Publications disclaimer

Neither the authors nor the SETA can accept any responsibility for any legal or any other consequences, which may arise directly or indirectly as a result of the use or adaptation of or reliance upon any of the content of this material.

This material has been compiled based on the **UNIT STANDARD 116534 CARRY OUT BASIC FIRST AID TREATMENT IN THE WORKPLACE**

The program has been accredited by SASSETA in the Republic of South Africa.

Material compiled by: Training Dynamics Africa

HOW THIS LEARNER WORKBOOK IS COMPILED

This learner workbook has been compiled for learners who is responsible to apply first aid in a working place.

1. Describe first aid equipment and explain basic application
2. Assess the accident scene, report and make safe
3. Prioritize the casualties and treat

You have to study the content and guidelines given in your learner reference guide to complete this workbook.

Remember that this completed workbook must be handed in as it will form part of your formative assessment and will play a role in awarding you the required 02 credits that are to be achieved upon completion of this module.

Write neatly and legibly and ensure that you do not simply copy the information contained in the learner reference guide into your workbook. Give your own opinion and ideas where applicable and write the answers in your own words to indicate your level of understanding and learning.

Good luck with the completion of this workbook.

LEARNING UNIT 1

Legal Compliance

LEARNING OUTCOMES

A learning credited with this unit will be able to:

1. Define the term first aid
2. Demonstrate knowledge of the elements of first aid.
3. Explain the first aid process.
4. List and explain the responsibilities of a first aider
5. Demonstrate knowledge of the ethics of first aid by focusing on:
 - ♦ Medical ethics
 - ♦ Social norms and standard
 - ♦ Knowledge and skill
6. Demonstrate knowledge of the importance of regular monitoring and recording of vital functions.
7. Demonstrate knowledge and skills of the procedure to be followed for handing a patient over to advance care.
8. Demonstrate skills regarding the procedure to be followed when vital functions are monitored and recorded.

LEARNER ACTIVITY 1

Define the meaning of first aid. (page 15)

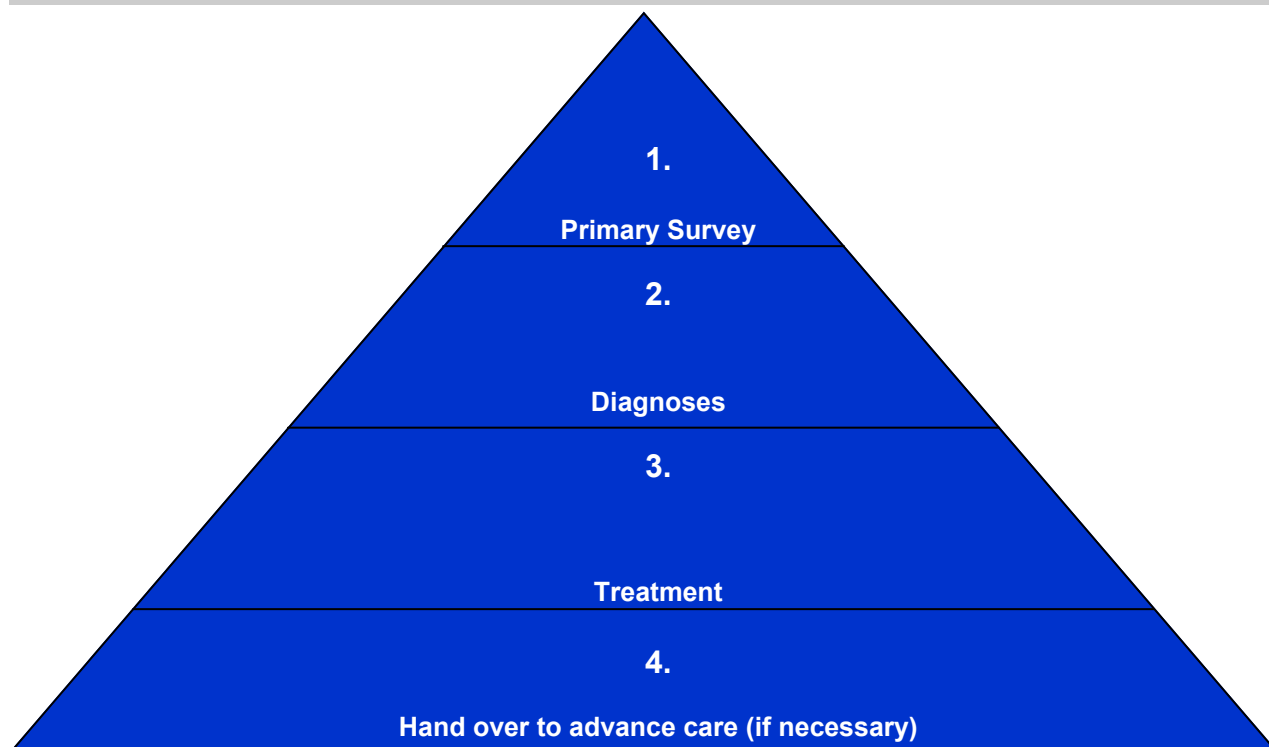

First aid is the effective application of approved measures and the utilizing of available resources to assist a person who has suffered trauma or acute illness.

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

LEARNER ACTIVITY 2

Explain the four steps in the first aid process. (page 15)

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

LEARNER ACTIVITY 3 (page 17)

List the four vital functions that should be monitored and recorded.

- ♦ State of consciousness (awake, confused, semi-conscious or unconscious)
- ♦ Breathing
- ♦ Pulse
- ♦ Skin temperature

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

LEARNER ACTIVITY 4

Name and explain the types of consent a first-aider needs to proceed with treatment.

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

SELF-ASSESSMENT

The learner must make use of the following self-evaluation checklist to rate himself against the learning outcomes of this particular training module in establishing the level of mastery of the information.

