QUESTION 8: Scenarios:

Mr. P is an education, training and development practitioner in another freight handling company. He has organised with the company's management that he has the assistance of 5 experienced freight handlers. They meet with him and the learners in a large, unused store room which he has carefully prepared for learning to take place. There is a place for learners to work in groups and there is a place where they can bring their chairs to listen, watch and ask questions. There is also a place where individuals can sit and work. The store room is air and cool. Each learner is supplied with a plan of a freight storage area.

1. Mr. P begin by saying:

Good morning all! Welcome to this morning's session. So far, this learnership, you have learnt how important it is to handle freight carefully and why we need to comply with ship-pers' specifications. We also learnt about customer requirements and how to deal with them. Today we will address the importance of allocating spaces for hazardous goods so that they are separated from other goods in an effort to keep our storage areas safe. In front of you is a picture of a freight storage area. Please work in your groups of 4 and spend 15 minutes deciding where you would store hazardous goods. Also discuss why it is important to keep them separated.

2. Mr. P continues:

Right, that is time up. I have been looking at some of your responses. Very good indeed! The group in the far corner can start. Will the spokesperson report back on what the group decided?

After the reports, Mr. P goes on to say:

Excellent. Most of you focused on the areas demarcated for hazardous goods. You also notice that these areas have specially installed fire walls.

I was especially pleased to notice that some groups addressed the precautionary measure that should be adhered to. This shows me that you have been taking the trouble to find information on you own.

Good as it is important to be responsible for your own learning.

Once Mr. P is satisfied that all the learners have participated and understood, he explains that in the future session, they will learn the importance of maintaining hygiene by carefully monitoring the temperatures in refrigerators and pre-cooled areas. He explains that they will be able to apply to be assessed to see if they are competent in these skills. He allocates them into groups to an experienced freight handler to observe and identify the areas. He gives each learner a 'check sheet' detailing the checkpoints to mark while they observe. He tells them to meet him in half an hour for consolidation. During the consolidation session, he gives them a self-assessment sheet to complete. The sheet focuses on the checkpoints required to meet the outcome.

Taking the two scenarios mentioned on the previous pages, can you decide:

- ♦ Which is an effective learning environment and why?
- ♦ Whether the environments are suitable for adult learners?

Think about the following questions when you record your answer:

- ♦ Which of the two training sessions was facilitated in an outcomes-based environment. Explain how this was created.
- ♦ Which facilitator encouraged an open, interactive and participative approach? How did he do this?
- ♦ Which facilitator could monitor learners' participation and understanding during the activity? How did he do this?
- ♦ Which facilitator planned for outside assessment from skill people? How did he do this?
- ♦ Which facilitator created opportunities to apply the new knowledge in real life contexts? How did he do this?
- ♦ Which facilitator encouraged problem solving? How did he do this?
- ♦ Which facilitator encouraged co-operative learning? How did he do this?
- ♦ Which facilitator encouraged learners to critically analyse their progress? How did he do this?

Who would you rather be??

Mr. TOR Mr. P

Explain on the following page why you would not like to be a facilitator like the one you did not choose! Make notes of any points other learners have made that you did not think of.
