## 1: Assessors Guide

---

## 1. Instructions to Assessor

### Introduction:

This assessment guide has been designed as a generic assessment guide and is intended for use by the accredited Security Industry Training Providers.

### Purpose of the assessment

The purpose of summative assessment against this unit standard is to:

- ♦ Award credits to the NQF to learners who are able to Handle and defuse security related conflict

### Learning assumptions

The following knowledge, skills, attitude and/or equivalent:

- ♦ A knowledge, comprehension and application of language at NQF 02.

### Assessment methods

The following assessment methods will be used for the summative assessments:

- ♦ Written and/or/verbal questioning
- ♦ Product sample and on site assessment

## 2. Assessment Process

### General

- ♦ Use the assessment guide and your latest company policies and standard operating procedures to assess the evidence received from the learner.
- ♦ Use the section: Addition Comments/Questions to note down any further comments or questions on the evidence assessed.
- ♦ Use the model answers as a guideline to assess the learner's answers to the assessment questionnaire.
- ♦ The learner can complete the assessment questionnaire orally. In this case, agree a date, time and venue.
- ♦ Provide the learner with a feedback within 10 working days of receiving the evidence.

---

**Step 1 - Planning for the Assessment**

Review this assessment guide to:

- ♦ Ensure that you understand all the requirements of the assessment in terms of evidence required to prove competence.
- ♦ Identify and prepare the learner for the assessment by:
  - ⇒ Completing the Assessment Plan with the learner to discuss and agree the details regarding the assessment.
  - ⇒ Completing the Assessment Preparation Checklist and getting the learner to sign.
- ♦ Ensure that you have familiarized yourself with the following:
  - ⇒ The various IT concepts and terminology.
  - ⇒ The basic operation of a computer
  - ⇒ The essence of backups and Company IT policies and procedures.

**Step 2: Complete the Assessment**

- ♦ Collect the evidence in accordance with the methods and evidence requirements specified.
- ♦ Mark each question as correct or incorrect in the “Office Use” column.
- ♦ Record the evidence on the assessment guide and indicate “Competent”, “Not Yet Competent” or “Not Assessed” for each assessment criterion. Note down any comments at the back of the assessment guide.
- ♦ Ask the learner additional questions, if necessary, to clarify points. Record these on the guide.
- ♦ All questions must be complete as per the criteria specified.
- ♦ Answers provided must be similar to the model answers.

**Step 3 - After the Assessment**

- ♦ Prepare the feedback by writing comprehensive, developmental feedback after each section on the Assignment Sheets. In addition to this, you are required to write a summary overall feedback on the Assessment Guide.
- ♦ Provide the feedback to the learner in a safe, undisturbed nature.
- ♦ Ensure that your feedback is developmental and supportive in nature.
- ♦ Advise the learner on what action to follow in the event of a “Not Yet Competent” rating.
- ♦ Advise the learner on what action to take where he/she feels the need to appeal against your decision.
- ♦ Allow the learner time to provide you with feedback relevant to the process.
- ♦ Record the learner’s feedback in the guide and ensure that it is given to the person responsible for the quality assurance of assessment tools.
- ♦ Ensure that the learner co-signs the assessment guide to indicate agreement with the feedback.

---

### **3. Assessment documentation required:**

#### **Step 1: Planning for the Assessment**

- ♦ Assessment Plan
- ♦ Assessment Preparation Checklist
- ♦ Assessment Policy (including Appeals)
- ♦ Evidence Matrix
- ♦ Assessment Instruments

#### **Step 2: Conducting the Assessment**

- ♦ Assessor Guide
- ♦ Learner's workbook
- ♦ Summative assessment pack

#### **Step 3: After the Assessment**

- ♦ Assessment Comments
- ♦ Feedback Report

### **4. Specific Instructions**

Please note that Part 3 Assessment Instruments are not included in this guide and are to be included by the assessor on an individual basis.

The actual summative assessments need to be completed and signed off by both learner and assessor. The assessor will take control of the completed assessment instruments and will file them under the tab for Assessment Evidence.

The completed assessment pack will be kept in safekeeping at the training provider for three months after endorsement by SASSETA and will then be returned to the learner.

#### **Guidelines where an appeal is lodged**

The normal appeal procedure prescribed by SASSETA and described by the provider's Quality Management System will be followed.

| <b>ACTION</b>                                                                                                                                                                                                                                                                                               | <b>YES/NO</b> | <b>COMMENTS</b> |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|-----------------|
| Set learner at ease; be friendly, polite and professional.                                                                                                                                                                                                                                                  |               |                 |
| Explain to the learner and agree on the following issues.<br><br>1. The unit standard that will be assessed<br>2. Date, time, venue and process to be followed during the assessment.<br>3. Summative assessment tools to be used for the assessment.<br>4. The assessment plan<br>5. Purpose of assessment |               |                 |
| Explain to the learner and agree on the role of all involved during the assessment process.                                                                                                                                                                                                                 |               |                 |
| Identify possible barriers and or disabilities of the learner.                                                                                                                                                                                                                                              |               |                 |
| Explain the meaning and application of RPL.                                                                                                                                                                                                                                                                 |               |                 |
| Explain, discuss and provide one complete set of the Appeals process documentation.                                                                                                                                                                                                                         |               |                 |
| Explain to the learner when final results will be available and how feedback will be provided.                                                                                                                                                                                                              |               |                 |
| Discuss previous assessment results if applicable.                                                                                                                                                                                                                                                          |               |                 |

I, \_\_\_\_\_ (initials and surname of learner), DECLARE THE FOLLOWING:

A copy of the unit standard(s) involved has been given to me prior to this meeting. I know I will be assessed against the criteria, which have been set to the applicable unit standards. The criteria have been discussed with me, and the procedures and purpose of the assessment has been clearly explained to me.