1. Not able to comply
2. Reasonable compliance (Not acceptable for final evaluation)
3. Able to comply fully

LEARNING OUTCOMES		1	2	3
1	Define the term first aid			
2	Demonstrate knowledge of the elements of first aid.			
3	Explain the first aid process			
4	List and explain the responsibilities of a first aider			
5	Demonstrate knowledge of the ethics of first aid by focusing on: ♦ Medical ethics ♦ Social norms and standard ♦ Knowledge and skill			
6	Demonstrate knowledge of the importance of regular monitoring and recording of vital functions.			
7	Demonstrate knowledge and skills of the procedure to be followed for handing a patient over to advance care.			
8	Demonstrate skills regarding the procedure to be followed when vital functions are monitored and recorded.

LEARNING UNIT 2

Basic Anatomy and Physiology of the Human Body

LEARNING OUTCOMES

A learning credited with this unit will be able to:

1. Explain the function of the respiratory system.
2. Explain the function of the circulatory system.
3. Explain the function of the nervous system.
4. Explain the function of the skeleton
5. Explain the function of muscles
6. Explain the function of the spinal cord.
7. Demonstrate the key points where a pulse can be felt.
8. Demonstrate the method of feeling a pulse

LEARNER ACTIVITY 1 (page 25)

Explain the function of the spiral column.

Functions of the spinal column

- ♦ Protects the spinal cord
- ♦ Movement
- ♦ Supports torso and skull
- ♦ Shock absorbing

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

LEARNER ACTIVITY 2 (page 27)

Explain the function of muscles in your body.

Functions of muscles

- ♦ Movement
- ♦ Food processing
- ♦ Blood transport

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

LEARNER ACTIVITY 3 (page 28)

Fill in the missing words:

- ♦ (1) _____: Transport blood away from the heart.
- ♦ Veins: Transport blood (2) _____ the heart.
- ♦ Capillary blood vessels: Link arteries and (3) _____.

Blood volumes

- ♦ An adult male: (4) _____ liters
- ♦ An adult female: (5) _____ liters
- ♦ An infant: 350 ml.

Arteries, veins and capillary vessels

- ♦ Arteries: Transport blood **away from** the heart.
- ♦ Veins: Transport blood **towards** the heart.
- ♦ Capillary blood vessels: Link arteries and veins.

5.3 Blood volumes

- ♦ An adult male: 6 to 7 liters
- ♦ An adult female: 5 to 6 liters
- ♦ An infant: 350 ml.

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

LEARNER ACTIVITY 4 (page 30)

Why do we need to take a pulse measurement.

Pulse measurement is performed to determine your heart rate and rhythm.

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

LEARNER ACTIVITY 5 (page 30)

List two place where you can take a pulse. Show and demonstrate the taking of a pulse.
The assessor must use a c0learner as a role player.

Your pulse is caused by your heart beating. As your heart beats and forces blood through your body, you can feel a throbbing sensation (the pulse) by putting your fingers over one of your arteries at any point where the artery comes close to the surface of your skin, such as your wrist, neck, or upper arm.

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

LEARNER ACTIVITY 6 (page 31)

What is the function of the nervous system.

The nervous system is the major controlling, regulatory, and communicating system in the body. It is the center of all mental activity including thought, learning, and memory. Together with the endocrine system, the nervous system is responsible for regulating and maintaining homeostasis.

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

SELF-ASSESSMENT

The learner must make use of the following self-evaluation checklist to rate himself against the learning outcomes of this particular training module in establishing the level of mastery of the information.

1. Not able to comply
2. Reasonable compliance (Not acceptable for final evaluation)
3. Able to comply fully

LEARNING OUTCOMES		1	2	3
1	Explain the function of the respiratory system.			
2	Explain the function of the circulatory system.			
3	Explain the function of the nervous system.			
4	Explain the function of the skeleton			
5	Explain the function of muscles			
6	Explain the function of the spinal cord			
7	Demonstrate the key points where a pulse can be felt.			
8	Demonstrate the method of feeling a pulse

LEARNING UNIT 3

Multiple Injuries, Multiple Incidents and Triage

LEARNING OUTCOMES

A learning credited with this unit will be able to:

1. Define the meaning of triage.
2. Explain the purpose of triage.
3. Demonstrate knowledge of the various categories of triage and the application of treatment of each category.
4. Demonstrate skills on the application of the methods to be used for triage.
5. Apply the procedure when treatment for multiple casualty incidents needs to be effected.

LEARNER ACTIVITY 1 (page 35)

Describe the treatment protocol for a incident where you have three patients with the following injuries:

- ♦ Patient 1: Closed fracture
- ♦ Patient 2: Arterial bleeding from a deep laceration on the upper arm.
- ♦ Patient 3: Clinically dead (for past 45 seconds)

Method of using triage

Triage can be performed rapidly by assessing.....

- ♦ Ability to walk
- ♦ Airway
- ♦ Respiratory rate
- ♦ Pulse rate or capillary return

Procedure

- ♦ Check the time.
- ♦ Use safety, gloves and mouthpiece.
- ♦ Communicate with all role players.

- ⇒ Offer assistance.
- ⇒ Incident history, mechanism of **injury**, clues.
- ⇒ Get help immediately! Call **ALS!**
- ⇒ Involve bystanders, other patients.

- ♦ Visually sort patients between obviously conscious and obviously unconscious.

- ♦ Conscious patients that bleed severely need immediate attention!

- ⇒ Stop severe bleeding by direct pressure and elevation - use patient, bystanders, etc. and position patient correctly.
- ⇒ Reassure and calm other patients and try to use them for assistance.

