HOW THIS LEARNER WORKBOOK IS COMPILED

This learner workbook will be useful to people who aim to achieve recognition at some level in Further Education and Training or to meet the Fundamental requirement of a wide range of qualifications registered on the National Qualifications Framework.

People credited with this unit standard are able to:

1. Use mathematics to plan and control personal and/or household budgets and income and expenditure.
2. Use simple and compound interest to make sense of and define a variety of situations including investments, stokvels, inflation, appreciation and depreciation.
3. Investigate various aspects of financial transactions including costs, prices, revenue, cost price, selling price, loss and profit.

You have to study the content and guidelines given in your learner reference guide to complete this workbook.

Remember that this completed workbook must be handed in as it will form part of your formative assessment and will play a role in awarding you the required 05 credits that are to be achieved upon completion of this module.

Write neatly and legibly and ensure that you do not simply copy the information contained in the learner reference guide into your workbook. Give your own opinion and ideas where applicable and write the answers in your own words to indicate your level of understanding and learning.

Good luck with the completion of this workbook.

LEARNING UNIT 1

Budgets

LEARNING OUTCOMES

A learning credited with this unit will be able to:

1. Use mathematics to plan and control personal, regional and/or national budgets and income and expend.
2. Use simple and compound interest to make sense of and define a variety of situations.
3. Use mathematics to debate aspects of the national economy.

[illegible]Comments in support of decision

Tom celebrated his 21st birthday in January 2008. His parents invested R10 000 in January 1997 at 9,5% p.a. interest compounded annually. They planned to use the money to buy him a car for a birthday present.

LEARNER ACTIVITY 4

A course at university costs R10 000 rand. If a father wishes to send his daughter to do this in five years time, what will it cost him if the rate of inflation is estimated to be 11,5% p.a.?

SELF-ASSESSMENT

The learner must make use of the following self-evaluation checklist to rate himself against the learning outcomes of this particular training module in establishing the level of mastery of the information.

1. Not able to comply
2. Reasonable compliance (Not acceptable for final evaluation)
3. Able to comply fully

LEARNING OUTCOMES		1	2	3
1	Use mathematics to plan and control personal, regional and/or national budgets and income and expend.			
2	Use simple and compound interest to make sense of and define a variety of situations.			
3	Use mathematics to debate aspects of the national economy.