I am well aware of the venue, date and time that I will be assessed. I consider the period of time given to me to prepare myself for the assessment to be fair.

I understand clearly that I have the right to appeal against any decision made by the assessor during the assessment of the evidence provided by me, and that I have free access to the appeals procedures attached to this assessment pack. I understand that I have the right to be accompanied by another person during all procedures, and that I have free access to the Training Division of SBV'S Health and Safety Procedures- filed at the offices.

## 3: Assessment Evidence

---

## Assessment Instruments

The assessment instruments included in this assessment pack are all summative assessment instruments and are to be read in conjunction with the formative assessment instruments contained in the learner workbook. Both formative (workbook) and summative assessments are to be retained as part of the learner's portfolio of evidence.

A number of the assessment instruments contained in this assessment are workplace knowledge based questions.

This means that you will arrange with the learner, a time that is suitable, during which the learner will complete each questions.

**QUESTION 1: Multiple choice questions.**

The learner must indicate, by means of a cross, the most correct answer. Draw the cross through the correct answer in the space provided on the left of the most correct statement

1. The most common Operating System (OS) for small computers is.....

**[A] Microsoft Windows**

[B] MacIntosh

[C] Microsoft Word

2. The two parts of a computer are.....

[A] Zip Drive and CD

**[B] Monitor and Keyboard**

[C] Hardware and Software

3. The Central Processor Unit (CPU) is a.....

[A] Place where your files live.

[B] Main chip on the computer that makes everything go.

**[C] Space where your computer does its processing.**

04. What is it called when you remove some information from a file or remove a file from the disk?

[A] Save

[B] Edit

**[C] Delete**

05. What kind of a file is the kind that we care about most (memos, letters, pictures, etc.)?

[A] Application File

**[B] Document Files**

[C] System Files

06. Using the desktop metaphore, what is the hard drive (and other kinds of storage media like floppy disks)?

**[A] File Cabinet**

[B] Application Files

[C] Desktop

07. What do you do to get rid of a window that you've opened?

- [A] Delete
- [B] Trash
- [C] **Close**

08. What do you do when you make changes to a document?

- [A] Drag
- [B] Click
- [C] **Edit**

09. What menu command do you use to give a file a name and a place to live?

- [A] Save
- [B] **Save As**
- [C] Creating A File

10. Where do you move icons when you want to get rid of or delete them?

- [A] **Recycle Bin or Trash**
- [B] Document Files
- [C] Folders

11. What part of your computer do you use most to edit word processing documents?

- [A] Modifier Keys
- [B] **Keyboard**
- [C] Mouse

12. What do we call those small, pictorial representations of objects we see on the desktop?

- [A] **Icons**
- [B] List View
- [C] File menu

13. What can we create, rename and move around that allows us to sort out and organize our files?

- [A] Resize Box
- [B] System Files
- [C] **Directories or Folders**

14. What do we call it when you "loose" all the work you've done since the last time you saved?

- [A] **Crash**
- [B] Close
- [C] Recycle Bin

- 
15. What do we call pressing the mouse button twice in rapid succession?
- [A] **Double Click**  
[B] Right Click  
[C] Click
16. What part of a window that allows you to move through documents?
- [A] Mouse  
[B] Keyboard  
[C] **Scroll Bar**
17. What menu command allows you to go back to a document you've already worked on?
- [A] Save  
[B] **Open**  
[C] Save As
18. What is a synonym for "Opening" a program application?
- [A] Delete  
[B] Drag  
[C] **Launch**
19. What is the name of the most widely used operating system for personal computers?
- [A] Macintosh  
[B] UNIX  
[C] **Windows**
20. Which way should the "tail" of the mouse point when you use it?
- [A] To the right  
[B] **Away from your body**  
[C] Toward the ground
21. What do we call moving an object on screen with the mouse?
- [A] Double Click  
[B] Click  
[C] **Press and Drag**

**QUESTION 2:** Explain the consequences of not backing up your information.

Backups are data insurance. Real-world insurance policies protect your home, car, and health from financial disaster. Likewise, data backups protect the work you do on your computer. In a way, having an exact copy of the files on your computer stored elsewhere is even better than insurance. Insurance only kicks in after a tragedy. If your hard drive breaks down, falls victim to a virus, or deletes some important files in response to your careless commands, it's no tragedy when you have a backup. And if the backup is recent and serves as an exact copy for all the data on your computer, the recovery process shouldn't present any problems or delays at all.