- ♦ Unconscious (or those who seem to be unconscious)

- ⇒ Stop bleeding
- ⇒ Check for response, determine if actually unconscious
- ⇒ Check ABC

- ☐ **A = airway, open (beware of neck injuries), finger sweep.**
- ☐ **B = breathing, look, listen and feel for 10 seconds, RB if necessary.**
- ☐ **C = circulation, check for 10 seconds, CPR if necessary, first stop bleeding**

- ◆ If ABC is in order, stop bleeding
- ⇒ Neck injuries, apply cervical collar
- ⇒ Position correctly
- ◆ If possible, do secondary survey on all patients and treat accordingly (if possible)
- ◆ Priority of treatment
 - ☐ **Severe bleeding**
 - ☐ **Shock**
 - ☐ **Severe fractures**
 - ☐ **Convulsions**
 - ☐ **Minor injuries and conditions**
- ◆ Position patients
- ◆ Cover patient
- ◆ Monitor each patient's vital signs regularly
- ⇒ Airway
- ⇒ Breathing
- ⇒ Circulation
- ⇒ Temperature
- ◆ Record keeping
- ◆ Hand-over and report to ALS

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

SELF-ASSESSMENT

The learner must make use of the following self-evaluation checklist to rate himself against the learning outcomes of this particular training module in establishing the level of mastery of the information.

1. Not able to comply
2. Reasonable compliance (Not acceptable for final evaluation)
3. Able to comply fully

LEARNING OUTCOMES		1	2	3
1	Define the meaning of triage			
2	Explain the purpose of triage.			
3	Demonstrate knowledge of the various categories of triage and the application of treatment of each category.			
4	Demonstrate skills on the application of the methods to be used for triage.			
5	Apply the procedure when treatment for multiple casualty incidents needs to be effected.

LEARNING UNIT 4

The Primary Survey

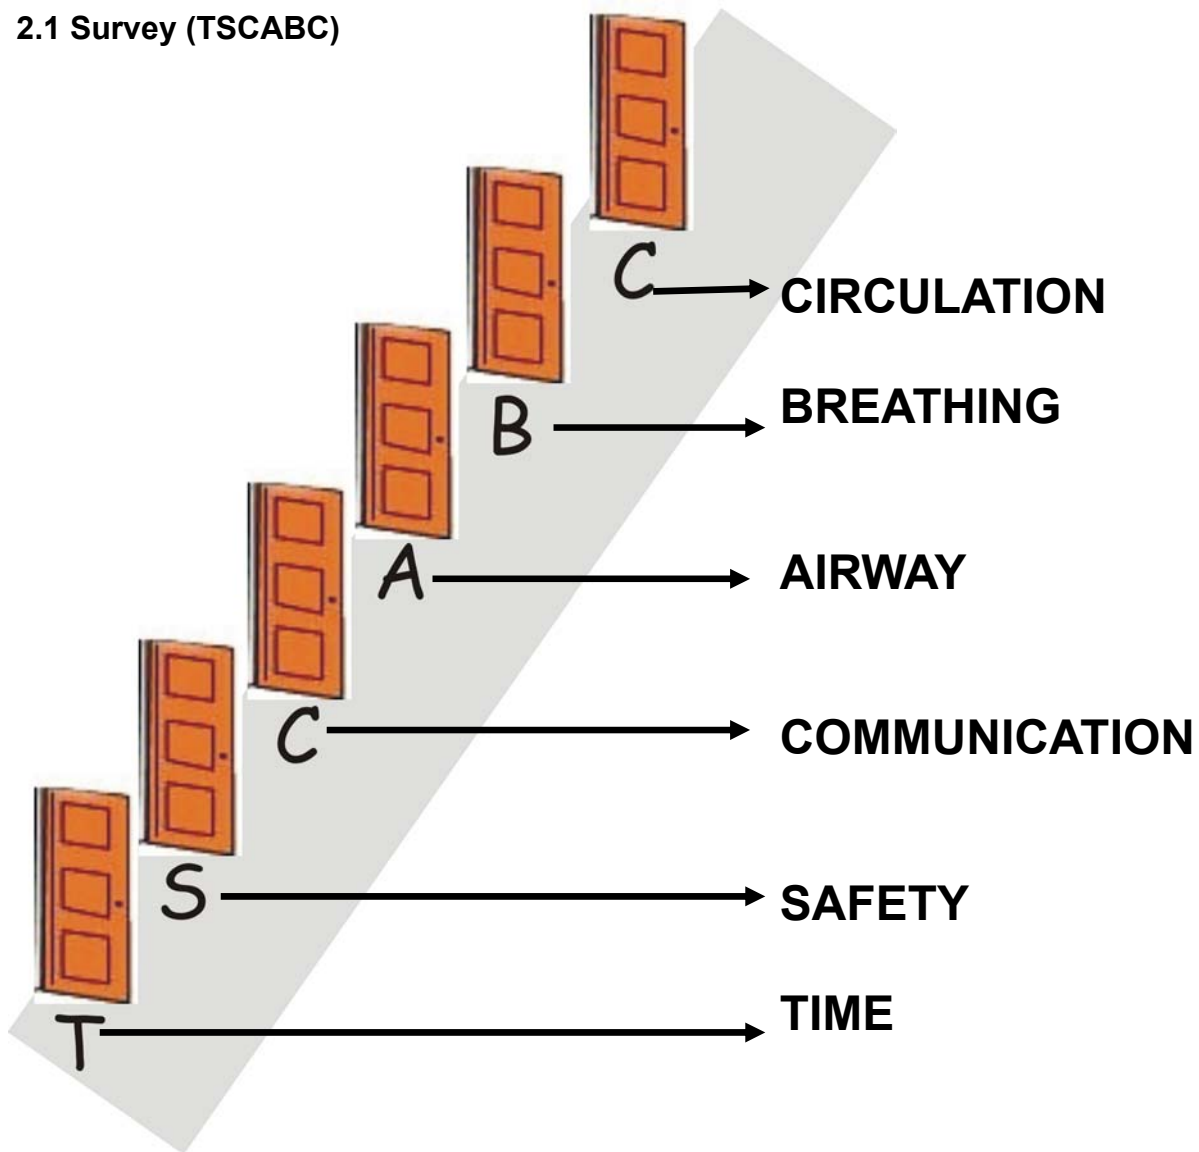

LEARNING OUTCOMES

A learning credited with this unit will be able to:

1. Define the term primary survey.
2. Identify the conditions of a patient that needs immediate attention.
3. Identify and remove any element that can contribute to the emergency scene not being safe.
4. Apply the correct procedure during the process of a primary survey.

