Learning program guide	5-10
1. Introduction	5
2. Purpose of this learning program	5
3. Standards and qualifications	5
4. Assessments	6
5. Range statements	6
6. The learning guide	6
7. Learning assumed to be in place	7
8. Preparation of summative assessment	9
9. Roles and responsibilities	9
Study Unit 1: Development	11-28
1. Strengths and Weaknesses	13
2. Career aspirations	14
3. Types of development activities	15
4. Designing a development plan	20
5. The development plan	24
6. Reviewing performance and obtaining feedback	24
7. Giving feedback	26
8. Responding to feedback	26
Study Unit 2: Role within an organization	29-42
1. Organogram	31
2. Different types of organization charts	31
3. Roles and responsibilities	33
4. Interpreting a company organogram	34
5. Expectations	35
6. Communication work objectives and standards of performance	36
7. Workflow process	36
8. Company values	37
9. Code of Ethics	39
10. The effect on decision making	40

Study Unit 3: Dealing with conflict 43-58

1. Definition 45
2. Causes of conflict 45
3. Identify signs on conflict 46
4. The differences between “competition” and “conflict” 46
5. Types of conflict 47
6. Stages of conflict 47
7. Resolution strategies to solve conflicts 50
8. Negative feelings before or during conflict 54
9. Positive feelings after proper handling of conflict 54
10. Behaviors which help in managing conflict 54
11. Steps that can be taken to handle conflict 56

Study Unit 4: Group dynamics 59-70

1. Informal group dynamics 61
2. SWOT Analysis 62
3. Planning and organising 64
4. Setting Objectives 65
5. SMART 66
6. The planning process 66

Glossary of Terms (Educational terms) 71-74**Unit Standard 75-79****Bibliography 81**

1. Introduction

This learning program is part of a complete qualification. For more details concerning the complete qualification please contact your service provider or alternatively the office of the SASSETA

2. Purpose of this learning program

This unit standard required learners to reflect on the strengths and weaknesses of themselves and their teams in order to manage team performance. It is intended for managers of small businesses and junior managers of business units in larger organizations. The term business unit in this unit standard implies a small business, cost center, section or department. Junior managers include, but are not limited to team leaders, supervisors, first line managers and section heads. The position term is used to describe the first level of management in an organisation at which an employee has other employees reporting to him/her.

The qualifying learner is capable of:

- ♦ Understanding him/herself as worker in a specific position.
- ♦ Identifying own role in an organisation.
- ♦ Understanding the dynamics within a specific group.
- ♦ Using a variety of strategies to deal with potential conflict in a team or group.
- ♦ Developing a plan of action to enhance team performance

2.1 Target group

This program is compiled for the following **target group**:

- Security members
- South African Defense Force members
- South African Police Force members
- Correctional Services
- Individuals who wishes to complete the NQF level 3 National Certificate in security practices.

3. Standards and qualifications

It is important that you as the learner understand and realize that this training program is not presented in isolation, but that it was developed based upon nationally recognized standards known as unit standards.

Unit standards are the “building blocks” of qualifications. All qualifications are plotted on the National Qualifications Framework (NQF).

Unit standards comprises of outcomes. An outcome is a statement that describes the required competency that must be demonstrated by the learner on successful completion of a training intervention.

Unit standard 13912: Apply knowledge of self and team in order to develop a plan to enhance team performance.

4. Assessments

In order to assess whether a learner can actually demonstrate the desired outcomes, assessment criteria are included in the unit standard. Each outcome has its own set of assessment criteria.

REMEMBER.....

The assessment criteria describe the evidence that is needed that will show that the learner has demonstrated the outcome correctly.

Kindly refer to the unit standard attached hereto for the assessment criteria.

It is of utmost importance that the learner fully understands the assessment criteria as listed in the unit standard, as it is the only way in which the learner will know what he will be assessed against.

The **final or summative assessment** is the most important aspect of this training program. It is during this process that the learner will be declared competent or not yet competent.

The learner will know exactly how he will be assessed, and when and where he will be assessed. All of these details must be obtained from the training provider where the learner enrolled for his program.

5. Range statements

REMEMBER.....

Also included in the unit standard are the range statements in support of the assessment criteria.

The range statements indicate detailed requirements of the assessment criteria.

6. The learning guide

The learner guide is included in this material under various learning units. The learner guide has been designed in such a manner that the learner is guided in a logical way through the learning material and requirements of the unit standard.

On completion of this skill program, the learner will be assessed against the assessment criteria as stipulated in the unit standard.

Each of the modules consists of learner outcomes to be achieved during training and development interventions, work related experience or at your own time. The learner outcomes will enable you to achieve the required level of confidence and competence in order to undergo the summative (final evaluations) assessment.

The learner needs to assess his own knowledge and skill throughout the training process by completing the learner workbook. With the completion of the workbook you start collecting evidence to proof your competence. The learner workbook will be assessed (FORMATIVE ASSESSMENT)

TAKE NOTE

The learner guide will remain the property of the learner once the LEARNING PROGRAM has been completed.

TAKE NOTE

- The best results will be obtained if you start with Study Unit 1 in the Learner Guide, and work your way through it, study unit by study unit.
- All learning outcomes are vital and must be studied (and exercised for all practical requirements) thoroughly to ensure that enough evidence for all specific outcomes is generated.

7. Learning assumed to be in place

It is assumed that a learner which registers for this program have completed a program in communication at NQF Level 3 or equivalent.

It is imperative to understand that this program are only one of the building blocks to complete Skills program 1 The complete list of unit standards for Skills program appears on the next page.

7.1 Security program matrix

SKILLS PROGRAM 1: SASSETA E				Patrol Security officer/Grade E
244177	Conduct a security patrol in area of responsibility	Level 3	7 Credits	
244184	Apply legal aspects in a security environment	Level 3	8 Credits	
244176	Use security equipment	Level 2	2 Credits	
244179	Handle complaints and problems	Level 3	6 Credits	
244181	Perform hand over and take over responsibilities	Level 3	2 Credits	
244182	Give evidence in court	Level 3	4 Credits	
12484	Perform basic fire fighting	Level 2	4 Credits	
116534	Carry out basic first aid treatment in the workplace	Level 3	2 Credits	
SKILLS PROGRAM 2: SASSETA D				Access control officer/Grade D
244189	Conduct access and egress control	Level 4	7 Credits	
242825	Conduct evacuations and emergency drills	Level 4	4 Credits	
11505	Identify, handle and defuse security related conflict	Level 4	12 Credits	
117705	Demonstrate knowledge of the Firearms Control Act 2000 (Act No. 60 of 2000)	Level 3	3 Credits	
113924	Apply basic business ethics in a work environment	Level 2	2 Credits	
119465	Write/present/sign texts for a range of communicative contexts	Level 3	5 Credits	
114979	Operate a computer workstation in a business environment	Level 3	2 Credits	
SKILLS PROGRAM 3: SASSETA C				Asset & reaction officer/Grade C
113909	Coach a team member in order to enhance individual performance in work environment	Level 3	5 Credits	
13912	Apply knowledge of self and team in order to develop a plan to enhance team performance	Level 3	5 Credits	
244578	Describe how to manage reactions arising from a traumatic event	Level 3	2 Credits	
113852	Apply occupational health, safety and environmental principles	Level 3	10 Credits	
13936	Outline the legal environment of a selected industry	Level 3	2 Credits	
119472	Accommodate audience and context needs in oral/signed communication	Level 3	5 Credits	
11508	Write security reports and take statements.	Level 4	10 Credits	

Unit standard 13912: Apply knowledge of self and team in order to develop a plan to enhance team performance.

8. Preparation of summative assessment

After you have worked through the **LEARNER GUIDE** and you are satisfied that all theoretical and practical requirements/ evidence, as stipulated by the UNIT STANDARD, can be met, you need to make your own necessary arrangements with the assessor and/ or facilitator. The training establishment will then arrange a suitable date for you to attend your pre-assessment meeting and then arrange for a suitable date to complete the final assessment.

8.1 RPL assessment

The assessment of RPL learners will be conducted in the same way as for those of new learners. The assessment pack is exactly the same and will therefore be used for new learners as well as RPL Learners. It must however be noted that learners who are applying for RPL must provide proof of previous learning and subject related experience prior to the assessment.

This proof or evidence can be in the format of certified copies (certificates) of previous learning programs that have been attended.

All the evidence will be assessed and authenticated before a learner will be allowed to enroll for an RPL program.

9. Roles and responsibilities

9.1 Facilitator/instructor

- Prepare to facilitate.
- Transfer of knowledge and skills

9.2 The role of the assessor

- Plan for the assessment
- Prepare the learner for the assessment

9.3 The role of the Learner

- Prepare for assessment.
- Accept the responsibility of learning.
- Accept the responsibility to produce/deliver evidence.

STUDY UNIT 1

Development

LEARNING OUTCOMES

On completion of this study unit the student will....

- ♦ Describe strengths and weaknesses in the current job role as seen against current job role requirements.
- ♦ Describe career aspirations.
- ♦ Given the organisation, describe types of development activities/ programmes available and explain the advantages/ disadvantages of these.
- ♦ Identify current competence and potential areas for development in conjunction with the line manager and design a development plan.
- ♦ Given the identified training needs, design a development plan to meet those needs, (taking available resources into account) and identify and analyse internal/external factors that may impact on the plan.
- ♦ Identify alternative areas for self-development that may not be work related and describe how the principles for preparing a development plan apply.
- ♦ Given the development plan, identify priorities, objectives and time frames that are consistent with achievement of relevant qualifications or in house development programmes in your organisation.
- ♦ Agree with management on time and resources needed to achieve objectives.

Unit standard 13912: Apply knowledge of self and team in order to develop a plan to enhance team performance.

1. Strengths and Weaknesses

We all have personal weaknesses and strengths in our characters. Generally speaking, we find it easier to identify our weaknesses than to identify our strengths. The following techniques will assist you to find clarity on your own strengths and weaknesses:

1.1 Techniques

To identify Strengths:

- ◆ List the things you love doing, and find easy to do, and identify how they contribute to your work.
- ◆ Ask your peers (colleagues on your level) to list your strengths and tell you why they regard them as strengths.
- ◆ Ask your direct manager and other managers with whom you regularly work to list your strengths and tell you why they regard them as strengths.
- ◆ Ask your direct subordinates to list your strengths and tell you why they regard them as strengths.
- ◆ Look for the common ground between your views and those of your peers, superiors and subordinates and make a summary.

You will also be able to identify your strengths by completing various assessment tools. If you strongly feel that you would benefit by some formal assessment, discuss this with your manager and ask him / her to initiate this with your regional Manager or Training Manager.

1.2 Guidelines

You can identify your weaknesses in a similar way:

- ◆ List the things that you dislike and avoid doing in your work and describe how this impacts on the quality of your work. If it has a negative impact on your work, it will prevent you from getting ahead in your career, so you will have to pay attention to it.
- ◆ Ask your peers, managers and subordinates to identify your weaknesses and tell you why they regard them as weaknesses.

Look for the common ground between your views and those of your peers, superiors and subordinates and summarise.

The assessments described previously will also help you to identify your weaknesses, and will give you a good idea of what you have to do in order to increase your effectiveness at work.

2. Career aspirations

DEFINITION

Career aspiration means the strong desire or ambition to accomplish achievements in your field. We all have aspirations as far as our careers are concerned.

2.1 Guidelines

The most appropriate career path is one that will enable you to play to your strengths, as well as give you satisfaction.

Identifying the most satisfying aspects of your work will enable you to make a decision about the path your career should take. A satisfying career path will be one that brings you the most pleasure and satisfaction by ensuring that you utilise your strengths. An appropriate career path will also be one that is in line with your values. There is no point in pursuing a career in Accounting if you highly value adventure or challenging new experiences. Your Training Manager will be able to help you with completing a Values Questionnaire (refer to folder enclosure) that will help you to identify what is important to you.

Use the information to make a career choice that most closely fits your interests, aptitude and temperament.

Once you have identified your career aspirations you can look at what you would need to do to get there, and plot your path.

2.2 Making the decision

For each of the careers you are interested in, make a list of as many questions as you can think of .

EXAMPLE:

- ♦ What is the financial potential in this field, both immediately and in the future?
- ♦ What employment possibilities exist for me to get a job in this field? Is the field saturated or are opportunities opening up?
- ♦ What is the nature of the work available/ organogram?
- ♦ What are the career paths in this field of work?
- ♦ What are the prospects for career advancement in this field?
- ♦ Is there any possibility that this job may become obsolete in future?
- ♦ Contact procedures for contacting organisations.

Once the answers to the above questions have been collected, analyse the information and evaluate your answers.

3. Types of development activities

Development activities can be defined as any and all activities which result in the participant developing one of, or a facet of, their development needs.

No.	Development Activity	Description
1.	On the job coaching and development counselling	This involves the manager imparting skills and knowledge, answering questions, discussing progress and providing general direction.
2.	Understudy training	A staff member is prepared to assume the responsibilities of the manager, either as a temporary substitute or a permanent replacement.
3.	Job rotation	An individual is moved to other jobs at the same level to broaden his knowledge and experience.
4.	Project team assignments	Placing an individual in a group asked to make recommendations for the solution to problems. Assignments of this nature allow for the development of group dynamics skills.
5.	Special Assignments	Presents staff members with the opportunity for the in-depth study of a problem, increasing analytical ability, judgement, knowledge of the company and decision making skills.
6.	Replacement assignments	An effective replacement assignment is to ask a field representative to replace the boss when the boss travels
7.	University executive development programs	Participation in external executive or management development programs.
8.	Skills training	Participation in external or internal management skills training
9.	Skills development programs	Participation in personal skill and motivation programs. Since reading skills and comprehension are necessary to acquire other important skills, prompt attention should be given to this area if a development need exists.
10.	Job enrichment	This involves expansion of an individuals job content to include a wider variety of tasks, risk taking, greater responsibility and authority.

