens for medium in at least 4 different colours.
- ♦ Start by explaining the objective of the exercise – to produce a paper ‘plane that will fly when thrown into the air’. Then demonstrate the whole process yourself so the learners have a mental image of their goal. Then take them through it step-by-step, illustrating each fold on the board as you go.

Step 1: Fold paper in half lengthways

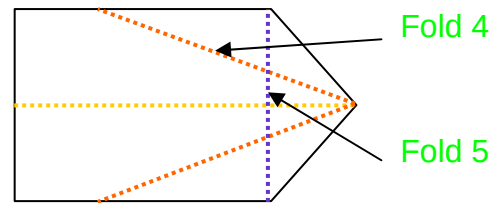

Step 2: Open out paper and make folds 2 and 3

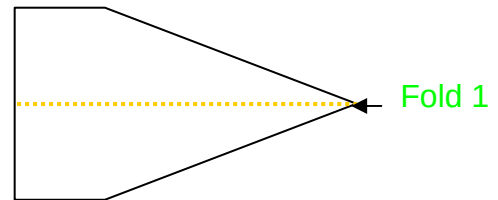

Step 3: Keeping folds 2 and 3 in place, make folds 4 and 5

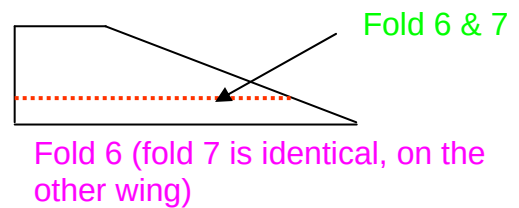

Step 4: Keeping folds 4 and 5 in place, refold along fold 1

Step 5: Make folds 6 & 7, then raise wings until perpendicular to fuselage

Step 6: Grip between thumb and fingers approximately ½-way down fuselage. Cock wrist.

Step 7: Pull arm back, then forward, releasing 'plane at furthest point of arm movement forward. Flex wrist as 'plane is released.

Start by explaining the objective of the exercise – to produce a paper 'plane that will fly when thrown into the air'. Then demonstrate the whole process yourself so the learners have a mental image of their goal. Then take them through it step-by-step, illustrating each fold on the board as you go.

Requirements achieved	YES	NO
Comments in support of decision		

From the information in learner activity 4 draft a coaching plan. The plan needs to contain all the relevant information as required for a coaching plan.

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and extend across the width of the page. There are no margins, text, or other markings on the paper.

LEARNER ACTIVITY 6

You review your competence at each stage of the coaching process. Identifies areas of strengths and weakness. Use the areas in which you need help as a basis for a development plan. Answer the following questions:

- ♦ What is it about?
- ♦ What use is it?
- ♦ How does it help?
- ♦ How do I learn from it?

1. Analyse for awareness

You accurately assess the current standard of performance of the learner as an individual and as a team player

☐ Good
☐ Ok
☐ Needs help

You accurately identify and agree the future performance goals of the learner

☐ Good
☐ Ok
☐ Needs help

You analyse the learner's preferred learning style and identify any barriers to learning

☐ Good
☐ Ok
☐ Needs help

The techniques you use encourage the learner to develop an all round awareness of themselves and their working environment

☐ Good
☐ Ok
☐ Needs help

2. Plan for responsibility

You agree on learning opportunities most suited to the learning style preference of the learner

☐ Good
☐ Ok
☐ Needs help

Your skills coaching plan is based on the correct sequencing of the components of the skill

☐ Good
☐ Ok
☐ Needs help

You agree and / or facilitate the appropriate level of support for the learner

☐ Good
☐ Ok
☐ Needs help

You agree on methods of regularly monitoring performance & choosing opportunities for applying the learning & achieving performance goals

☐ Good
☐ Ok
☐ Needs help

You maximize the scope for the learner to manage their own development and take responsibility for meeting their goals

☐ Good
☐ Ok
☐ Needs help

You organize the appropriate time and space for the learners to practice skills, acquire knowledge and gain experience in a structured way

☐ Good
☐ Ok
☐ Needs help

3. Implement for action

You adjust your coaching style and technique to take into account the learner's progress and level of performance

☐	Good
☐	Ok
☐	Needs help

You explain and demonstrate skills and techniques using an appropriate manner and place

☐	Good
☐	Ok
☐	Needs help

You ensure sufficient opportunities for practice, monitoring, feedback and discussions to occur

☐	Good
☐	Ok
☐	Needs help

You ensure liaison and adequate communication occurs with other people involved in the development process.