LEARNER ACTIVITY 1 (page 43)

The primary survey is described as a process of definite steps. Discuss this process.

2.1 Survey (TSCABC)

Requirements achieved	YES		NO	
Comments in support of decision				

[illegible]

Requirements achieved	YES	NO
-----------------------	-----	----

Comments in support of decision

LEARNER ACTIVITY 2 (page 43)

Define the term primary survey.

The Primary Survey is a **process** of definitive steps to **critically survey** the scene, manage it, and to accurately **assess the patient** for acute life threatening conditions in order to treat them immediately.

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

LEARNER ACTIVITY 3 (page 44)

You are called to an office next to yours for a person that is un-responsive. You walk to the office and find that there are about 7 people cluttering the office. Explain point by point how you will go about doing a survey of the scene and the patient.

- ♦ Secure the scene and environment. Remove all possible Hazards.
- ♦ Secure your own safety. Use protective devices. I.e. Gloves and CPR mouthpiece.
- ♦ Secure the safety of bystanders.
- ♦ Secure the safety of your patient. Either remove your patient with care or remove the elements that endanger the patient.

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

SELF-ASSESSMENT

The learner must make use of the following self-evaluation checklist to rate himself against the learning outcomes of this particular training module in establishing the level of mastery of the information.

1. Not able to comply
2. Reasonable compliance (Not acceptable for final evaluation)
3. Able to comply fully

LEARNING OUTCOMES		1	2	3
1	Define the term primary survey.			
2	Identify the conditions of a patient that needs immediate attention.			
3	Identify and remove any element that can contribute to the emergency scene not being safe.			
4	Apply the correct procedure during the process of a primary survey.

LEARNING UNIT 5

The Secondary Survey

LEARNING OUTCOMES

A learning credited with this unit will be able to:

1. Define the term secondary survey.
2. Demonstrate knowledge of the elements of a secondary survey.
3. Apply the correct procedure during the process of a secondary survey.

Compare the primary survey and the secondary survey with each other and record your views.

[illegible]

[illegible]Comments in support of decision

LEARNER ACTIVITY 2

Put emphasis on the difference of the two and the application of each.

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

SELF-ASSESSMENT

The learner must make use of the following self-evaluation checklist to rate himself against the learning outcomes of this particular training module in establishing the level of mastery of the information.

1. Not able to comply
2. Reasonable compliance (Not acceptable for final evaluation)
3. Able to comply fully

LEARNING OUTCOMES		1	2	3
1	Define the term secondary survey.			
2	Demonstrate knowledge of the elements of a secondary survey.			
3	Apply the correct procedure during the process of a secondary survey

LEARNING UNIT 6

Airway Obstruction and Rescue Breathing

LEARNING OUTCOMES

A learning credited with this unit will be able to:

1. Demonstrate knowledge of airway obstruction and choking.
2. Demonstrate skills of the correct method to open the airway.
3. Distinguish the difference between partial obstruction and total obstruction.
4. Demonstrate knowledge of the signs and symptoms of partial obstruction.
5. Demonstrate skills for the correct treatment of partial obstruction.
6. Demonstrate knowledge of the signs and symptoms of total obstruction.
7. Demonstrate skills for the correct treatment of total obstruction.
8. Demonstrate skills of the application of the various methods that can be used to deal with choking of a:

- ⇒ Adult
- ⇒ Infant or baby

LEARNER ACTIVITY 1

Turn to your buddy and demonstrate to him or her correct holding position of the HEIMLICH MANOEUVRE.

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

LEARNER ACTIVITY 2 (page 63)

What are the specific signs of a total airway obstruction?

Three specific signs of a total airway obstruction are.

- ♦ The patient cannot speak
- ♦ The patient cannot cough
- ♦ The patient cannot breathe

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

SELF-ASSESSMENT

The learner must make use of the following self-evaluation checklist to rate himself against the learning outcomes of this particular training module in establishing the level of mastery of the information.

1. Not able to comply
2. Reasonable compliance (Not acceptable for final evaluation)
3. Able to comply fully

LEARNING OUTCOMES		1	2	3
1	Demonstrate knowledge of airway obstruction and choking.			
2	Demonstrate skills of the correct method to open the airway.			
3	Distinguish the difference between partial obstruction and total obstruction.			
4	Demonstrate knowledge of the signs and symptoms of partial obstruction.			
5	Demonstrate skills for the correct treatment of partial obstruction.			
6	Demonstrate knowledge of the signs and symptoms of total obstruction.			
7	Demonstrate skills for the correct treatment of total obstruction.			
8	Demonstrate skills of the application of the various methods that can be used to deal with choking of a: ◆ Adult ◆ Infant or baby

LEARNING UNIT 7

Artificial Respiration (Mouth to Mouth ventilation)

LEARNING OUTCOMES

A learning credited with this unit will be able to:

1. Demonstrate knowledge of the causes of respiratory arrest and airway obstruction.
2. Demonstrate knowledge of the meaning of artificial respiration.
3. Demonstrate knowledge and skills in the importance of using:
 - ♦ Protective gloves (latex)
 - ♦ Protective equipment (mouth pieces)
4. Demonstrate the correct knowledge during the event of mouth to mouth ventilation.
5. Demonstrate the necessary skills in the application of artificial respiration methods.