No.	Development Activity	Description
11.	Providing opportunities to make presentations	This gives the individual the chance to develop his planning and organising skills, as well as public speaking and question answering techniques.
12.	Attendance at and involvement in staff meetings	For effective development to take place attending staff meetings must be structured. Meetings should provide individuals with insight that develops a need. Exposure to higher level management thinking is also advantageous
13.	Serving as an instructor, conference leader or trainer	This is a valuable way of obtaining knowledge, broadening viewpoints and clarifying thinking through teaching others
14.	Studying manuals, bulletins, reports etc	Reading up to gain information that satisfies a development need
15.	Home study courses	These are available through many professional associations
16.	Attendance at conferences, workshops, seminars etc	These can be run internally or externally
17.	Personal counselling	This is useful where a person has personality/adjustment problems
18.	In-Basket analysis and feedback	A useful application of this is to give the trainee a copy of the manager's in-basket, which must be handled according to the trainee's discretion. The trainee and the manager then compare the handling of the items and feedback and review takes place
19.	Management internships	This is an opportunity to introduce individuals to the pragmatics of managerial roles. An internship is developed according to the individual's needs. This involves rotating projects under the supervision of various project managers over a period of time

3.1 Advantages and Disadvantages

Activities	Advantages	Disadvantages
On the job coaching and development counselling	♦ Learner gains valuable first hand experience. ♦ Problems can be dealt with on a first hand basis. ♦ Developing and learning is instant.	♦ Dealing with problem learners could be very time-consuming for managers ♦ Personality clashes may affect the learner's development
Understudy training	♦ Learner gains valuable first hand experience. ♦ Problems can be dealt with on a first hand basis. ♦ Developing and learning is instant.	♦ A lack of experience/ competence may result in mistakes which affect the company negatively. ♦ The Manager may feel threatened
Job rotation	♦ Broadens learner's knowledge base and perspective. ♦ May highlight new areas of potential	♦ Disruptive for the organisation. ♦ The learner may become dissatisfied with present job.
Project team assignments	♦ Allows learner to broaden knowledge and insight. ♦ Develops learner's group dynamics. ♦ Allows staff a forum for discussion. ♦ Generates new ideas	♦ Learner may not participate in the group activity and therefore gain little. ♦ Time consuming
Special Assignments	♦ Creates a sense of responsibility and importance. ♦ Generates new ideas ♦ Develops learner's understanding of the organisation	♦ Time consuming ♦ Can distract learner from present job.
Replacement assignments	♦ Allows learner to broaden knowledge and insight. ♦ Broadens learner's knowledge base and perspective. ♦ Develops empathy	♦ Learner is removed from current job. ♦ The manager may feel threatened

Activities	Advantages	Disadvantages
University executive development programs	♦ Caters for development needs ♦ Motivational ♦ Exposure to new ideas and trend	♦ Learner is removed from work place ♦ Time consuming ♦ Expensive
Skills training	♦ Caters for development needs ♦ Motivational ♦ Enhances performance and competence	♦ Learner is removed from current job.
Skills development programs	♦ Caters for development needs ♦ Motivational ♦ Broadens learner's knowledge base	♦ Learner is removed from work place ♦ Time consuming ♦ Expensive
Job enrichment	Creates a sense of responsibility and importance. Caters for development needs	Added pressure/work load may affect performance
Providing opportunities to make presentations	♦ Allows learner to broaden knowledge and insight ♦ Develops learner's understanding of the organisation. ♦ Develops learners' ability to speak in public and think on their feet	♦ Extremely time consuming, research may impact on job performance
Attendance at and involvement in staff meetings	♦ Allows learner to broaden knowledge and insight ♦ Develops learner's understanding of the organisation. ♦ Develops empathy	♦ Learner is removed from workplace. ♦ Learners may be privy to privileged information

Activities	Advantages	Disadvantages
Serving as an instructor, conference leader or trainer	♦ Allows learner to broaden knowledge and insight ♦ Develops learner's understanding of the organisation. ♦ Creates a sense of responsibility and importance. ♦ Caters for development needs	♦ Extremely time consuming, research may impact on job performance. ♦ Added pressure/work load may affect performance
Studying manuals, bulletins, reports etc.	♦ Caters for development needs ♦ Allows learner to broaden knowledge and insight. ♦ Exposure to new ideas and trend	♦ No guidance or follow up can mean that the reading is not directed or relevant and therefore not beneficial.
Home study courses	♦ Caters for development needs ♦ Allows learner to broaden knowledge and insight. ♦ Exposure to new ideas and trend	♦ Requires immense self-discipline ♦ Added pressure and workload. ♦ Time consuming ♦ Expensive
Attendance at conferences, workshops, seminars etc	♦ Good workshops/ seminars etc are excellent for gaining new ideas and trends, helping with motivation and catering for development needs.	♦ Many workshops are irrelevant and not very beneficial. ♦ Learner is removed from work place
Personal counselling	♦ Provides staff with help and guidance. ♦ Allows staff to overcome difficulties and refocus on performance. ♦ Can allow for development needs.	♦ Specialised staff are costly. ♦ Time consuming.

Activities	Advantages	Disadvantages
In-Basket analysis and feedback	♦ Immediate feedback. ♦ Develops empathy ♦ Develops insight	♦ Time consuming for the manager. ♦ Learner has extra workload which could affect job performance
Management internships	♦ Ensures the availability of quality managers	♦ Time consuming and expensive

4. Designing a development plan

4.1 Line managers

Responsibility

- ♦ The manager is the key to the success of a team. It is a manager's responsibility to get the best out of their staff.
- ♦ It is therefore vital that managers implement strategies to improve the performance competence of their staff. Staff training needs to be a matter of the highest priority with successful managers.
- ♦ Managers must be in touch with the needs of their staff and take into account the many psychological and emotional factors which impact on an individual's performance.
- ♦ It is imperative that good managers make allowance for these factors when considering the performance management of staff.
- ♦ In short, every team is made up of individuals with a specific role or task. The manager's role and responsibility is to mould these individuals into a cohesive, successful unit through effective training and development with the aim of achieving company goals and objectives.

Considerations

- ♦ When designing a development plan, the manager should consider the staff members competencies and potential areas for development against national qualifications/ unit standards, and against in-house standards.
- ♦ Staff and management must reach a consensus with regards to the resources that are necessary to accomplish development. The manager should first look at what in-house resources there are available. Ultimately the staff member and the manager must be satisfied that the resource agreed upon is the essential one to achieve the goals that have been determined.
- ♦ The manager, together with the staff must agree on a time frame for the achievement of established goals. A goal is not a goal unless it is achievable. Managers must take into account obstacles that may delay performance, before deciding on a time frame. It is important that both staff member and line managers agree on resources, time frames and goals.

4.2 Staff member (Employee)

Responsibility

Self-development starts with the employee and with their desire to learn – to learn a job, understand an organisation, master a current difficulty, to advance in your career, to be different. Without this desire, self-development cannot start.

Understand why the employee is dissatisfied and how he/ she can move forward from this state. This is referred to as self-diagnosis.

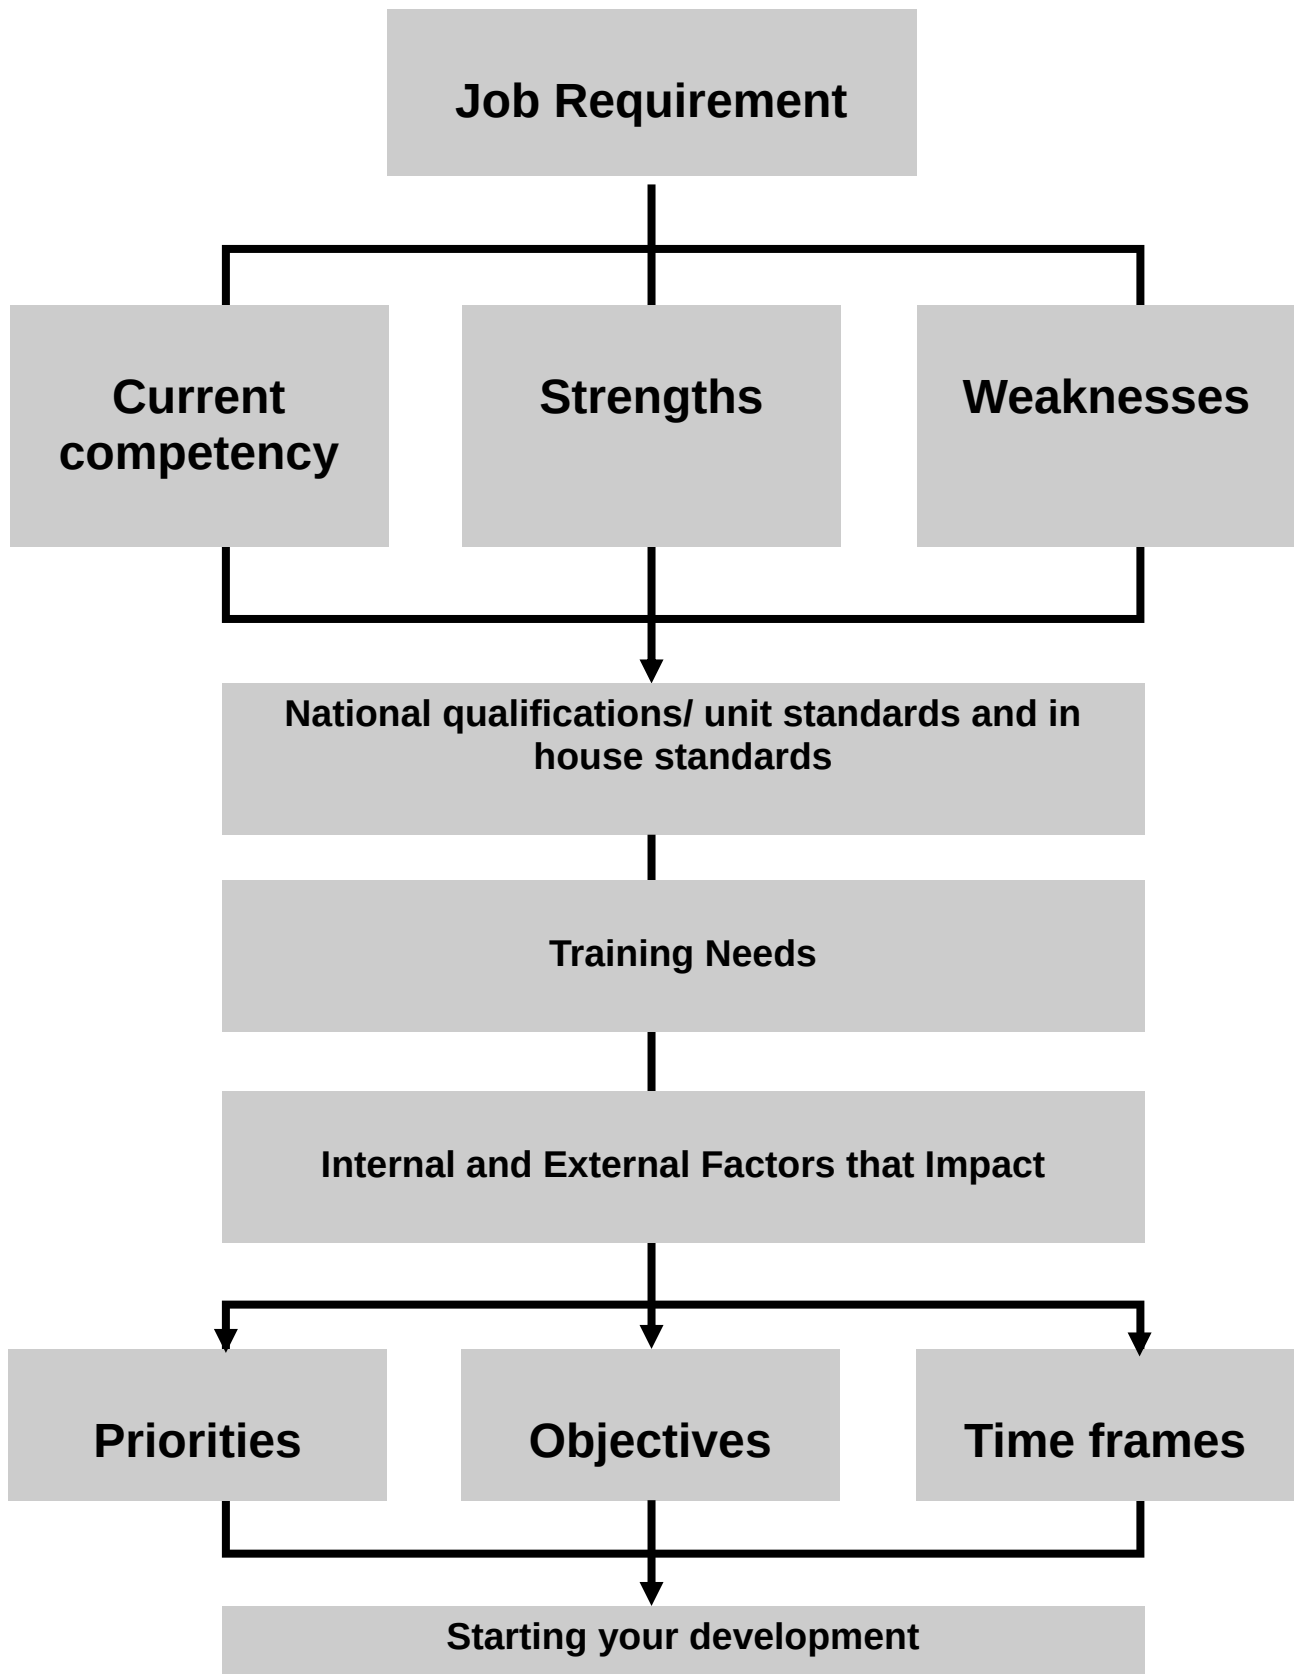

There are four choices when you are dissatisfied:

- ♦ put up with things
- ♦ leave
- ♦ get others to change
- ♦ change yourself

Guidelines: Having diagnosed yourself, and choosing to change yourself through self-development, consider the following guidelines:

- ♦ Write down your goal, in a measurable form if you can, and give yourself a **deadline**.
- ♦ Armed with some goals, set about designing yourself a learning programme and finding the appropriate **resources**. This depends on what you want to learn.
- ♦ Learning is a social affair – you need feedback, encouragement and the help of friends to pinpoint your goals, devise your learning programmes and to keep you going. Encourage this support.
- ♦ Commit to keep on with your learning programme. “Stickability” and perseverance – whatever you choose to call it.
- ♦ Assess yourself against your goals. How well are you doing? If you set lots of learning sub-goals, then these make good points at which to test yourself. This point takes you back to the first. Testing yourself leaves you feeling satisfied – in which case you stop learning – or dissatisfied, in which case you carry on, heading for the next target.