☐	Good
☐	Ok
☐	Needs help

4. Evaluate for Success

You regularly evaluate the achievement of goals and standards and explore any factors inhibiting the learning

☐	Good
☐	Ok
☐	Needs help

You provide encouragement and support to the learner to apply their working

☐	Good
☐	Ok
☐	Needs help

You motivate the learner to set new development goals and agree on the ongoing support they need

☐	Good
☐	Ok
☐	Needs help

- ♦ Good : Which is above standard.
- ♦ Ok : Which is acceptable.
- ♦ Needs Help : Which is self explanatory and is the information on which to base a Development Plan

Requirements achieved

YES

NO

LEARNING UNIT 4

Coaching skills and techniques

LEARNING OUTCOMES

A learning credited with this unit will be able to:

1. Apply coaching skills and techniques by coaching an employee within the workplace environment.

LEARNER ACTIVITY 1**Simulation:**

The assessor will set up the role play situation and provide detail in advance to the learner on a workplace topic that he/she needs to be prepared for.

It will be required from the learner to provide all the supportive documents for the coaching session to the assessor and to provide one complete coaching session based on the preparation documentation:

Documentation includes the following:

- ♦ Coaching plan
- ♦ Review documentation

The observation checklist on the next page indicate the required criteria that needs to adhered to during the coaching session.

COACH LEARNER CHECKLIST:

LEARNER NAME: _____

Skills presentation on a topic related to the formative and summative assessment guideline:

PREPARE THE LEARNER	COMPETENT	NOT YET COMPETENT
Put at ease		
State the task		
Determine previous knowledge		
Arouse interest / importance		
Place in correct position		
DEMONSTRATE THE TASK		
Whole task		
Step by step with explanation		
Stress key points and safety aspects		
Instruct slowly, completely and patiently		
Repeat		
PRACTICAL SKILLS		
Imitation step by step		
Allow learner demonstrated step by step		
Correct mistakes allowing to work (SOP)		
Praise		
Continue until competent		
ASSESS		
Let learner demonstrate complete task without help or interference		
Give feedback and repeat if necessary		
FOLLOW UP		
Allow learner to proceed by himself		
Check frequently		
Praise		
Taper off supervision gradually

LEARNING UNIT 5

Feedback

LEARNING OUTCOMES

A learning credited with this unit will be able to:

1. Provide detailed feedback to the appropriate role players.
2. Explain the purpose of providing feedback

LEARNER ACTIVITY 1 (page 71)

Explain why it is necessary to provide feedback after a coaching session.

- ♦ **Provide Information on Progress:** It tells the individual how they are doing and what they should be focusing on.
- ♦ **Allows Change or Correction:** It allows people to change their course of action and/or make corrections where necessary.
- ♦ **Shows Care, Concern and Interest:** It should not be viewed as verbal punishment. Feedback must demonstrate care and concern for individuals feelings and concerns and development. The Coach must show genuine interest in the individuals growth and development.
- ♦ **Provides Direction:** It should be used to guide and direct an individual towards achieving a desired outcome.

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

LEARNER ACTIVITY 2 (page 72)

Discuss the steps to be followed when providing feedback

Review duties, responsibilities, goals and performance standards

- ♦ Have a clear idea of 'where things stand'; i.e. where the employee is at and what he/she must still do to achieve the desired goals/level of performance.
- 2. Evaluate actual performance against performance standards
- ♦ On your own measure and evaluate your subordinate's performance against the agreed standard. Get specific examples to prove your ratings.
- 3. Hold performance review discussions
- ♦ Use the steps identified in the Coaching Process
- ♦ Clarify Problem/Expectation
- ♦ Generate ideas/suggestions
- ♦ Agree on solution/action plan
- ♦ Implement action plan
- ♦ Review and follow-up
- ♦ Ongoing recognition and support

Requirements achieved	YES		NO

LEARNING UNIT 6

Assessment

LEARNING OUTCOMES

A learning credited with this unit will be able to:

1. Define assessment.
2. Distinguish between formative and summative assessment.
3. Apply principles of assessment during the assessment process.
4. Identify evidence.
5. Collect the correct type of evidence by measuring it against the criteria of evidence.