LEARNER ACTIVITY 1

Use the dummies in the venue room and demonstrate the following:

- ♦ The correct method of opening the airway for a baby, a young boy and an adult. While demonstrating explains orally what you are doing and why you are doing it.

Requirements achieved	YES		NO	
Comments in support of decision				

SELF-ASSESSMENT

The learner must make use of the following self-evaluation checklist to rate himself against the learning outcomes of this particular training module in establishing the level of mastery of the information.

1. Not able to comply
2. Reasonable compliance (Not acceptable for final evaluation)
3. Able to comply fully

LEARNING OUTCOMES		1	2	3
1	Demonstrate knowledge of the causes of respiratory arrest and airway obstruction.			
2	Demonstrate knowledge of the meaning of artificial respiration.			
3	Demonstrate knowledge and skills in the importance of using: ◆ Protective gloves (latex) ◆ Protective equipment (mouth pieces)			
4	Demonstrate the correct knowledge during the event of mouth to mouth ventilation.

LEARNING UNIT 8

CPR (Cardio Pulmonary Resuscitation)

LEARNING OUTCOMES

A learning credited with this unit will be able to:

1. Define and demonstrate knowledge of CPR.
2. Demonstrate knowledge and skill of the procedure to clear the airway in the event of CPR.
3. Demonstrate knowledge and skill of the procedure to breath for a patient in the event of CPR.
4. Demonstrate knowledge and skill of the procedure to restore the blood circulation of a patient in the vent of CPR.
5. Demonstrate skill in the application of CPR on
 - ♦ A child
 - ♦ A adult
 - ♦ A baby

LEARNER ACTIVITY 1

Use the dummies in the venue room and demonstrate the following:

- ♦ The correct method of CPR for a baby, a young boy and an adult. While demonstrating explains orally what you are doing and why you are doing it.

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

SELF-ASSESSMENT

The learner must make use of the following self-evaluation checklist to rate himself against the learning outcomes of this particular training module in establishing the level of mastery of the information.

1. Not able to comply
2. Reasonable compliance (Not acceptable for final evaluation)
3. Able to comply fully

LEARNING OUTCOMES		1	2	3
1	Define and demonstrate knowledge of CPR.			
2	Demonstrate knowledge and skill of the procedure to clear the airway in the event of CPR.			
3	Demonstrate knowledge and skill of the procedure to breath for a patient in the event of CPR.			
4	Demonstrate knowledge and skill of the procedure to restore the blood circulation of a patient in the vent of CPR.			
5	Demonstrate skill in the application of CPR on ◆ A child ◆ A adult ◆ A baby

LEARNING UNIT 9

Shock

LEARNING OUTCOMES

A learning credited with this unit will be able to:

1. Define the term shock.
2. Demonstrate knowledge of the causes of shock.
3. Demonstrate knowledge of the different types of shock.
4. Demonstrate knowledge of the signs and symptoms of shock during the early stages and later stages of shock.
5. Demonstrate skills in the treatment of shock.

LEARNER ACTIVITY 1 (page 93)

You stop at a scene of a motor vehicle accident. There is one patient that is bleeding severely from a wound in his leg.

You find the following vital signs:

- ♦ Skin condition: Pale and Moist
- ♦ Pupils: Dilated.
- ♦ Breathing: 36 and shallow
- ♦ Pulse: 126 and weak
- ♦ State of Consciousness: Confused

Your diagnosis is SHOCK!!!!

Describe the different shock that might/can occur.

♦ **Hypovolaemic Shock**

Too little blood to carry sufficient oxygen deprives body of oxygen.

♦ **Cardiogenic Shock**

Heart not able to effectively circulate oxygen rich blood, deprives body of oxygen.

♦ **Neurogenic Shock**

Blood vessels dilated resulting in too little blood for enlarged vessels, deprives body of oxygen.

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

LEARNER ACTIVITY 2 (page 93)

What type of shock is the patient suffering from?

♦ **Neurogenic Shock**

Blood vessels dilated resulting in too little blood for enlarged vessels, deprives body of oxygen.

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

LEARNER ACTIVITY 3 (page 94)

How will you treat the patient?

Treatment

- ◆ TSCABC! (time, safety, communication, airway, breathing and circulation)
- ◆ Control severe bleeding. (If necessary before TSCABC!)
- ◆ Lift legs 30cm (shock position) (except with injuries to the neck, back, head, abdomen, pelvis, leg fractures and especially with heart attack)
- ◆ Recovery position if unconscious (carefully observe patient for vomiting and aspiration)
- ◆ Cover patient, maintain body temperature. (space blanket)
- ◆ Nothing per mouth! Wet lips if very thirsty.
- ◆ Monitor vital signs and keep record.

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

SELF-ASSESSMENT

The learner must make use of the following self-evaluation checklist to rate himself against the learning outcomes of this particular training module in establishing the level of mastery of the information.

1. Not able to comply
2. Reasonable compliance (Not acceptable for final evaluation)
3. Able to comply fully

LEARNING OUTCOMES		1	2	3
1	Define the term shock.			
2	Demonstrate knowledge of the causes of shock.			
3	Demonstrate knowledge of the different types of shock.			
4	Demonstrate knowledge of the signs and symptoms of shock during the early stages and later stages of shock.