5. The development plan

5.1 Steps to preparing a development plan

Your personal development plan will identify the following:

STEP 1:

Your long-term career goal.

STEP 2:

The career stops along the way that you will have to make in order to get there. It is often best to do this backwards.

EXAMPLE:

If you want to be a General Manager.....

- ♦ What position should you hold before you become a GM, and for how long?
- ♦ What position should you hold before that, and for how long?
- ♦ What position should you hold before that, and for how long?

And you keep asking that question until you end up at the job you are in now. That will give you your **time line**.

STEP 3:

You then need to identify what skills and qualifications you would need to achieve in each position.

EXAMPLE:

If you want to be a General Manager.....

- ♦ What skills do you need to have to be truly effective in your current job?
- ♦ Then what skills and qualifications will you need in order to be considered for promotion into the next job.
- ♦ What will you need to be able to do in order to be truly competent in that job?
- ♦ Then what skills and knowledge do you need to have in order to be considered for your next promotion?

And so on, until you get to what you need to know and do in order to be promoted into your final career goal.

STEP 4:

- ♦ Who needs to know what you want to achieve?
- ♦ Who can help you to get the skills and knowledge you need at each step along the way?
- ♦ Who will make it possible for you to get the training and education you need?
- ♦ Who can help you to achieve your first promotion, and how can you obtain their support?
- ♦ Can you identify a mentor who will take you through your career development on a long-term basis?
- ♦ How will you get this person's support and long-term commitment?

5.2 Factors

The following factors might impact on your development plan:

- ♦ Company restructuring might have either a positive or a negative impact on what you want to achieve. Keep your eye out for opportunities and take advantage of them. Also be aware of threats and take appropriate action. The worst thing you can do is sit around and wait for someone else to take charge of your career. The best person to manage your career is you, because you are the only person who really cares about it!
- ♦ New developments in the organisation may provide you with opportunities to make faster progress than you might have anticipated. Make sure that you stay aware of these developments, and make applications for jobs that move you along your career path.
- ♦ Support from managers in the company: It is important that you make a concerted effort to win the support of key people who can help you achieve what you want to achieve. You do this by finding ways to add value – provide support and information to these people, and never underestimate your ability add value to someone else's work.
- ♦ New training opportunities might speed up your progress, so join professional organisations aligned to your career path so that you can get their publications and newsletters.

6. Reviewing performance and obtaining feedback**DEFINITION**

It is the constructive and systematic review of performance improvement and competence development over a specific period of time. It is a review of the evaluation process as well as the individual's performance.

6.1 Importance

IMPORTANT

The importance of feedback is ultimately to ensure that:

- ◆ Reinforcement of good performance.
- ◆ Areas of weakness can be highlighted positively in order to encourage and stimulate improvement.
- ◆ Feedback allows an opportunity to discuss performance detractors and possible solutions.
- ◆ Feedback can inform future follow up and/or remedial steps to be taken.

6.2 Procedures

There are certain procedures to follow when reviewing progress and performance. Taking the staff member's development plan into consideration:

- ◆ Review the staff member's, competencies performance in the workplace from start of development plan to date on the job. By determining if there is an improvement.

EXAMPLE:

Marked improvement slight improvement or no improvement

- ◆ Determine the progress against what had been agreed upon at the time of designing the development plan.

EXAMPLE:

Have the goals, objectives been met.

- ◆ Determine whether these performances and progress are being obtained timeously in keeping with the development plan.
- ◆ Document all findings in preparation to give feedback at the review.

7. Giving feedback

7.1 Reasons

Why Does Management Give Feedback?

- ♦ To comment on your own performance and identify gaps.
- ♦ To know how you are doing against the standards.
- ♦ It gives the opportunity to deal with performance problems.
- ♦ Creates an opportunity to come up with own solution.
- ♦ It creates an opportunity to change something negative into something positive.
- ♦ Builds confidence.

7.2 Guidelines

Consider the following guidelines when giving feedback:

- ♦ Performance feedback is a two-way discussion between the participant and the manager.
- ♦ Feedback should be open and honest. Discussion of important, negative or sensitive areas should **not** be avoided.
- ♦ Feedback, whether positive or negative, should be constructive.
- ♦ Feedback should lead to an action plan, the results of which will be reviewed and follow up feedback given.
- ♦ Feedback should be specific, clear and consist of concrete examples.
- ♦ All further dates and action plans need to be documented in order to review progress effectively at the next review.
- ♦ Your managers and colleagues are also extremely useful because they can give you good feedback. They will give you feedback on your performance, and will also make suggestions on how you might improve. You need to be open to feedback and handle it in a mature, growth-oriented manner.

8. Responding to feedback

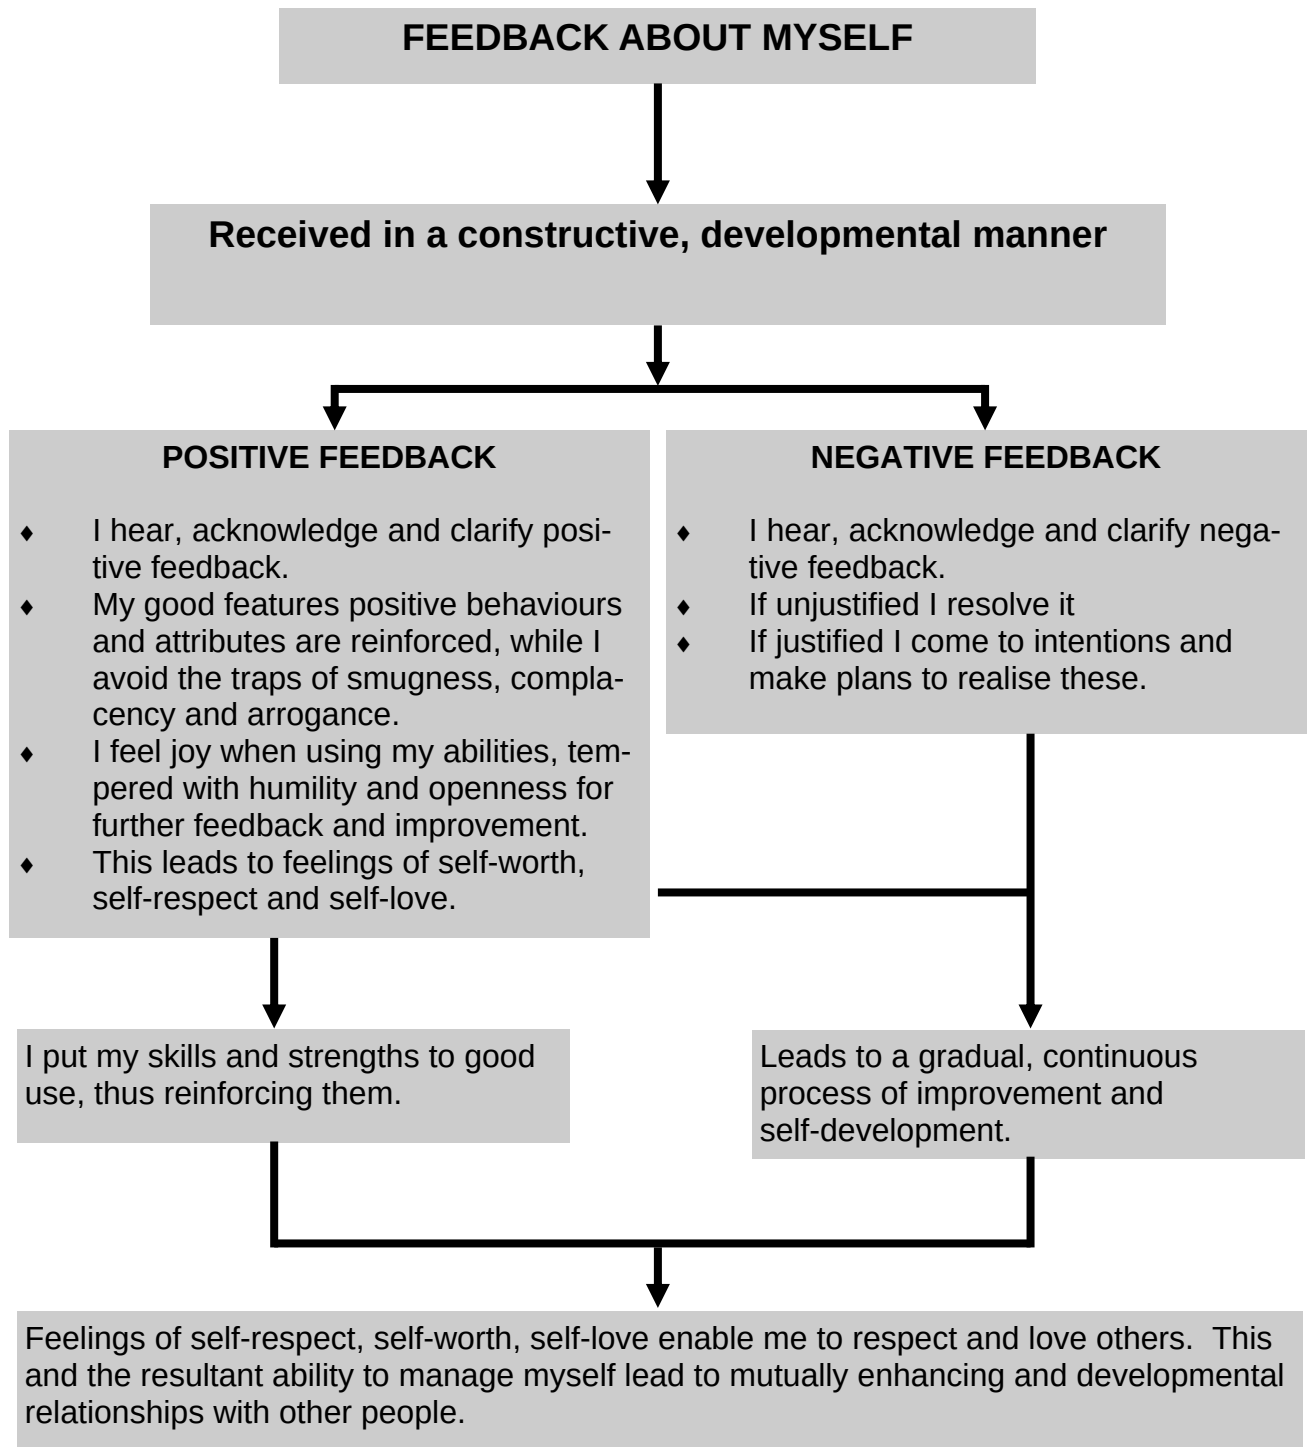

8.1 Guidelines

When you are given feedback by either a manager or a colleague, consider the following:

- ♦ Listen. Listen. Listen.
- ♦ Ask questions to ensure that you understand the true meaning of the feedback.
- ♦ **Don't argue** – you need this feedback in order to grown and improve in your work. If you argue with people who give you feedback you will lose their support.
- ♦ Thank them for their feedback.
- ♦ Ask them how they think you might improve. Add suggestions of your own and ask their opinions on this. Come to some kind of conclusion about what you will do in future, or what action you will take.
- ♦ Thank them for being sufficiently interested in you and your work to take the time and trouble to give you feedback. way back down”.

- ♦ People skills are critical to the advancement of your career. Without the support of key colleagues and managers, and the support of your subordinates, you will not be able to achieve your career aspirations.
- ♦ There is a popular saying that goes: “Be careful who you walk over on your way up the ladder, because you may meet them on your way back down”.

The flow chart below outlines receiving feedback about oneself in a constructive, developmental manner:

[illegible]

STUDY UNIT 2

Role within an organization

LEARNING OUTCOMES

On completion of this study unit the student will....

- ♦ Define an organogram.
- ♦ Distinguish between the different types organograms.
- ♦ Identify a specific position within an organization on an organizational chart.
- ♦ Define and explain roles and responsibilities within an organizational organogram.
- ♦ Identify the expectation of an organization based on a functional position.
- ♦ Monitor performance of individuals within an organization.
- ♦ Define company values, and ethics.
- ♦ Explain the impact of an code of ethics on the decision made by employees.

1. Organogram

An organizational chart (often called organization chart or organogram (me) or organogram (me)) is a diagram that shows the structure of an organization and the relationships and relative ranks of its parts and positions/jobs. The term is also used for similar diagrams, for example ones showing the different elements of a field of knowledge or a group of languages.

An organizational chart of a company usually shows the managers and sub-workers who make up an organization. It also shows the relationships between the organization's staff members which can be one of the following:

- ♦ **Line:** Direct relationship between superior and subordinate.
- ♦ **Lateral:** Relationship between different departments on the same hierarchical level.
- ♦ **Staff:** Relationship between a managerial assistant and other areas. The assistant will be able to offer advice to a line manager. However, they have no authority over the line manager actions.
- ♦ **Functional:** Relationships between specialist positions and other areas. The specialist will normally have authority to insist that a line manager implements any of their instructions.

In many large companies the organization chart can be large and incredibly complicated and is therefore sometimes dissected into smaller charts for each individual department within the organization.