LEARNER ACTIVITY 1 (page 77)

Explain in your own words what you understand under the following terms:

- ♦ Formative assessment
- ♦ Summative assessment

Provide workplace examples where you will use the type of assessments as indicated above.

Formative assessments

Coaches need to ensure that no learner is being left behind, so regular consolidation is essential to good group learning. One of the best ways to consolidate is to use formative assessments to establish where the learners are in the learning.

Before we can understand assessment, we need to know how education and training has changed. You will remember from the previous module that the NQF recognizes that learning is a lifelong process. We are faced with such rapid change in our lives that we must continue to learn - formally and/or informally - throughout our lives. Even those things we already know in order to do our jobs change because of new technology or better ways of doing things. To make things more difficult, the speed and frequency of change force most skilled workers to relearn their jobs many times throughout their career. The worker who wants to advance to a higher level of work (more difficult work or a job with more responsibility) must learn new skills and duties.

But one does not only learn in order to improve one's competence in a specific job. One must also learn how to be an effective parent, a responsible citizen, appreciate the arts, and how to understand the changes in the world and their effects on each of us.

We are learning all the time – whether we are aware of it or not.

What is assessment?

We constantly make assessments in our everyday lives: if you are deciding what sort of car to buy, you will assess a range of options and collect evidence about price, specifications, quality, design and other factors. You will have criteria to match the evidence against – it must be within a certain price range, have the latest safety features, be economical, red and sporty. You will probably watch 'Drive Time' on television as they might be test-driving the kind of car you have in mind. As you collect more information, you narrow down the field and then make a decision.

[illegible]

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

LEARNER ACTIVITY 2 (page 82)

Explain the meaning of the following principles of assessment.

- ♦ Validity
- ♦ Reliability.
- ♦ Authenticity
- ♦ Fairness

Validity

Assessment is valid if it measures what it claims to measure. Validity is achieved when:

- ♦ The assessor is fully aware of what is to be assessed (source: standards and outcomes)
- ♦ Evidence is collected from activities, tasks, behavior, etc. that can be clearly related to the standard or outcomes
- ♦ Evidence shows that the assessment criteria have been met
- ♦ Evidence is sufficient (enough) to prove competence.

Reliability

Reliability refers to the consistency of the assessment results. It is important to ensure appropriate judgment of evidence takes place where there may be an inconsistency of one assessor amongst learners or inconsistency among assessors in a particular unit standard or qualification.

Authenticity

Is the product / document / outcome being assessed truly the work of the learner?

Fairness

Assessment is fair if it does not disadvantage particular persons.

Fairness can be achieved by making sure that:

- ♦ the learner understands clearly what is expected of him/her;
- ♦ the learner knows how he/she will be assessed
- ♦ the assessment does not favor any particular learner or group of learners;
- ♦ the assessment procedure supports learning;
- ♦ the learner is involved with the assessor in developing the assessment process;
- ♦ the assessment is as fair as possible for different races, gender, ethnic backgrounds, or disabilities; (a person with a disability may have particular needs that the assessor needs to keep in mind when planning an assessment);
- ♦ Test questions and other materials used during assessment do not contain language or content that might offend the person being assessed.

LEARNER ACTIVITY 3 (page 84)

Explain in the context of coaching what will be regarded as evidence.

Evidence is a set of information or observations that provides proof of the learner's competence.

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

LEARNER ACTIVITY 4 (page 85)

Discuss the three types of evidence. Provide workplace examples for each type.

DIRECT	INDIRECT	SUPPLEMENTARY
 DEFINITION The assessor directly observes the learner's actual performance in a workplace.	 DEFINITION When it is not possible or desirable for the learner to be assessed on her actual performance in a workplace due to cost or risk/danger. Evidence provided about the learner by the learner him/herself or by another source.	 DEFINITION This type of evidence allows the assessor to infer the learner's competence. (infer = to draw a conclusion by judging evidence)
Requirements achieved	YES	NO
Comments in support of decision		

LEARNER ACTIVITY 5 (page 85)

Explain the process of ensuring that all the evidence being collected comply with the required outcomes.

- ♦ VALID and fit for purpose.
- ♦ DIRECT and collected under circumstances that are as close to actual workplace conditions as possible.
- ♦ AUTHENTIC – the judgment must be based on work done by the learner him/herself.
- ♦ SUFFICIENT to establish that all the assessment criteria have been met and to prove that the performance can be repeated consistently.

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--