LEARNING UNIT 10

Bleeding

LEARNING OUTCOMES

A learning credited with this unit will be able to:

1. Define:
 - ♦ Arterial bleeding
 - ♦ Venous bleeding
2. Demonstrate knowledge of the classification of the categories of bleeding.
3. Demonstrate knowledge of the signs and symptoms of severe bleeding.
4. Demonstrate skill to control bleeding.

LEARNER ACTIVITY 1 (page 101)

Define the following:

- ♦ Arterial bleeding
- ♦ Venous bleeding

Arterial bleeding

Bright red colour - oxygen rich, spurts out, can be fatal very quickly.

Venous bleeding

Dark red colour (maroon) - oxygen poor, flows out.

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

LEARNER ACTIVITY 2 (page 103)

How will you know if there is bleeding in the:

- ♦ Stomach
- ♦ Bladder
- ♦ Lungs

Stomach

- ♦ Vomiting of blood, dark brown (like coffee grounds)

Lungs

- ♦ Coughing of blood, pink and frothy

Bladder

- ♦ Discoloration of the urine

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

SELF-ASSESSMENT

The learner must make use of the following self-evaluation checklist to rate himself against the learning outcomes of this particular training module in establishing the level of mastery of the information.

1. Not able to comply
2. Reasonable compliance (Not acceptable for final evaluation)
3. Able to comply fully

LEARNING OUTCOMES		1	2	3
1	Define ◆ Arterial bleeding ◆ Venous bleeding			
2	Demonstrate knowledge of the classification of the categories of bleeding			
3	Demonstrate knowledge of the signs and symptoms of severe bleeding			
4	Demonstrate skill to control bleeding

LEARNING UNIT 11

Unconsciousness, Head and Brain Injuries

LEARNING OUTCOMES

A learning credited with this unit will be able to:

1. Demonstrate knowledge of the levels of consciousness and unconsciousness.
2. Distinguish between a stupor and coma.
3. Demonstrate knowledge of the causes of unconsciousness.
4. Demonstrate the skill to treat consciousness and unconsciousness patients.
5. Demonstrate skill and knowledge to treat patients with head injuries.
6. Demonstrate knowledge of the recovery position.
7. Demonstrate skill of the procedure to place a patient in the recovery position.

LEARNER ACTIVITY 1 (page 107)

Name the levels of consciousness and unconsciousness in the correct order.

- ♦ Normal
- ♦ Confused or disorientated
- ♦ Drowsy or sleepy
- ♦ Stupor
- ♦ Coma
- ♦ Death

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

LEARNER ACTIVITY 2 (page 107)

What is the difference between a stupor and coma?

CRITERIA	COMA	STUPOR
CAN IT BE AWAKEN	NO	YES
IS THERE A CORNEAL REFLEX	NO	YES
IS THERE A PUPIL REACTION	NO	YES

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

LEARNER ACTIVITY 3 (page 108)

You are visiting friends in the country. While you are having lunch, your ten year old boy comes running in, shouting to you that something has happened. He then takes you to where his 11 year old friend is lying on the ground having convulsions. He is frothing and bleeding around his mouth.

- ♦ What is your diagnosis
- ♦ Define your diagnosis
- ♦ How will you treat this patient t while he is having convulsions?

Head injuries**Treatment****Scalp injuries**

- ♦ TSCABC! - RB and CPR may be necessary.
 - ♦ Check LOC regularly.
 - ♦ Suspect skull fractures and brain injuries.
 - ♦ Suspect neck injuries.
 - ♦ Cervical collar and spine board if necessary.
 - ♦ Ring bandage to control bleeding.
 - ♦ Positioning.
-
- ☐ Semi-Fowler (conscious)
 - ☐ recovery position (unconscious)

ALS! (Advance Life Support

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

LEARNER ACTIVITY 4 (page 109)

After the convulsions have stopped, he appears to be unconscious. You can elicit a response with a lot of effort.

- ◆ How will you treat the patient after the convulsions have stopped?
- ◆ What is the patient's level of consciousness?
- ◆ TSCABC! - RB and CPR may be necessary.
- ◆ Check LOC regularly.
- ◆ Suspect neck injuries.
- ◆ Cervical collar and spine board.
- ◆ Check for blood and fluid from nose and ears - never stop it! Just cover it lightly.
- ◆ Positioning.
- ☐ semi-Fowler (conscious)
- ☐ recovery position (unconscious)
- ◆ ALS! (Advance Life Support)

[illegible]

Requirements achieved	YES	NO
-----------------------	-----	----

Comments in support of decision

LEARNER ACTIVITY 5 (108)

Discuss the types of head injuries.

Types of head injuries

- ♦ Scalp injuries: abrasions, bruises and cuts and lacerations.
- ♦ Skull fractures and compression injuries.
- ♦ Brain injuries: concussion, lacerations, bruises and bleeding inside the skull and brain.

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

Your next door neighbor is working on the roof of his house, when one of the roof tiles slips under his foot. He tumbles from his roof and lands on his head. You examine him and find the following:

There is blood flowing from a wound on his head as well as from his ears.

- ◆ What is your diagnosis?
- ◆ How will you treat the patient?

This image shows a blank sheet of white paper with horizontal ruling lines. The lines are evenly spaced and extend across the width of the page. There are no margins, text, or other markings on the paper.

LEARNING UNIT 12

Soft Tissue Injuries, Infection and Burns

LEARNING OUTCOMES

A learner credited with this unit will be able to:

1. Demonstrate knowledge of the various wounds a first aider needs to treat during an emergency.
2. Demonstrate the necessary skill to treat soft tissue wounds during the event of an emergency.
3. Define infections.
4. Demonstrate knowledge of the classification of burns.
5. Demonstrate the necessary skill to treat burns.
6. Demonstrate knowledge to manage burns.

LEARNER ACTIVITY 1

When treating bruises, the best method to use is RICE. What does RICE mean?