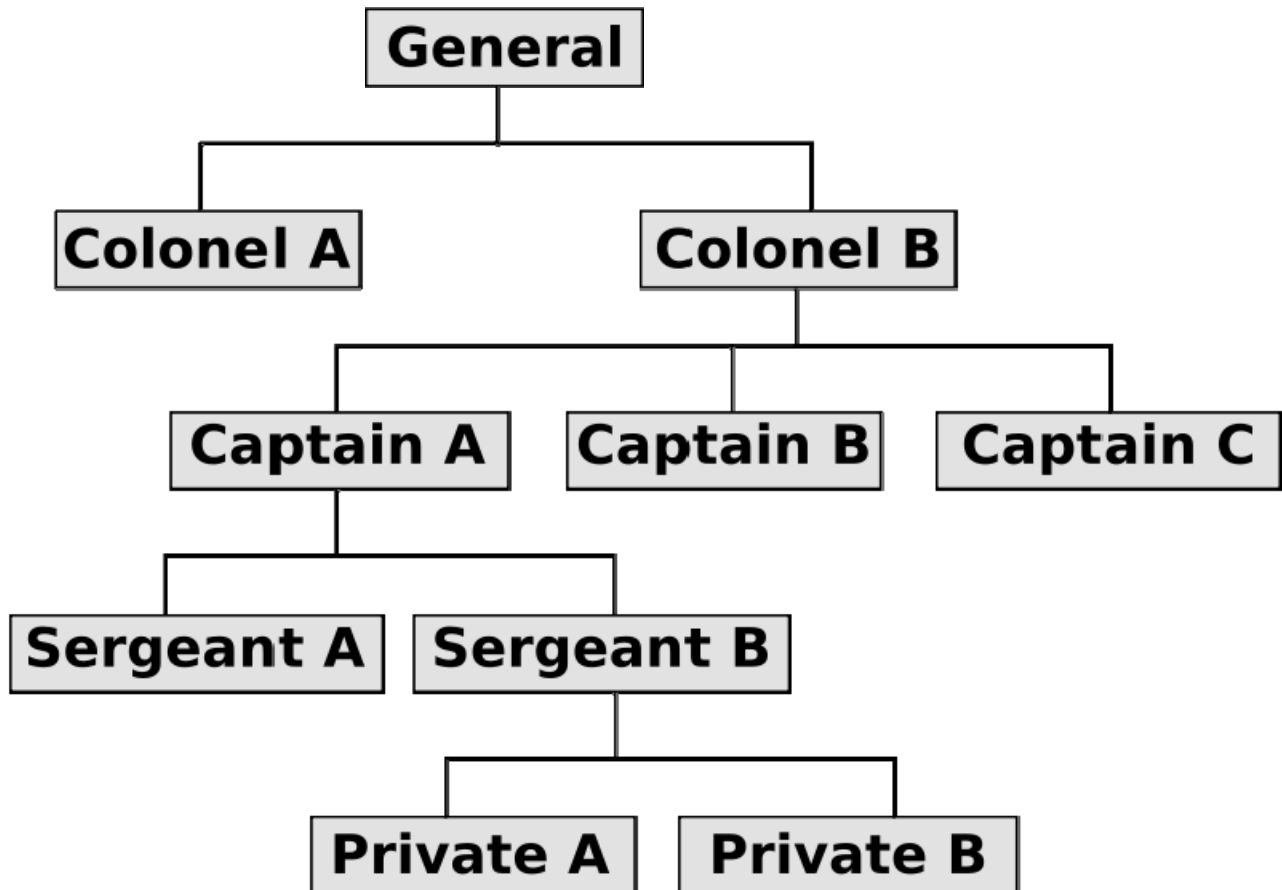

2. Different types of organization charts

There are three different types of organization charts:

- ♦ Hierarchical
- ♦ Matrix
- ♦ Flat

EXAMPLE:

The following is an example of a simple hierarchical organizational chart:

- ♦ An example of a line relationship in this chart would be between the general and the two colonels. These two colonels are directly responsible to the general.
- ♦ An example of a lateral relationship in this chart would be between "Sergeant A", and "Sergeant B" who both work on level and both report to the "Captain A".

3. Roles and responsibilities

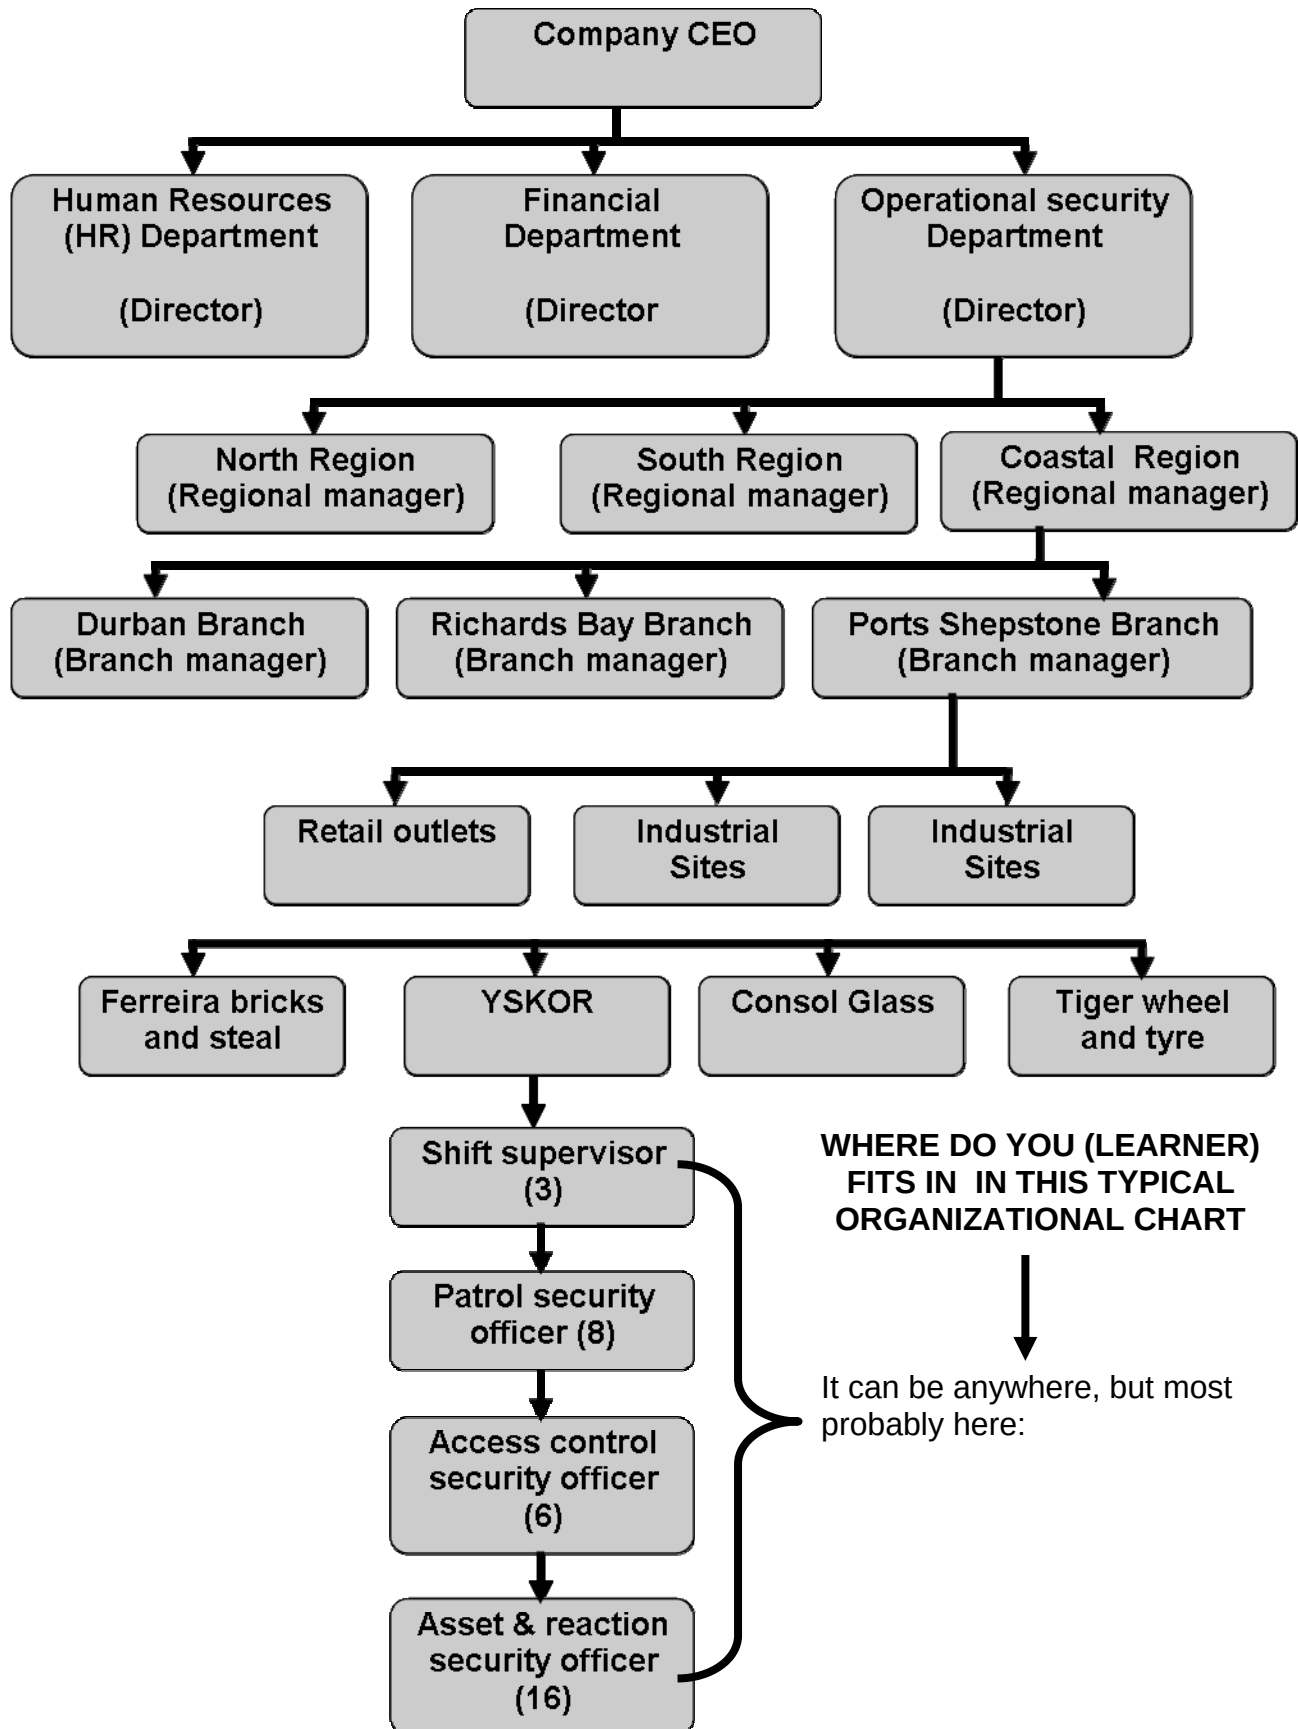

It is important that staff is clear on what their duties and tasks include. Every person must know precisely what his duties and responsibilities are and s/he must have sufficient authority to do his/her job. Staff will acquire more self-confidence in performing their tasks if they know exactly what to do. They can also be held accountable for delivery

This includes having an up-to-date list of duties available for each of your employees. So that you:

- ◆ Allocate the right tasks to the right people.
- ◆ Can get the acceptance and agreement from the people who have to do the work
- ◆ Can build an effective team that supports the results to be achieved.
- ◆ Ensure work is not duplicated

- ◆ Identify what the staff member has to do and what is expected of him/her. Clearly outline areas of responsibility (from the job description).
- ◆ Inform staff to what level they can make decisions.
- ◆ Ensure that the job is seen to be both interesting and worthwhile.
- ◆ S/he must also know what his/her relation to the other workers is and to what degree co-operation and interaction can take place.

4. Interpreting a company organogram

5. Expectations

Here are a few suggestions to help you establish and enforce the boundaries of the employer/employee relationship at a typical site.

- ♦ **Define the relationship and job position:** The employer/employee relationship should be well-defined from the outset and the parameters understood by all parties. Some call it "defining the pecking order" or "establishing the food chain." Whatever colorful term you use it all boils down to this: You can be their boss or you can be their buddy. You can not be both.
- ♦ **Establish and adhere to company policies and workplace procedures:** It's a good idea to have published policies concerning every aspect of the site, including employee behavior and performance expectations. By its very nature the employer/employee relationship is prone to favoritism. Managers can't help but favor those employees who work harder, longer, and faster, but when it comes to adhering to company policies and procedures, there should be no preferential treatment of favored employees. Every employee/site should receive a copy of the company policies and procedure. It should state that they have read, understand, and agree with it. It should also be signed by each employee.
- ♦ **The Bottom Line:** Treat everyone the same. It does not matter if the employee is a vice president or a janitor; everyone in the company should be treated the same when it comes to adhering to company policies and performance expectations.
- ♦ **It's not personal, it's just business:** This is what the movie bad guys say to one another right before the shooting starts. "Hey, Paulie, it's not personal. It's just business." BANG!! BANG!! This is the dating equivalent of saying, "It's not you, it's me." These kinds of statements are not going to make anyone feel better when they are getting dumped or fired.

5.1 Learners expectations

It is expected from a learner to adhere to all the principles of the learning units when going through training and development. Each of the programs as outlined on page 10 of this learner guide is based on national standards.

These standards have been set by the security industry and forms the bases of the minimum of standards that any security officer needs to comply with before he/she can perform the functions of.....

- ♦ A Patrol security officer
- ♦ Access control officer
- ♦ Asset reaction officer.

5.2 Monitor performance

Every learner will have to undergo a Summative assessment. The completion of the learner workbook will ensure long term application and understanding of the required standard.

Thereafter employees can measure the performance of each learner by comparing their current work standard with the required standard as set out in the respected Unit Standard. This can be done first doing a complete gap analyses together with a needs analyses.