Not having a backup is a frightening prospect. If the worst happens, how much data will you lose? How much time will it take for you to re-create data that has not been backed up? With a proper backup routine, you can recover your data from the clutches of a full system failure. Plus, you can recover your OS (operating system), applications, documents, e-mail, and other settings.

It is important to back-up for the following reasons:

Mechanical or electronic failure could mean that you lose important data. Re-inputting the data is costly to the establishment, both in time taken to do it and in delays in providing services and / or products. Furthermore the loss of information could also inconvenience clients in:

- ♦ delays in billing, incorrect billing, etc, which could result in loss of revenue.

**QUESTION 3:** Discuss the primary focus of a computer network.

The primary purpose of a computer network is to share resources:

- ♦ You can play a CD music from one computer while sitting on another computer.
- ♦ You may have a computer with a CD writer or a backup system but the other computer. doesn't have it; In this case, you can burn CDs or make backups on a computer that has one of these but using data from a computer that doesn't have a CD writer or a backup system.
- ♦ You may have a computer that doesn't have a DVD player. In this case, you can place a movie DVD on the computer that has a DVD player, and then view the movie on a computer that lacks a DVD player.
- ♦ You can connect a printer (or a scanner, or a fax machine) to one computer and let other computers of the network print (or scan, or fax) to that printer (or scanner, or fax machine)
- ♦ You can place a CD with pictures on one computer and let other computers access those pictures.
- ♦ You can create files and store them in one computer, then access those files from the other computer(s) connected to it.

**QUESTION 5:** Explain the term “virus” Motivate your answer by providing examples of at least three types of viruses that can occur on your computer.

A virus is a small piece of software that piggybacks on real programs. For example, a virus might attach itself to a program such as a spreadsheet program. Each time the spreadsheet program runs, the virus runs, too, and it has the chance to reproduce (by attaching to other programs) or wreak havoc.

- ♦ **E-mail viruses:** An e-mail virus travels as an attachment to e-mail messages, and usually replicates itself by automatically mailing itself to dozens of people in the victim's e-mail address book. Some e-mail viruses don't even require a double-click -- they launch when you view the infected message in the preview pane of your e-mail software [source: Johnson].
- ♦ **Trojan horses:** A Trojan horse is simply a computer program. The program claims to do one thing (it may claim to be a game) but instead does damage when you run it (it may erase your hard disk). Trojan horses have no way to replicate automatically.
- ♦ **Worms:** A worm is a small piece of software that uses computer networks and security holes to replicate itself. A copy of the worm scans the network for another machine that has a specific security hole. It copies itself to the new machine using the security hole, and then starts replicating from there, as well.

**QUESTION 6:** As part of this module you will be required to complete the following tasks.

An assessor/supervisor/experienced colleague must be present to observe you as you complete the tasks **OR** you can provide a portfolio of evidence proving your competence.

| Did the learner:                                             | Yes | No | Comments |
|--------------------------------------------------------------|-----|----|----------|
| <b>Task No. 1</b>                                            |     |    |          |
| Switch the PC on.                                            |     |    |          |
| <b>Task No. 2</b>                                            |     |    |          |
| Log on and off using the computer.                           |     |    |          |
| <b>Task No. 3</b>                                            |     |    |          |
| Search for documents                                         |     |    |          |
| <b>Task No. 4</b>                                            |     |    |          |
| Open existing documents                                      |     |    |          |
| <b>Task No. 5</b>                                            |     |    |          |
| Create new folders                                           |     |    |          |
| <b>Task No. 6</b>                                            |     |    |          |
| Save documents                                               |     |    |          |
| <b>Task No. 7</b>                                            |     |    |          |
| Delete documents                                             |     |    |          |
| <b>Task No. 8</b>                                            |     |    |          |
| Performing a back-up procedure for documents and or folders. |     |    |          |
| <b>Task No. 9</b>                                            |     |    |          |
| Type out and print a letter                                  |     |    |          |
| <b>Task No. 10</b>                                           |     |    |          |
| Print documents                                              |     |    |          |

**QUESTION 9:** Identify and list possible problems that may occur on the computer and the appropriate action to be taken.

| Solution                 |                                                                                                                                                                                                                                                                                                |
|--------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Hardware Failure</b>  | Contact the service agent for your particular equipment. Make sure you obtain this information and keep it handy.                                                                                                                                                                              |
| <b>Software freeze</b>   | Restart the computer. You may lose some work, but there is no other way to solve the problem. Make sure that you have set up the auto-recovery options on the programs you are working on.                                                                                                     |
| <b>Back-up Failure</b>   | Contact the company IT support officer for your office/ / region.                                                                                                                                                                                                                              |
| <b>Alternative Ideas</b> | <p>There may be circumstances where the computer is not working due to a power supply disruption or the computer is malfunctioning.</p> <p>You will then need to make alternative arrangements or have a manual system in place for certain tasks such as, sending letters, registers etc.</p> |

|                                 |     |  |    |  |