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

LEARNER ACTIVITY 2 (page 117)

Name four types of wounds.

- ♦ Bruises
- ♦ Incisions, cuts and lacerations
- ♦ Stab wounds
- ♦ Gunshot wounds
- ♦ Abrasions (Grazes)
- ♦ Avulsions (loose flaps, partial amputation)
- ♦ Amputations

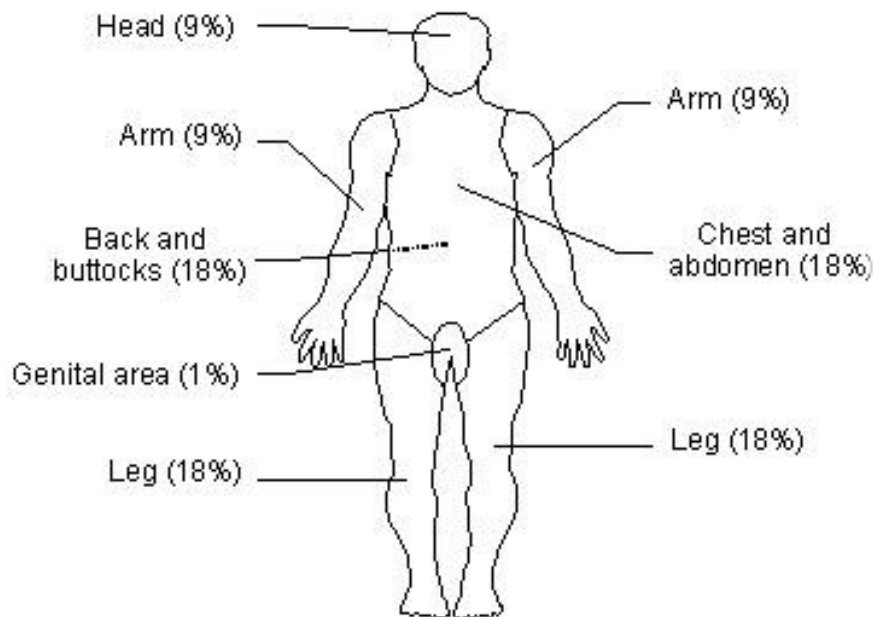

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

LEARNER ACTIVITY 3 (page 119)

Your 11 month old child pulls a boiling kettle from the counter. The water burned him on the right side of his head, his whole right arm, his chest as well as half of his right leg.

- ♦ What surface percentage burns have he sustained. Show your calculations.
- ♦ How would you manage this patient?
- ♦ What complications can set in with burns when the correct treatment is not given?

**Complications**

- ♦ severe infection
- ♦ shock
- ♦ extensive scars
- ♦ loss of function

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

SELF-ASSESSMENT

The learner must make use of the following self-evaluation checklist to rate himself against the learning outcomes of this particular training module in establishing the level of mastery of the information.

1. Not able to comply
2. Reasonable compliance (Not acceptable for final evaluation)
3. Able to comply fully

LEARNING OUTCOMES		1	2	3
1	Demonstrate knowledge of the various wounds a first aider needs to treat during a emergency.			
2	Demonstrate the necessary skill to treat soft tissue wounds during the vent of a emergency.			
3	Define infections.			
4	Demonstrate knowledge of the classification of burns.			
5	Demonstrate the necessary skill to treat burns.			
6	Demonstrate knowledge to manage burns.

LEARNING UNIT 13

Fractures, Joint and Pelvic Injuries

LEARNING OUTCOMES

A learning credited with this unit will be able to:

1. Define a fracture.
2. Demonstrate knowledge of the signs and symptoms indicating that a fracture has occurred.
3. Demonstrate knowledge of the various types of fractures.
4. Demonstrate skill to treat various fractures.
5. Demonstrate knowledge of the various types of splints that can be used.
6. Demonstrate skill on the application of a splint.
7. Define a joint.
8. Demonstrate knowledge of the signs and symptoms of various joints.
9. Demonstrate skill to treat joints in the event of an injury.
10. Define a pelvic injury.
11. Demonstrate knowledge of the signs and symptoms of pelvic injuries.

LEARNER ACTIVITY 1 (page 125)

Define and classify fractures.

It is a broken or cracked bone in the body. according to the Oxford English Dictionary it is defined as "the act of being broken."

Types of Fractures

- ♦ Open Fracture
- ♦ Closed Fracture

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

LEARNER ACTIVITY 2 (page 128)

What are the aims of splinting

- ♦ Immobilize the injured leg. Any movement will be very painful and can worsen the injury.

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

LEARNER ACTIVITY 3 (page 133)

How would you know if a patient has a strained ankle?

- ♦ Local pain.
- ♦ Local swelling.
- ♦ Limited mobility.
- ♦ Dis-coloration.(subcutaneous bleeding)
- ♦ Possible shock.

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

LEARNER ACTIVITY 4 (page 134)

What are the main causes of pelvic injuries?

- ♦ Direct force.
- ♦ Indirect force.(transferred force)

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

SELF-ASSESSMENT

The learner must make use of the following self-evaluation checklist to rate himself against the learning outcomes of this particular training module in establishing the level of mastery of the information.

1. Not able to comply
2. Reasonable compliance (Not acceptable for final evaluation)
3. Able to comply fully

LEARNING OUTCOMES		1	2	3
1	Define a fracture.			
2	Demonstrate knowledge of the signs and symptoms indicating that a fracture has occurred.			
3	Demonstrate knowledge of the various types of fractures.			
4	Demonstrate skill to treat various fractures			
5	Demonstrate knowledge of the various types of splints that can be used.			
6	Demonstrate skill on the application of a splint.			
7	Define a joint.			
8	Demonstrate knowledge of the signs and symptoms of various joints.			
9	Demonstrate skill to treat joints in the event of an injury.			
10	Define a pelvic injury.			
11	Demonstrate knowledge of the signs and symptoms of pelvic injuries.			
12	Demonstrate skill to treat a pelvic injury.