Unit standard 13912: Apply knowledge of self and team in order to develop a plan to enhance team performance.

6. Communicating work objectives and standards of performance

6.1 Explain objectives and performance standards

- ♦ **Any task to be performed must meet certain predetermined requirements:** The supervisor must explicitly explain to staff what quality and quantity of work will be expected of them. Standards have to be preconceived in order for staff to work in the direction indicated by the standards.
- ♦ **State the work objectives and standards of performance clearly on the basis of your planning:** If there is clear communication it will help ensure that tasks will be performed correctly and that no time and manpower is wasted. Avoid unnecessary information, difficult words and long explanations.
- ♦ **Emphasize key elements:** To ensure that the work objectives and activities have been received and understood, you can ask for staff to repeat the assignment in the manner s/he understood it. You must assume ownership of any potential misunderstandings by saying that you only want to ensure you gave the assignment clearly and never left anything out. You can ask questions relating to the essence of the assignment to determine whether the instructions were received correctly.

7. Workflow Process

An effective workflow process positively influences productivity and minimizes costs so it is important to assess the workflow at regular intervals

7.1 Factors in measuring workflow process

The process owner (the person responsible for ensuring the total process is both effective and efficient) must gather information regarding the process under his/her control. Factors to consider in the measurement of the workflow process are the following:

- ♦ What measurements are in place to set targets and to improve process effectiveness, efficiency and adaptability?
- ♦ What are the overall goals of the process?
- ♦ What are the boundaries and scope of the process?
- ♦ What are the critical success factors and key dependencies of the process?
- ♦ Does the process have any sub-processes and who are their owners?
- ♦ Have you got process qualification issues that are being monitored and what process benchmarking activities are in place?
- ♦ Are any process changes made or to be made soon?
- ♦ What contact is there between the Process Owner and the customers of the process?

8. Company values

8.1 Values in Business:

- ♦ Values release energy because they motivate people.
- ♦ Values motivate people to work together collectively.
- ♦ Values are like ever-receding or never-ending goals. The higher the values, the more the energy and effort required to achieve and sustain them. The more you pursue them, the greater the energy they release and put into action.
- ♦ Quality of performance on every job, every activity, and every act can be accurately assessed in terms of values.
- ♦ Companies which rated their implementation of key corporate values the highest also reported the highest levels of revenue growth and profitability in their respective industries.
- ♦ Improving corporate performance on a single value can virtually transform the way a company functions.
- ♦ Values are the most powerful way to release and harness the company's latent, unutilized energies for growth.

DEFINITION

A value is a belief, a mission, or a philosophy that is really meaningful to the company. Every company has one or more values, whether they are consciously aware of it or not. Another way of saying it is that a value is a statement of the company's intention and commitment to achieve a high level of performance on a specific QUALITATIVE factor.

EXAMPLE:

An example of a business value is:

- ♦ "Customer Satisfaction."
- ♦ "Being Ethical and Truthful."

EXAMPLE:**COMMITTED:****... to our customers**

We work with our customers to help them succeed. We are determined to deliver on our commitments, reliably every time. We enable change that delivers real business benefit.

... as individuals

I go the extra mile. I do what I promise. I am responsive to my customers and my team. I set high goals and deliver against them.

... to EXCO E

We are ambitious for our company. We are confident in the EXCO E team - a high quality, and truly professional, services team.

INNOVATIVE:**... for our customers**

We provide our customers with intelligent, creative answers to release their potential. We bring them the best people and technologies from around the world to deliver something special.

... as individuals

I enjoy learning. I use my initiative. I am creative in finding new ways to do things. I am happy to embrace change so that I can do the best for our customers and for EXCO E

as EXCO E

We create new possibilities for the future. We keep ahead of the game. We share and build upon each others' knowledge.

EXAMPLE:**OPEN:****... towards our customers**

We work with our customers in an open and collaborative way. We react flexibly to their changing needs. We are culturally close to our customers. We really understand their business and the markets in which they operate.

... as individuals

I willingly seek and offer help. I trust my colleagues and consider their needs. I openly share information and seek best practice. I happily work with people from across EXCO E to provide the best to our customers. I act with integrity at all times.

... inside EXCO E

We provide a professional working environment where talented people develop and prosper. We communicate openly and value team spirit. We are confident to speak out. We are collaborative - working together across borders to deliver for our customers.

9. Code of Ethics**PURPOSE**

The purpose of the Code of Ethics is to provide guidance for ethical decision-making and reflects the COMPANY commitment to the highest ethical standards.

The values and principles espoused in this Code should be read with those encapsulated in the policies and procedures, aspirational guidelines and relevant legislation.

DEFINITION

Ethics can be defined as written and unwritten codes of principles and values that govern decisions and actions within a company.

In the business world, the organization's culture sets standards for determining the difference between good and bad decision making and behavior.

In the most basic terms, a definition for business ethics boils down to knowing the difference between right and wrong and choosing to do what is right. The phrase 'business ethics' can be used to describe the actions of individuals within an organization, as well as the organization as a whole.

10. The effect on decision making

When the code position agrees with that held by the manager, it merely reinforces practices that should already be followed. Although it is impractical to ensure that a code of ethics includes no statements that express positions held by the senior manager, many such statements express commonly held ethical positions, such as being honest and obeying the law. Statements in a code of ethics that restate commonly held positions are unlikely to influence decisions.

Such statements will have no impact on the action chosen, though they may serve other purposes, such as reinforcing common values.

EXAMPLE:

For example, a statement that senior officers are expected to comply with applicable policies and procedures establishes a position that the company's senior officer hopefully would already hold.

If so, expressing such a position within a code can have no impact on decisions made by the senior officer because, even in the absence of the statement, this is the existing position.

This image shows a blank sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

STUDY UNIT 3

Dealing with conflict

LEARNING OUTCOMES

On completion of this study unit the student will....

- ♦ Define conflict.
- ♦ Demonstrate knowledge of the common causes of conflict in the workplace.
- ♦ Distinguish between the concepts of competition and conflict.
- ♦ Demonstrate knowledge and skills to identify the various signs of conflict.
- ♦ Identify different types of conflict.
- ♦ Demonstrate knowledge and skills to identify the stages of conflict.
- ♦ Explain the responses of people to conflict.
- ♦ Explain behaviour which can help managing conflict.
- ♦ Apply the correct steps to handle conflict by hand of a workplace scenario.

1. Definition

Conflict may be defined as a struggle or contest between people with opposing needs, ideas, beliefs, values, or goals. Conflict on teams is inevitable; however, the results of conflict are not predetermined. Conflict might escalate and lead to nonproductive results, or conflict can be beneficially resolved and lead to quality final products.

Therefore, learning to manage conflict is integral to a high-performance team. Although very few people go looking for conflict, more often than not, conflict results because of miscommunication between people with regard to their needs, ideas, beliefs, goals, or values. Conflict management is the principle that all conflicts cannot necessarily be resolved, but learning how to manage conflicts can decrease the odds of nonproductive escalation. Conflict management involves acquiring skills related to conflict resolution, self-awareness about conflict modes, conflict communication skills, and establishing a structure for management of conflict in your environment.

2. Causes of conflict

Conflict starts because people do not agree about an issue. Issues of disagreement in recent large-scale conflicts include territory, language, religion, natural resources, ethnicity or race, migration and political power. Sometimes there is more than one issue of disagreement.

While a conflict starts because of an issue of disagreement, there are usually background influences that fuel the conflict. The most important influence is power. Others include culture, identity and rights.

2.1 Common causes of conflict

Causes or sources of organizational conflict can be many and varied. The most common causes are the following:

- ◆ Scarcity of resources (finance, equipment, facilities, etc)
- ◆ Different attitudes, values or perceptions
- ◆ Disagreements about needs, goals, priorities and interests
- ◆ Poor communication
- ◆ Poor or inadequate organizational structure
- ◆ Lack of teamwork
- ◆ Lack of clarity in roles and responsibilities

3. Identify signs of conflict

Especially in the workplace, two main types of disputes have been noted (although these two types may also happen in other situations). These are:

- **"disputes of right"**, where people or groups are entitled by law, by contract, by previous agreement or by established practice to certain rights. Disputes of right will focus on conflict issues such as employment contracts, legally enforceable matters or unilateral changes in accepted or customary practices. A dispute of rights is, therefore, usually settled by legal decision or arbitration and not by negotiation.
- **"disputes of interest"**, where the conflict may be a matter of opinion, such as where a person or group is entitled to some resources or privileges (such as access to property, better working conditions, etc). Because there is no established law or right, a dispute of interest will usually be solved through collective bargaining or negotiation.

3.1 Signs of conflict between individuals

In the organisation leaders and members should be alert to signs of conflict between colleagues, so that they can be proactive in reducing or resolving the conflict by getting to the root of the issue. Typical signs may include:

- ♦ Colleagues not speaking to each other or ignoring each other.
- ♦ Contradicting and bad-mouthing one another.
- ♦ Deliberately undermining or not co-operating with each other, to the downfall of the team.

3.2 Signs of conflict between groups of people

Similarly, leaders and members can identify latent conflict between groups of people in the organisation or the community and plan action before the conflict becomes open and destructive:

- ♦ Cliques or factions meeting to discuss issues separately, when they affect the whole organisation.
- ♦ One group being left out of organising an event which should include everybody.
- ♦ Groups using threatening slogans or symbols to show that their group is right and the others are wrong.

4. The differences between "competition" and "conflict"

"Competition" usually brings out the best in people, as they strive to be top in their field, whether in sport, community affairs, politics or work. In fact, fair and friendly competition often leads to new sporting achievements, scientific inventions or outstanding effort in solving a community problem. When competition becomes unfriendly or bitter, though, conflict can begin - and this can bring out the worst in people.

5. Types of conflict

The handling of conflict requires awareness of its various developmental stages. If leaders in the situation can identify the conflict issue and how far it has developed, they can sometimes solve it before it becomes much more serious. Typical stages include:

- ♦ **Where potential for conflict exists:** In other words where people recognize that lack of resources, diversity of language or culture may possible result in conflict if people are not sensitive to the diversity.
- ♦ **Latent conflict where a competitive situation could easily spill over into conflict:** At a political rally or in the workplace where there are obvious differences between groups of people.
- ♦ **Open conflict:** Which can be triggered by an incident and suddenly become real conflict.
- ♦ **Aftermath conflict:** The situation where a particular problem may have been resolved but the potential for conflict still exists. In fact the potential may be even greater than before, if one person or group perceives itself as being involved in a win-loose situation.

6. Stages of conflict

1.

Pre-conflict

DIFFERENCES: Discussions and differences can be healthy and productive if met with tolerance.

TENSIONS: Views become fixed and people begin to criticize their opponents and view them as the enemy. Differences between the groups get worse. The groups become more divided.

TAKE NOTE

When differences develop into tensions there are unlikely to be any short-cuts to an agreement. Once the crisis point is reached, there are no quick solutions.

2.

Confrontation

DISPUTES: Neither side will admit that they have made mistakes. They become determined. More extreme positions are taken. Threats are made but not carried out. Supporters may engage in demonstrations or other confrontational behaviour.

3.**Crisis**

Peak of conflict with open hostility and/or violence. Communication between sides often stops.

HOSTILITIES: People become convinced that their views are right. Opponents are mocked, scorned and isolated. Some threats are carried out.

VIOLENCE: 'No way back'. 'They must lose'. Force is used, perhaps physical violence.

4.**Outcome**

Force may run its course until one party 'wins', another surrenders, a cease-fire is agreed, or all are exhausted. Outsiders may intervene with force to bring violence to a halt.

5.**Post-conflict**

End of violent confrontation:

When one side 'wins', it may not lead to positive change. It may create new injustices which could result in confrontation (Stage 2) once again.

6.**Communication channels opened**

Both sides agree that a solution is needed. Outsiders may help both sides to communicate. Ways to move forward are established.

7.**Mutual understanding**

People come to understand views of others and respect them. The conflicts described (sometimes mapped) to help find possible solutions.

8.**Finding solutions**

An approach is found that every-one agrees on, whether this uses the law, customary methods or partnership. Solutions are agreed and acted upon.

8.**Agreement**

Everyone agrees. They may agree to keep different views but always accept the views of others. It may be helpful to have a written and signed agreement for future reference.

REMEMBER

Opposing groups must open up channels of communication and work upwards to reach full agreement.

7. Resolution strategies to solve conflicts

The Alternative Resolution Strategies can be presented on a continuum from:

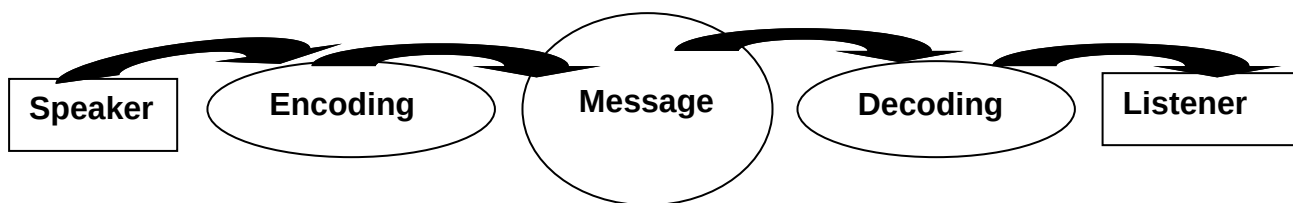

- ♦ The very early stages of a conflict till the violence outburst,
- ♦ More control over the outcomes till lose of control,
- ♦ More sustainable solution till very unstable one,
- ♦ More satisfaction with the outcome till less satisfaction,
- ♦ Improved or at least not damaged relationships till broken relationships.

They are:

- ♦ Direct Communication
- ♦ Negotiation (structured communication)
- ♦ Mediation (facilitated negotiation)
- ♦ Facilitation of Problem-Solving processes

7.1 Direct Communication

A simplified model of inter-personal communication involves two people - the Speaker and the Listener, two processes: sending and receiving, and one message.

What can you do as Speakers, the message senders, to improve your communication skills?

- ♦ Know what you mean and express it clearly
- ♦ Resist the temptation to make personal attacks and accuse your opponents
- ♦ Use de-escalatory language, by replacing accusatory “you” statements with less provocative “I” statements. Such as “I feel as if I am not being understood” instead of “You are stupid if you do not understand me”.
- ♦ Try to express your true feelings and thoughts, through an Assertive behavior. What is Assertive behavior? The assertive behavior is placed on a continuum between submissive (non-assertive behavior) and aggressive behavior. People who behave submissively demonstrate a lack of respect for their own needs and rights. Aggressive persons express their feelings, needs and ideas at the expense of others. Assertive persons, while meeting own needs do not violate the needs of others. Most animals defend their space and their lives by fight (aggressiveness) or flight (submissiveness). Only humans have the third option of verbal confrontation through assertive messages.

What can you do as Listeners, the message receivers, to improve your communication skills?

- ♦ **Be a good listener.** Listening is more than merely hearing with your ears. As one little girl, looking up to her father, who was reading the newspaper, said: “Daddy, you have to listen to me with your eyes as well as your ears!” When listening look at the message meanings behind the words you hear, use your eyes to observe and understand the messages of the body gestures, the tone of the voice, the face expressions.
- ♦ **Apply active listening techniques:**
 - ⇒ *Basic acknowledgements* including verbal and non-verbal signs and sounds that let the speaker know you are listening with interest and respect
 - ⇒ *Attentive Silence* - keep silent even if it is difficult, but when you succeed to do it, usually you are able to find out more information from the speaker.
- ♦ **Questions:** Use open-ended questions that are preferable to close-ended questions, because they are providing opportunities for the speaker to open up.
- ♦ **Paraphrasing** is a tool that you may use to summarize, to clarify or to confirm if you, as listener, have understood correctly what was said. Paraphrasing is focused on the speaker’s content. *“Excuse me, but let me see if I understand what you are saying...”*
- ♦ **Mirroring** involves reflecting back to the speaker in succinct statements the emotions he/she is communicating.
- ♦ **Reflecting meanings:** Once you know how to reflect feelings and content separately it is relatively easy to put the two together into a statement that reflects the entire meaning.
- ♦ **Summative reflection** is a brief restatement of the main themes and feelings the speaker expressed over a longer period of discussions.

7.2 Negotiation (structured communication)

DEFINITION

Competitive negotiation is a process of win-lose bargaining with compromise or impasse as the likely outcomes.

DEFINITION

Collaborative negotiation is a win-win process where people constructively deal with their differences focusing on satisfying the needs of both sides.

IMPORTANT

What is important is that you understand the consequences of your strategic decision when answering the question: *Should I approach the negotiation in a competitive or collaborative way?* Research has shown that collaboration is leading to more collaboration and competition toward more competition

Using a collaborative strategy can look very simple, but in fact is very complex and difficult to master. Collaborative negotiation, or principled negotiation has as outcome a good agreement.

What is a good agreement? It is:

- ♦ **Wise:** satisfies the parties interests, in a fair and long lasting way
- ♦ **Efficient:** takes less time and effort to reach it
- ♦ **Improves:** or at least not damages, parties relationships

In order to reach a good agreement, the negotiation process should follow four principles:

- ♦ **Separate the people from the issues:** separate people's problems from substantive ones
- ♦ **Focus on interests rather than positions:** find the real problems under apparent solutions
- ♦ **Generate a variety of options** before settling an agreement: look at alternative solutions to the same problem
- ♦ **Insist that the agreement is based on objective criteria:** find objective criteria to take any decisions, from identifying the real and priority problems, till selecting the best solution

7.4 Problem solving processes

You can solve your problems peacefully through *facilitated* Problem solving processes, that *avoid the use of power and coercion*, and those involved, can identify the sources of conflicts and develop solutions to the satisfaction of all parties.

The facilitator role is very similar to the role of mediator. The facilitator focuses his/her attention on the following:

- ♦ **Improved communication:** The facilitator creates an environment that foster communication among parties, an atmosphere in which everyone feel free to express their points of view, their needs and their concerns, without offending the others.
- ♦ **Effective decision-making:** The facilitator helps parties take group decisions by assuring that everyone's ideas and concerns have been heard and that all can live with the decisions made.
- ♦ **Logic of problem solving:** The facilitator proposes and agrees with parties on the sequence of the steps to be taken toward achieving their goal, and monitors the progress, maintaining the focus on the agreed agenda.

There are various models for problem-solving processes, depending on the types of relationships groups' and communities' members have in the moment of starting the process.

- ♦ There are communities and groups deeply divided by conflicts, many of them alongside ethnic boarder lines;
- ♦ There are communities and groups segmented by conflicting interests or goals that need to come together but do not have the tools to deliberate on their needs; and
- ♦ There are coherent groups and communities who have a sense of "we" and want to work together to solve common problems.

The process steps differ from one situation to other, more divided the community longer will be the process and more time will be devoted to building and improving relationships before focusing on substantive issues.

The general steps may include:

- ♦ **Improve relations:** Calm down, cool-off, stop arguing, name-calling, build a sense of "we have a problem"
- ♦ **Identify the real problem:** Search under symptoms and solutions for the real problem to be treated.
- ♦ **Think of solutions:** Generate as many options as possible, be creative and innovative, involve all stakeholders in your solutions.

- ♦ **Select best option:** Assess the solutions impact, advantages and disadvantages and chose the best solution.
- ♦ **Develop an implementation plan:** Identify actions, who is responsible, what resources do you need, when do you expect to finalize the action

8. Negative feelings before or during conflict

- ♦ Hurt
- ♦ Scared
- ♦ Frightened
- ♦ Ignored
- ♦ Confused
- ♦ Isolated
- ♦ Challenged
- ♦ Threatened
- ♦ Unwanted
- ♦ Disliked
- ♦ Put down
- ♦ Controlled
- ♦ Judgmental

9. Positive feelings after proper handling of conflict

- ♦ Cared for
- ♦ Confident
- ♦ Relieved
- ♦ Listened to
- ♦ Clear on things
- ♦ More intimate with others
- ♦ Challenged to grow
- ♦ Open to truth
- ♦ Accepted by others
- ♦ Respected
- ♦ Supported
- ♦ Understood
- ♦ Accepting of differences

10. Behaviors which help in managing conflict

- ♦ **Use "I" statements:** Let the other party know how you feel when the conflict is occurring. Let the other person know how you react to the conflict. Let the other person know which of your rights you feel is being ignored in the conflict.
- ♦ **Be assertive, not aggressive:** Speak about your feelings and your reactions. Keep the statements focused on how you are behaving, thinking, and feeling rather than on how the other is acting.

- ♦ **Speak calmly, coolly and rationally:** In this way you will be listened to, and you will be able to maintain better control of yourself. Otherwise the other person may be put in a defensive attitude.
- ♦ **Avoid blaming:** This will keep the communication flow going. It encourages understanding and empathy for each other's feelings. It recognizes that for a conflict to exist there must be at least two parties who are adversely affected by the conflict.
- ♦ **Create an atmosphere of healing:** In an attempt to heal the wounds resulting from a conflict, all parties involved must feel that they are being listened to and understood; that their rights are being respected. They must feel the desire to work things out and a commitment to the process of working out the problems. They must feel wanted and cared for by the parties involved.
- ♦ **Be willing to forgive:** Forgiveness is a powerful tool of healing. You have a chance for personal growth by forgiving others for their part in the hurt and pain you suffered. At times, this is the only way to resolve a conflict.
- ♦ **Be willing to forget:** Once you have "resolved" a conflict and felt like you were listened to, cared for, and understood, then "let go" of the conflict. Once you have implemented an agreed resolution, put aside the conflict. Put it behind you. Get it out of your mind. Forget it. Don't bring it up in the future as if it had not been resolved. If you write down the resolution of the conflict, you will have written proof that it is over and is to be forgotten.
- ♦ **Be honest:** In resolving a conflict it is imperative that you be honest with yourself and others about your feelings, and reactions to the conflict and to the resolutions. If you are feeling in a way you think you must, or in a way the others wants you to, not "being yourself," then the resolution of the conflict is a false one. The conflict is sure to recur. You gain nothing by being dishonest in the management of conflict. You waste your time and energy and end up feeling failure or guilt rather than growth.
- ♦ **Focus on feelings rather than on content:** Effective listening and responding are key elements in the productive resolution of conflict. Listen for the feelings and emotions of the other and reflect them with empathy and understanding. This creates an atmosphere of being cared for and listened to. It reduces defensiveness. It focuses on the process involved rather than on the issues, and it brings the parties to a clearer recognition of their individuality and humanity. To focus on feelings clarify the issues, eliminating extraneous items.
- ♦ **Show respect for yourself and for others:** You will gain more in resolving a conflict by showing respect (honey), than by showing disrespect (vinegar), e.g., being vindictive, taking revenge, threatening, yelling, accusing, belittling, ostracizing, ignoring. If you are on the receiving end of disrespect, remove yourself as soon as possible. When the other has cooled down, perhaps the discussion can be continued in a respectful manner. If you lose your "cool" and become disrespectful, stop as soon as you can by either removing yourself or by silencing yourself. Maintaining a respectful atmosphere is essential in resolving conflict.

- ♦ **Be willing to apologize or admit a mistake:** It is necessary to admit to one's mistake and to apologize for one's behavior before a stalemate in conflict resolution can be overcome. It takes courage, character, and fortitude to admit an error: a lack of judgment; an uncalled for action; disrespectful behavior; or a lack of caring, concern, or understanding. Stronger relationships can result when such willingness is exhibited.
- ♦ **Be willing to compromise:** If you cling to your position as the only one to be considered, you are closing out the other person(s). To succeed in resolving conflict, all parties must feel like they have gained in the resolution. In order to resolve a conflict where the opposing parties are at opposite extremes on an issue, there is a need to come to the middle if all are to experience a "winning" posture. Only through compromise can each be a winner in conflict resolution. Without compromise, you have either given in and lost, or have gotten your own way with the other party having lost. Ideally, all parties should feel that they have won.

11. Steps that can be taken to handle conflict

Step 1: Clarify that conflict exists. If you sense a conflict, answer the following questions in your pocket book:

- ♦ What is the content (or issues) involved in the conflict?
- ♦ For whom is this a conflict?
- ♦ When does the conflict manifest itself? For how long?
- ♦ Under what circumstances is this a conflict?
- ♦ What are the hidden issues, those below the surface, in this conflict?
- ♦ Why is this a conflict?
- ♦ What is the worst possible consequence if this conflict is:
 - ⇒ never addressed?
 - ⇒ addressed and not resolved?
 - ⇒ addressed and I give in?
 - ⇒ addressed and the other gives in?
 - ⇒ addressed and we both win?
- ♦ What are my feelings when facing this conflict?
- ♦ How does this conflict fit into my belief system about myself?
- ♦ What does this conflict say about the personality of the people involved?
- ♦ What is the conflict, really?

Step 2: Summarize the answers to the questions in Step 1 into a clear, detailed description of the conflict with its variables.

Step 3: Begin to problem solve in your mind. Write out alternative resolutions to the conflict.

Step 4: Narrow down the alternatives until you come to the top priority resolution in your mind. Write it in your pocket book and decide if the resolution:

- ♦ Respects the rights of all parties.
- ♦ Will ultimately have all parties feeling like winners.
- ♦ Will allow a healing process to begin, with no one being blamed.
- ♦ Provides for finality of the conflict with no recurrence.
- ♦ Will result in better understanding by all parties with all feelings being respected.

Step 5: Once you have completed Steps 3 and 4 on your own, you are ready to speak directly with the those with whom you are in conflict. Ask the person (s) to consider the script (i.e., written document) concerning the conflict. Go over all points on the conflict (Steps 1 and 2), possible resolutions to the conflict (Step 3), and analyze how the top priority resolutions are beneficial to all parties involved (Step 4).

Ask the party (s) if they have done a similar exercise in conflict management on their own; if not, would they like time to try Steps 1 through 4?

Step 6: All parties closely examine the top resolutions (Steps 3 and 4). Jointly analyze the options based on the questions in Step 4. Spend time discussing them, then use a joint problem solving

Step 7: Once a jointly owned conflict resolution is decided upon, the parties set an implementation time and an evaluation procedure to determine if the resolution is successful in averting similar conflict (s). They commit to implement the resolution and set a specific date to meet and review the resolution.

Step 8: If, during the subsequent meeting, it is determined that the conflict has gone unresolved, alter the resolution accordingly, continuing to consider all feelings.

TAKE NOTE

If you find yourselves at an impasse, return to Step 1 and begin again. Occasionally professional help or that of an objective outsider might be necessary.

If conflict can not be solved it is necessary to con tact your manager immediately for support.

STUDY UNIT 4

Group dynamics

LEARNING OUTCOMES

On completion of this study unit the student will....

- ♦ Define group dynamics
- ♦ Set goals for a group to improve performance.
- ♦ Develop a plan of action to achieve group goals
- ♦ Use a SWOT analyses to identify strengths, weaknesses , opportunities and threats within a group.
- ♦ Explain the importance of consultation.
- ♦ Explain the factors of effective planning in order to amend and monitor a plan.

DEFINITION

A group of people working in the same room, or even on a common project, does not necessarily invoke the group process. If the group is managed in a totally autocratic manner, there may be little opportunity for interaction relating to the work; if there is fractioning within the group, the process may never evolve. On the other hand, the group process may be utilized by normally distant individuals working on different projects.

1. Informal group dynamics**1.1 Group cohesiveness**

A characteristic of informal groups is group cohesiveness-the force that holds a group together. Group cohesiveness varies widely based on numerous factors-including.....

- ♦ size of the group
- ♦ dependence of members upon the group
- ♦ achievement of goals
- ♦ status of the group and
- ♦ management demands and pressures.

EXAMPLE:

For example group cohesiveness increases strongly whenever the membership perceives a threat from the outside. This threat produces the high anxiety that strong group cohesiveness can help reduce.