LEARNING UNIT 14

Bandages and Wound Dressing

LEARNING OUTCOMES

A learning credited with this unit will be able to:

1. Identify various bandages and the use of each.
2. Demonstrate skill in the use of identified bandages on specific injuries.

LEARNER ACTIVITY 1 (page 139)

Why do we use bandages?

- ♦ Support and immobilise limbs.
- ♦ Keep splints in position.
- ♦ Keep wound dressings in position.
- ♦ Cover and protect wounds.
- ♦ Control bleeding and swelling.

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

LEARNER ACTIVITY 2 (page 139)

When applying a bandage, one should always keep the distal neuro vascular functions in mind. How will you test if there is anything wrong with them?

- ♦ As soon as you have put the bandage on, ask the person if the bandage feels too tight and check the circulation by pressing a nail or a piece of skin until it turns pale. If it the colour does not return straight away the bandage may be too tight, so you should loosen it. Limbs can swell up after an injury so check the circulation every ten minutes after you have put the bandage on.

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

LEARNER ACTIVITY 3 (page 154)

When will you use cold dressings?

Before applying any dressing, you should wash and dry your hands. You should also follow the advice outlined below.

- ♦ Make sure that you (or the person who is bleeding) are sitting, or lying down.
- ♦ Tell the person what you are doing as you apply the dressing.
- ♦ If the affected area is bleeding, it should stop if you apply pressure and raise the area higher than the heart.
- ♦ Use a dressing that is slightly bigger than the wound you want it to cover.
- ♦ Hold the dressing at the edges, keeping your fingers away from the part that's going to cover the wound.
- ♦ Place the dressing on top of the wound - don't put it on from the side.
- ♦ A little bit of pressure on the affected area should stop it from bleeding again - but make sure that you don't restrict the circulation.

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

LEARNER ACTIVITY 4

Demonstration: The assessor needs to arrange sufficient bandages for the learners to demonstrate the following:

- ♦ How to apply a roller bandage on the eyes and or ears
- ♦ How to apply a triangular bandage for a shoulder injury.
- ♦ How to use Gauze bandage for an open fracture on the arm.

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

LEARNER ACTIVITY 5 (page 160)

List the general rules for using dressings and bandages.

- ♦ Use clean dressings where possible.
- ♦ Once applied, do not remove, if bleeding continues, bandage over existing dressings.
- ♦ Cover entire wound.
- ♦ Not too loose or tight.
- ♦ Use dry dressings - except in certain circumstances (burns).
- ♦ Tuck away loose ends.
- ♦ Keep fingers and toes open where possible.
- ♦ Test for distal pulse, capillary refill, mobility and sensation on fingers and toes of the injured limbs

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

SELF-ASSESSMENT

The learner must make use of the following self-evaluation checklist to rate himself against the learning outcomes of this particular training module in establishing the level of mastery of the information.

1. Not able to comply
2. Reasonable compliance (Not acceptable for final evaluation)
3. Able to comply fully

LEARNING UNIT 15

Heart Attacks and Strokes

LEARNING OUTCOMES

A learning credited with this unit will be able to:

1. Define a heart attack
2. Demonstrate knowledge of the signs and symptoms of a heart attack
3. Demonstrate skill in the treatment of a heart attack
4. Define a stroke
5. Demonstrate knowledge of the signs and symptoms of a stroke
6. Demonstrate skill in the treatment of a stroke

LEARNER ACTIVITY 1 (Page 171)

Define the following:

- ♦ Heart attack
- ♦ Stroke

Complete or partial obstruction of a coronary artery that cause inadequate circulation of oxygen rich blood to the heart muscle which may result in irreversible damage.

Complete or partial obstruction of an artery in the brain that causes inadequate circulation of oxygen rich blood to the brain which may result in irreversible damage.

Requirements achieved	YES		NO	
Comments in support of decision				

LEARNER ACTIVITY 2

Why is it important never to put a patient with a suspected heart attack in the shock position?

Requirements achieved	YES		NO

LEARNING UNIT 16

The First Aid Kit

LEARNING OUTCOMES

A learning credited with this unit will be able to:

1. Identify the necessary equipment and components that needs to be in a complete first aid kit.

LEARNER ACTIVITY 1 (page 179)

List the stock that needs to be in standard first aid kit.

Minimum quantities for low risk establishments and activities may be considered as a general guidance leaflet on first aid.

- ♦ 20 individually wrapped sterile adhesive dressings (assorted sizes) appropriate for the activity (detectable dressings (coloured blue) should be available if catering is to be undertaken)
- ♦ 2 sterile eye pads
- ♦ 4 individually wrapped triangular bandages (preferably sterile)
- ♦ 6 safety pins* (see note)
- ♦ 6 medium sized individually wrapped sterile unmediated wound dressings (approx. 12cm × 12cm)
- ♦ 2 large sterile individually wrapped unmediated wound dressings (approx. 18cm × 18cm)
- ♦ 1 pair of disposable gloves.
- ♦ In situations where mains tap water is not readily available for eye irrigation, sterile normal saline solution (0.9%) in sealed disposable containers should be provided. Once opened they must not be re-used. The use of eye baths/cups or re-fillable containers is not recommended.

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

LEARNER ACTIVITY 2 (page 185)

Explain the best possible way to maintain a first aid kit

The contents of first aid boxes and travelling first aid kits should be replenished as soon as possible after use to ensure a continued sufficient supply of materials. All first aid boxes, etc. should be checked regularly to ensure the contents are not used after their expiry date.

Requirements achieved	YES		NO