If the supervisor presses the group to conform to a new organizational norm that is viewed as a threat to the security needs of group members The group will become more unified in order to withstand the perceived threat. Thus management can limit its own effectiveness by helping to increase the group's cohesiveness. With the passing of the threat the group tends to lose its cohesiveness.

Perhaps paradoxically the most dangerous time for group cohesion is when things are going well. Supervisors can use the factors that affect group cohesiveness to increase their own effectiveness.

1.2 Unspoken rules

The final characteristic of informal groups is the establishment of the groups norms (values). As we discussed earlier, norms keep a group functioning as a system instead of a collection of individuals.

Norms are of great importance to the informal group in controlling behavior and measuring the performance of members. Because norm (values) violations threaten a group's existence, departures from the norm usually carry severe sanctions. The members must either conform or sever their group affiliation.

The latter action is unlikely, especially if the individual values group membership to satisfy certain needs.

Two points are important to note about the norms of informal groups.

- ♦ **First**, where both formal and informal norms exist, the informal norms transcend the formal. At moments when norms conflict with organizational objectives, organizational effectiveness suffers.
- ♦ **Second**, members of an informal group may be unaware that the norms of the group influence their behavior. Norms are particularly potent because without knowing it members would not even think of acting otherwise-norms are that ingrained into their behavior pattern.

2. SWOT Analysis

SWOT Analysis is a strategic planning method used to evaluate the Strengths, Weaknesses, Opportunities, and Threats involved in a project or in groups.

It involves specifying the objective of the group and identifying the internal and external factors that are favorable and unfavorable to achieving that objective.

2.1 Strategic Use: Orienting SWOTs to An Objective

If SWOT analysis does not start with defining a desired end state or objective, it runs the risk of being useless. A SWOT analysis may be incorporated into the strategic planning model.

- ♦ **Strengths**: attributes of the organization that are helpful to achieving the objective.
- ♦ **Weaknesses**: attributes of the organization that are harmful to achieving the objective.
- ♦ **Opportunities**: external conditions that are helpful to achieving the objective.
- ♦ **Threats**: external conditions which could do damage to the business's performance.

SWOT ANALYSIS

Identification of SWOTs is essential because subsequent steps in the process of planning for achievement of the selected objective may be derived from the SWOTs.

First, the decision makers have to determine whether the objective is attainable, given the SWOTs. If the objective is NOT attainable a different objective must be selected and the process repeated.

An SWOT analyses can be used to identify strengths of groups and individual members within the group.

SWOT analyses usually benefit from discussion, get other people's perspectives. Remember to be realistic and focused on what really happens.

In a SWOT analysis you want to note issues under the four headings. If you are new to the process the following questions may be helpful prompts to your thinking.

Strengths:

- ♦ What are your personal strengths?
- ♦ What does the company do well?
- ♦ What do you do well?
- ♦ What is the good track record?
- ♦ What do other people see as your strengths?
- ♦ Where does the organisation compete well?

Weaknesses:

- ♦ What can be developed
- ♦ What could you improve?
- ♦ What is working less optimally than you wish?
- ♦ What is being done badly?
- ♦ What is the competition doing better?
- ♦ What should you avoid doing?

Opportunities:

- ♦ If there were no constraints what would you like to do?
- ♦ What might be possible?
- ♦ What will happen in the next few years?
- ♦ Where do you / your organisation want to be in five years time?
- ♦ Who might you want to work with?
- ♦ What could be a win – win situation?
- ♦ How may new technologies change your practices?
- ♦ What financial / govenmental / legislative changes can benefit you in the near future?

Threats:

- ♦ What are the barriers to your development?
- ♦ What sort of obstacles do you face?
- ♦ Who else might move in a take over your tasks / job / business?
- ♦ What are rival organisations doing?
- ♦ Can you fund the short and long term?
- ♦ Will new technologies / developments change you roles?
- ♦ What change is coming?

3. Planning and organising**3.1 Range of Planning**

Planning is the process which is followed to think through what needs to be accomplished and how this will be done. Planning premeditates a course of action and requires reflection and analysis.

Alternatives need to be considered in order to make insightful, proactive decisions. Decisions are made in advance as to:

- ♦ what will be done,
- ♦ why it will be done,
- ♦ under what conditions it will be done,
- ♦ how it will be accomplished.

Planning facilitates the effective use of manpower, equipment, facilities and money.

Unit standard 13912: Apply knowledge of self and team in order to develop a plan to enhance team performance.

DEFINITION**Short Term:**

Short term planning is the planning of short range activities necessary to accomplish long term objectives. These types of objectives can be met almost immediately by implementing and making changes.

DEFINITION**Medium Term:**

Medium term planning is the transition between short and long term planning. Generally the results of short term planning is implemented to achieve medium term objectives. Medium term objectives allow you to prepare to meet long term objectives.

DEFINITION**Long Term:**

Long term planning involves looking ahead as far as possible in order to formulate end results. Once you know the long term objectives charting medium/short term planning becomes simplified.

4. Setting Objectives

An objective or goal directs all preceding activities or actions. A critical part of a supervisor's role is to set concrete goals and follow them up with periodic review and communication.

Goals should be:

- ♦ specific,
- ♦ clearly stated and
- ♦ measurable.

Goals that fulfill these criteria provide a source of feedback, accountability and evaluation. The ultimate goal of the department must be clearly defined as far as possible in measurable terms, e.g. the production cost per unit, the total units produced or sold, etc.

If an employee does not have a clear idea of the task at hand and does not receive feedback on the performance of it, s/he cannot be held accountable for it.

TAKE NOTE

It is important to note that it is sometimes critical and necessary to engage into consultation to set goals and making critical decisions.

5. SMART

Be smart about setting goals:

- ♦ **Specific:** Avoid being too general. Vagueness is the archenemy of productivity. The more precise the target, the greater the commitment to follow through.
- ♦ **Measurable:** This is stated in terms of results on the job, cost, quality, quantity and timeliness.
- ♦ **Acceptable:** goals should be jointly established. Although it is sometimes necessary for a supervisor to set specific goals and target dates him/herself, it is preferable that it must be agreed upon by both parties. When workers feel that they are actively participating in the setting of their own goals, they are much more solidly motivated to perform with distinction than when they feel that they are merely being told what to do.
- ♦ **Realistic:** goals that inspire quality performance are those, which are seen as difficult, and challenging, but attainable.
- ♦ **Timeous:** The date by which the objective will be accomplished. A well-defined deadline for when the project must be accomplished adds a sense of urgency.

6. The Planning process

Planning is a very important management function. To plan is to outline a course of action to achieve an intended result.

As Supervisors the most important role is to get results through and with people.

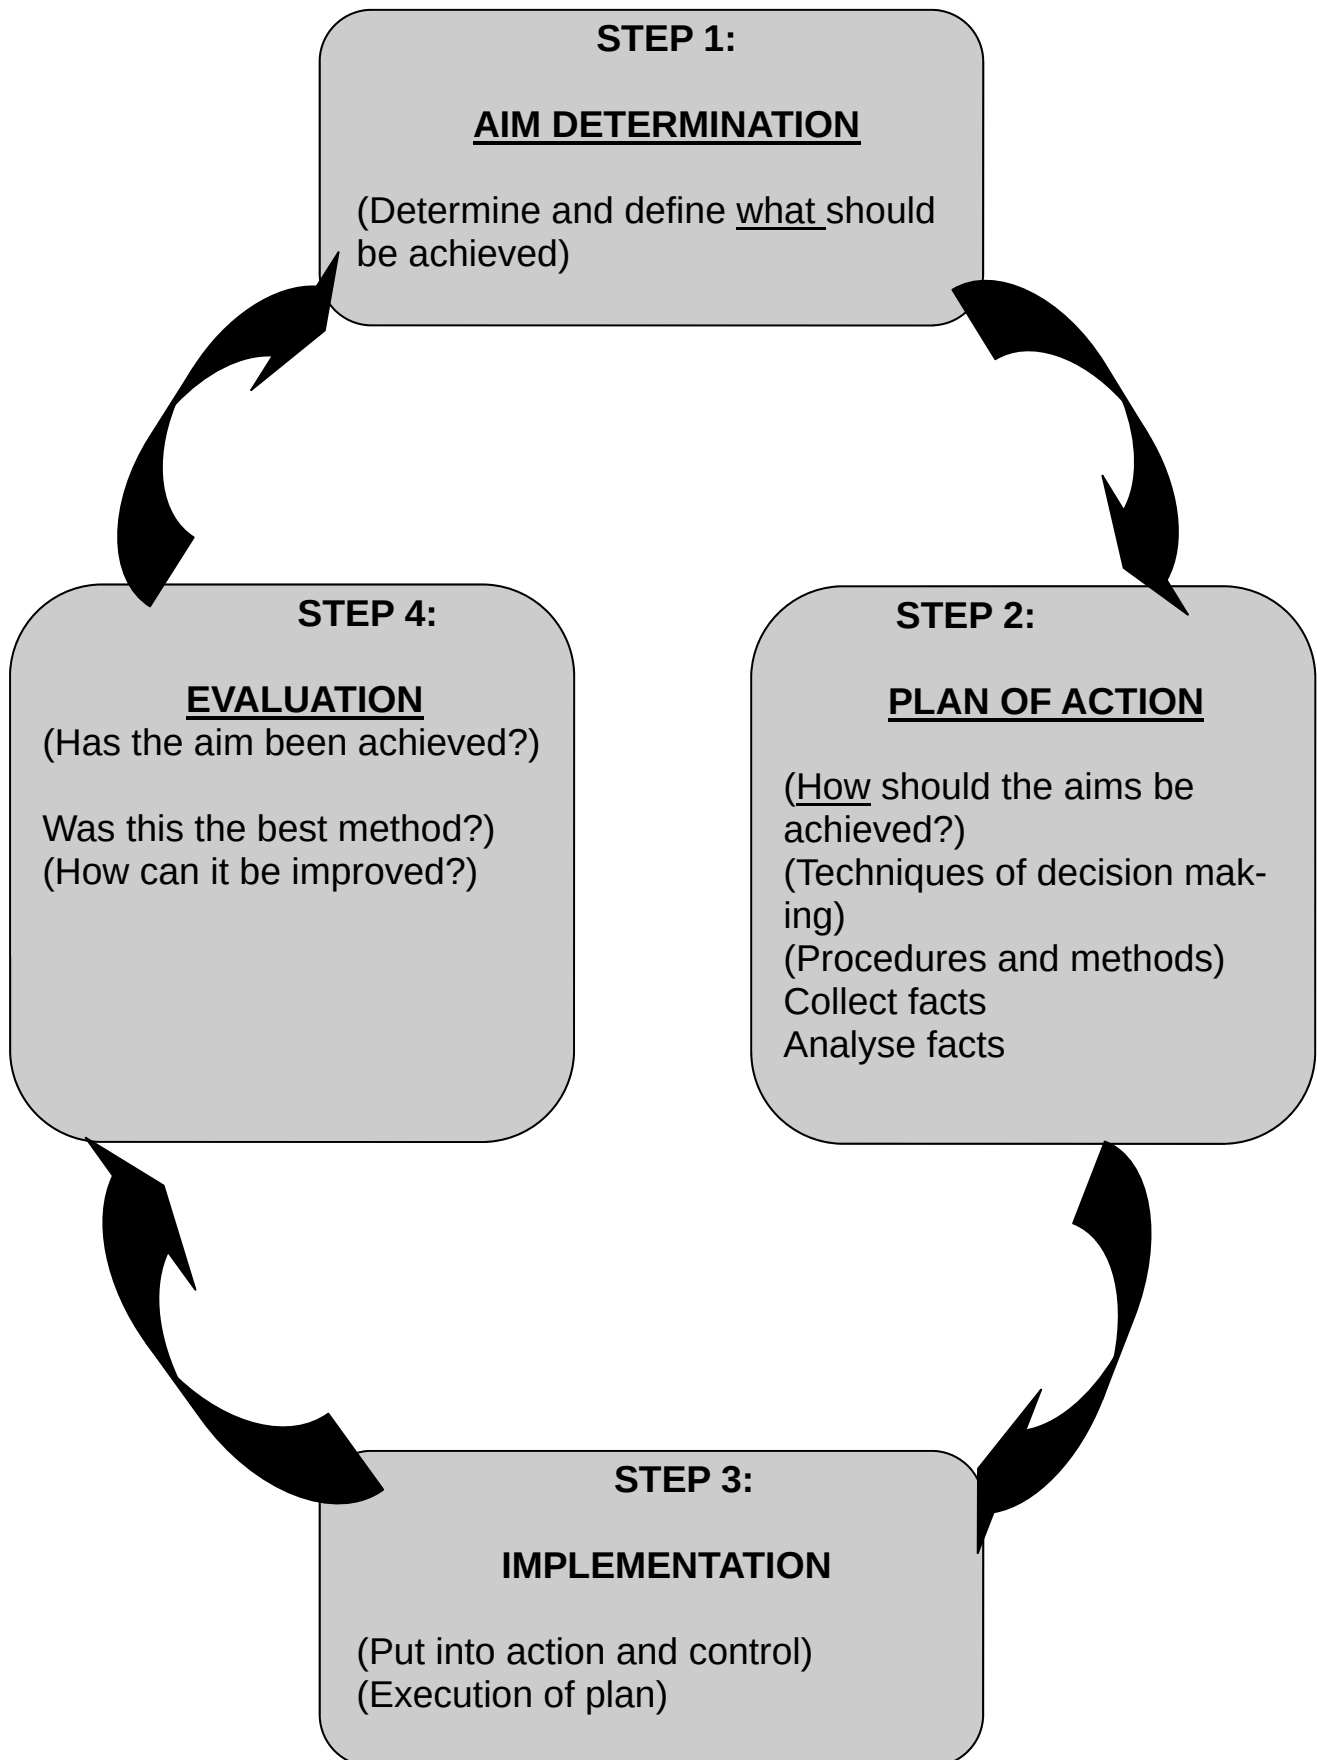

- ♦ Work leads to results
- ♦ Results are the outcome of work
- ♦ People do the work

To achieve through and with people, Supervisors have to plan and organize work.

Planning is that part of a supervisor's task which concerns the purposeful deliberation on the future goals of an organisation or section, the activities and means involved, the possible problems and devising a suitable plan for the effective attainment of goals.

This means that you have to determine in advance what it is that you want to do and how you will do it. You, therefore need to know:

- ♦ Why must the work be done?
- ♦ What work must be done?
- ♦ Who is going to do the work?
- ♦ What is needed to do the work? For example; raw materials, packaging etc.
- ♦ How will the success of the work be measured? For example, what are the standards for quality, quantity and cost?
- ♦ By when must the work be completed?

6.1 Effective Planning

In order to plan effectively all factors that may have an influence on the implementation of the plan should be taken into consideration, for example:

Time necessary to execute the plan:

- ♦ Is there a time limit?
- ♦ How long will it take to execute the plan?
- ♦ Is enough time available?
- ♦ Can I save time?

Finances required:

- ♦ How much will it cost to execute the plan?
- ♦ Has provision been made in the budget?
- ♦ What can be done to economise?

Manpower requirements

- ♦ How many people should be involved in the execution of the plan?
- ♦ Are the available persons able or have they been trained to execute the plan?
- ♦ How can manpower be saved?
- ♦ How can available manpower be optimally utilised?

Change implications

- ♦ Will the situation change in the near future?
- ♦ And if so, to what extent?
- ♦ How will this affect the execution of my plans?
- ♦ What alternative goals must I determine?

Approval authorities

- ♦ Does my supervisor agree with the plans?
- ♦ Do the plans fit in with current policy and legal requirements and restrictions?
- ♦ Are the plans to the benefit of all concerned?

[illegible]

Unit standard 13912: Apply knowledge of self and team in order to develop a plan to enhance team performance.

WORDS/ACRONYMS	EXPLANATION OF ACRONYMS
ASSESSMENT	"A structured process of gathering evidence and making judgments about an individual's performance in relation to registered national standards and qualifications"
ASSESSMENT CRITERIA	It describe the evidence that is needed to show that the learner has demonstrated the outcome correctly. A list of evidence to be supplied by the candidate as proof of his / her ability to integrate all of the competencies listed earlier in the standard.
COMPETENCE	Competence is the ability to do certain things in a range of different environments with knowledge and understanding about what is being done and the effect this has on others. It includes <u>Knowledge, skills, attitudes, values and ethics.</u>
CREDIT	Each unit standard is worth a number of credits which gives an indication of the size and scope of the unit standard, the standard is worth. (1 credit = 10 notional hours of learning)
CRITICAL CROSSFIELD OUTCOMES	critical cross field outcomes is to direct educational activities towards development of the learners within a social and economic environment.
EMBEDDED KNOWLEDGE	Body of theory essential for understanding and applying the standard. Principles, methods and techniques that would underpin good practice of this unit standard.
EVIDENCE	Evidence is a set of information or observations that provides proof of the learner's competence.
FORMATIVE ASSESSMENT	Aims to assist the learner to identify any knowledge/skills gaps when demonstrating his/her current competence. Diagnostic assessment supports learning and progress of the learner.
INTEGRATED ASSESSMENT	Integrated assessment refers to: • assessing a number of outcomes together • assessing a number of assessment criteria together • assessing a number of unit standards together • using a combination of assessment methods and instruments for an outcome/s • collecting naturally occurring evidence in the workplace • Acquiring evidence from other sources such as supervisor's reports, testimonials, portfolio of work previously done, logbooks, journals etc.
LEARNING ASSUMED TO BE IN PLACE	Building blocks (knowledge, skill and understanding) assumed to be in place
LEARNING PROGRAM	A "learning program is a set of learning activities in which the learner will be involved in working towards the achievement of one or more outcomes.
LEVEL	Each unit standard is registered on the NQF at a particular level based on the complexity of the outcomes and stringency of the standards.
NQF	National Qualifications Framework
RANGE STATEMENTS	The range statements indicate detailed requirements of the assessment criteria.

RE-ASSESSMENT	• The same method and instrument may be used, but, the task and materials should be different • The task and materials should, however, be of the same complexity and level as the previous ones. • In case the methods and instruments are changed it must be ensured that they are appropriate for the outcomes specified.
RPL ASSESSMENT	RPL is a way of recognizing what individuals already know and can do. The basic premise underlying it is that people, especially mature adults, learn many things inside and outside the formal structures of education and training and that irrespective of where, how and when learning was acquired, subject to assessment, it can be worthy of recognition and credit.
RPL	Recognition of prior learning
SASSETA	Safety & security sector education and training authority.
SAQA	SOUTH AFRICAN QUALIFICATION AUTHORITY
SPECIFIC OUTCOMES	An outcome is a statement that describes the required competency that must be demonstrated by the learner on successful completion of a training intervention. Key performance areas in the standard are given, the focus is <i>not</i> only on current competence, but also on future competence in this standard.
SUMMATIVE ASSESSMENT	Assessment used to record the level of competence achieved by a learner over a period of time, e.g. at the end of a program, term or year.
QUALIFICATIONS	Represent a planned combination of learning outcomes which has a defined purpose and intended to provide learners with applied competence and a basis for further learning
UNIT STANDARDS	the “building blocks” of qualifications. All qualifications are plotted on the National Qualifications Framework (NQF). “A statement of the outcomes that the learner must achieve to earn credit. Standards are nationally agreed and internationally comparable.”

WORDS/ACRONYMS	EXPLANATION OF ACRONYMS
COST CENTER	Distinctly identifiable department, division, or unit of firm whose managers are responsible for its all associated costs and for ensuring adherence to its cost-budgets. Also called cost pool. See also profit center and revenue center.
FIRST LINE MANAGERS	Supervisors on an organizational level immediately above non managerial workers. First-line managers primarily oversee performance on line tasks. Some typical titles associated with supervisory positions are foreman, shift boss, sergeant, section head, and ward nurse.
INTERVENTION	the act of intervening (as to mediate a dispute, etc.); "it occurs without human intervention"
IMPERATIVE	Some duty that is essential and urgent
CONJUNCTION	Concurrence: the temporal property of two things happening at the same time; "the interval determining the coincidence gate is adjustable"
SUBORDINATES	♦ Inferior to or placed below another in rank, power, importance, etc.; secondary ♦ Under the power or authority of another
UTILISE	♦ Make use of, or put to useful purpose. ♦ Use: put into service; make work or employ for a particular purpose or for its inherent or natural purpose; "use your head! ...
APTITUDE	An aptitude is an innate, acquired or learned or developed component of a competency (being the others: Knowledge, understanding and attitude) to do a certain kind of work at a certain level. Aptitudes may be physical or mental.
ORGANOGRAM	♦ Hierarchy diagram ♦ A chart depicting the complete structure of an organisation, or division of an organisation, or a campaign body, including all its committees.
OBSOLETE	No longer in use; "obsolete words"
COHESIVE	Marked by a tendency to stick together.
CONSTRUCTIVE, DEVELOPMENTAL MANNER	Constructing or tending to construct or improve or promote development; "constructive criticism"; "a constructive attitude"
COMPLACENCY	The feeling you have when you are satisfied with yourself; "his complacency was absolutely disgusting"

WORDS/ACRONYMS	EXPLANATION OF ACRONYMS
SMUGNESS	An excessive feeling of self-satisfaction
PARAMETERS	The operating limits of a device,
PREFERENTIAL	Related to the showing or giving of preference
JANITOR	♦ One who is hired to take care of a building. Generally associated with cleaning, locking up after closing and minor repair ♦ someone employed to clean and maintain a building ♦ A janitor is a person who takes care of a building, such as a school, office building, or apartment block. Janitors are responsible primarily for cleaning, and often (though not always) some maintenance and security.
PRECONCEIVED	♦ An idea or opinion) formed beforehand; especially without evidence or through prejudice; "certain preconceived notions" ♦ Of an opinion conceived beforehand; of a notion
EVER-RECEDING	• A slow or gradual disappearance • The act of becoming more distant
VIRTUALLY	• In essence or effect but not in fact • Practically; almost but not quite; Without exaggeration; literally; In essence, but not in fact
COLLABORATIVE	Collaboration is a structured, recursive process where two or more people work together toward a common goal—typically an intellectual endeavor that is creative in nature—by sharing knowledge, learning and building consensus.
ENCAPSULATED	Confined to a specific area;

Apply knowledge of self and team in order to develop a plan to enhance team performance

PURPOSE OF THE UNIT STANDARD

This unit standard required learners to reflect on the strengths and weaknesses of themselves and their teams in order to manage team performance.

It is intended for managers of small businesses and junior managers of business units in larger organisations. The term business unit in this unit standard implies a small business, cost center, section or department.

Junior managers include, but are not limited to team leaders, supervisors, first line managers and section heads. The position is term is used to describe the first level of management in an organisation at which an employee has other employees reporting to him/her.

The qualifying learner is capable of:

- Understanding him/herself as worker in a specific position.
- Identifying own role in an organisation.
- Understanding the dynamics within a specific group.
- Using a variety of strategies to deal with potential conflict in a team or group.
- Developing a plan of action to enhance team performance

LEARNING ASSUMED TO BE IN PLACE AND RECOGNITION OF PRIOR LEARNING

There is open access to this unit standard. Learners should be competent in Communication and Mathematical Literacy at NQF level 2.

UNIT STANDARD RANGE

The typical scope of this unit standard is conflict arising out of interpersonal differences and group dynamics.

UNIT STANDARD OUTCOME HEADER

null

Specific Outcomes and Assessment Criteria:**SPECIFIC OUTCOME 1**

Demonstrate knowledge and understanding of self as a worker in a specific work position

ASSESSMENT CRITERIA**ASSESSMENT CRITERION 1**

1.Own strengths and weaknesses are identified, based on self-reflection and feedback.

ASSESSMENT CRITERION 2

2.A personal development plan to strengthen own performance is compiled with a view to becoming a role model for a team or group.

SPECIFIC OUTCOME 2

Identify own role in an organisation

ASSESSMENT CRITERIA**ASSESSMENT CRITERION 1**

1.The organogram of an organisation is interpreted and an indication is given of the learner`s place in the organisation.

ASSESSMENT CRITERION 2

2.An organisations expectations of a person in the learner`s position are explained and an indication is given as to how performance is monitored and measured.

ASSESSMENT CRITERION 3

3.The values and attitudes of a particular organisation are explored with reference to the organisation`s code of ethics or conduct.

ASSESSMENT CRITERION 4

4.The effect of the code of conduct on decisions a team leader may make are indicated with reference to the code of conduct of a specific organisation.

SPECIFIC OUTCOME 3

Use a variety of strategies to deal with potential conflict in a team or group

ASSESSMENT CRITERIA**ASSESSMENT CRITERION 1**

1.The kinds of conflict that could arise in a team or group are identified and strategies to deal with issues in a team are demonstrated in role-play situations.

ASSESSMENT CRITERION 2

2.Strategies for creating a positive working environment in a team or group are explored and an indication is given of the role of the team leader in creating a positive work environment.

ASSESSMENT CRITERION 3

3.Situations that hamper efficiency in a group are identified and suggestions are made to improve these

situations.

ASSESSMENT CRITERION 4

4.Support systems available to the team are identified and an indication is given of the learner`s own role in being supportive and using a support system.

SPECIFIC OUTCOME 4

Demonstrate knowledge and understanding of the dynamic within a specific group

ASSESSMENT CRITERIA**ASSESSMENT CRITERION 1**

1.The strengths and weaknesses of a group or team are identified based on reflection and team performance.

ASSESSMENT CRITERION 2

2.The strengths and weaknesses of individuals within a group or team are identified in order to decide on an appropriate management strategy.

ASSESSMENT CRITERION 3

3.Situations that are a cause of concern or dissent in a group or team are identified and plan is development to minimise their negative effect on the team.

ASSESSMENT CRITERION 4

4.Positive situations in a group or team are identified and a plan is developed to maximise the affect on the team`s performance

SPECIFIC OUTCOME 5

Develop a plan of action to enhance the performance of a team

ASSESSMENT CRITERIA**ASSESSMENT CRITERION 1**

1.Goals appropriate to the team are set in order to improve performance within a specific organisation.

ASSESSMENT CRITERION 2

2.A plan of action is developed as a means of achieving group or team goals.

ASSESSMENT CRITERION 3

3.The importance of consultation and joint decision making in setting team or group goals is explained and an indication is given of how a team can be involved in a goal setting process.

ASSESSMENT CRITERION 4

4.Progress in the implementation of team goals is monitored and an indication is given of when and how it may be necessary to amend the plan.

UNIT STANDARD ACCREDITATION AND MODERATION OPTIONS

Assessment of this Unit Standard should be contextual and practical.

- Assessors must be registered as an assessor with the Services ETQA or an ETQA that represents the sectors in which the learner is employed.
- Moderators must be registered as assessors with the Services ETQA, or with an ETQA that has a Memorandum of Understanding with the Services ETQA.
- The mechanisms and requirements for moderation should be applied in accordance with the requirements of the relevant ETQA.
- Assessment should include both formative and summative assessment.

- Training providers must be accredited by the Services ETQA or with an ETQA that has a Memorandum of Understanding with the Services ETQA.

Critical Cross-field Outcomes (CCFO):

UNIT STANDARD CCFO IDENTIFYING

The learner is able to identify and solve problems and make decisions in developing a plan of action to minimise negative influences and enhance the performance of a group, and in applying a code of conduct to own decisions.

UNIT STANDARD CCFO ORGANISING

The learner is able to organise and manage him/herself planning a work schedule for a team based on the strengths and weaknesses of individual members.

UNIT STANDARD CCFO COLLECTING

The learner is able to collect, organise and critically evaluate information by assessing the strengths and weaknesses of the group and individual members of a team.

UNIT STANDARD CCFO COMMUNICATING

The learner is able to communicate effectively in dealing with potential conflict in a team.
