1: Assessors Guide

1. Instructions to Assessor

Introduction:

This assessment guide has been designed as a generic assessment guide and is intended for use by the accredited Security Industry Training Providers.

Purpose of the assessment

The purpose of summative assessment against this unit standard is to:

- ♦ Identifying hazards
- ♦ Evaluating hazards
- ♦ Controlling hazards
- ♦ Explaining and using relevant legislation and regulations
- ♦ Gathering and organising occupational health, safety and environmental information from the workplace
- ♦ Carrying out occupational health and safety training

Learning assumptions

The following knowledge, skills, attitude and/or equivalent:

- ♦ A knowledge, comprehension and application of language at NQF 02.

Assessment methods

The following assessment methods will be used for the summative assessments:

- ♦ Written and/or/verbal questioning
- ♦ Product sample and on site assessment

2. Assessment Process

General

- ♦ Use the assessment guide and your latest company policies and standard operating procedures to assess the evidence received from the learner.
- ♦ Use the section: Addition Comments/Questions to note down any further comments or questions on the evidence assessed.
- ♦ Use the model answers as a guideline to assess the learner's answers to the assessment questionnaire.
- ♦ The learner can complete the assessment questionnaire orally. In this case, agree a date, time and venue.
- ♦ Provide the learner with a feedback within 10 working days of receiving the evidence.

Step 1 - Planning for the Assessment

Review this assessment guide to:

- ♦ Ensure that you understand all the requirements of the assessment in terms of evidence required to prove competence.
- ♦ Identify and prepare the learner for the assessment by:
 - ⇒ Completing the Assessment Plan with the learner to discuss and agree the details regarding the assessment.
 - ⇒ Completing the Assessment Preparation Checklist and getting the learner to sign.
- ♦ Ensure that you have familiarized yourself with the following:
 - ⇒ Health and safety legislation
 - ⇒ Safety inspections and assessments
 - ⇒ Health and safety terminology
 - ⇒ Health and safety principles

Step 2: Complete the Assessment

- ♦ Collect the evidence in accordance with the methods and evidence requirements specified.
- ♦ Mark each question as correct or incorrect in the “Office Use” column.
- ♦ Record the evidence on the assessment guide and indicate “Competent”, “Not Yet Competent” or “Not Assessed” for each assessment criterion. Note down any comments at the back of the assessment guide.
- ♦ Ask the learner additional questions, if necessary, to clarify points. Record these on the guide.
- ♦ All questions must be complete as per the criteria specified.
- ♦ Answers provided must be similar to the model answers.

Step 3 - After the Assessment

- ♦ Prepare the feedback by writing comprehensive, developmental feedback after each section on the Assignment Sheets. In addition to this, you are required to write a summary overall feedback on the Assessment Guide.
- ♦ Provide the feedback to the learner in a safe, undisturbed in nature.
- ♦ Ensure that your feedback is developmental and supportive in nature.
- ♦ Advise the learner on what action to follow in the event of a “Not Yet Competent” rating.
- ♦ Advise the learner on what action to take where he/she feels the need to appeal against your decision.
- ♦ Allow the learner time to provide you with feedback relevant to the process.
- ♦ Record the learner’s feedback in the guide and ensure that it is given to the person responsible for the quality assurance of assessment tools.
- ♦ Ensure that the learner co-signs the assessment guide to indicate agreement with the feedback.

3. Assessment documentation required:

Step 1: Planning for the Assessment

- ♦ Assessment Plan
- ♦ Assessment Preparation Checklist
- ♦ Assessment Policy (including Appeals)
- ♦ Evidence Matrix
- ♦ Assessment Instruments

Step 2: Conducting the Assessment

- ♦ Assessor Guide
- ♦ Learner's workbook
- ♦ Summative assessment pack

Step 3: After the Assessment

- ♦ Assessment Comments
- ♦ Feedback Report

Specific Instructions

Please note that Part 3 Assessment Instruments are not included in this guide and are to be included by the assessor on an individual basis.

The actual summative assessments need to be completed and signed off by both learner and assessor. The assessor will take control of the completed assessment instruments and will file them under the tab for Assessment Evidence.

The completed assessment pack will be kept in safekeeping at the training provider for three months after endorsement by SASSETA and will then be returned to the learner.

Guidelines where an appeal is lodged

The normal appeal procedure prescribed by SASSETA and described by the provider's Quality Management System will be followed.

PRE-ASSESSMENT MEETING CHECKLIST

ACTION	YES/NO	COMMENTS
Set learner at ease; be friendly, polite and professional.		
Explain to the learner and agree on the following issues. 1. The unit standard that will be assessed 2. Date, time, venue and process to be followed during the assessment. 3. Summative assessment tools to be used for the assessment. 4. The assessment plan 5. Purpose of assessment		
Explain to the learner and agree on the role of all involved during the assessment process.		
Identify possible barriers and or disabilities of the learner.		
Explain the meaning and application of RPL.		
Explain, discuss and provide one complete set of the Appeals process documentation.		
Explain to the learner when final results will be available and how feedback will be provided.		
Discuss previous assessment results if applicable.		

I, _____ (initials and surname of learner), DECLARE THE FOLLOWING:

A copy of the unit standard(s) involved has been given to me prior to this meeting. I know I will be assessed against the criteria, which have been set to the applicable unit standards. The criteria have been discussed with me, and the procedures and purpose of the assessment has been clearly explained to me.

I am well aware of the venue, date and time that I will be assessed. I consider the period of time given to me to prepare myself for the assessment to be fair.

I understand clearly that I have the right to appeal against any decision made by the assessor during the assessment of the evidence provided by me, and that I have free access to the appeals procedures attached to this assessment pack. I understand that I have the right to be accompanied by another person during all procedures, and that I have free access to the Training Division of SBV'S Health and Safety Procedures- filed at the offices.

3: Assessment Evidence

Assessment Instruments

The assessment instruments included in this assessment pack are all summative assessment instruments and are to be read in conjunction with the formative assessment instruments contained in the learner workbook. Both formative (workbook) and summative assessments are to be retained as part of the learner's portfolio of evidence.

A number of the assessment instruments contained in this assessment are workplace knowledge based questions.

This means that you will arrange with the learner, a time that is suitable, during which the learner will complete each questions.

QUESTION 1.**Define a hazard.**

HAZARD” means a source of or exposure to danger, a threat to health or which may destroy or damage something or somebody – anything we can see, feel, touch, and smell.

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

QUESTION 2.**List three types of hazard identification methods**

- ♦ **Injury and illness records:** Review your workers' compensation data and check the incidence, mechanism and agency of injury, and the cost to the organisation. These statistics can be analyzed to alert the organisation to the presence of hazards
- ♦ **Staying informed:** Staying informed on trends and developments in workplace health and safety, for example via the internet or OHS publications
- ♦ **Review:** Reviewing the potential impact of new work practices or equipment introduced into the workplace in line with legislative requirements.
- ♦ **Surveys:** Doing walk-through surveys, inspections or safety audits in the workplace to evaluate the organisation's health and safety system.
- ♦ **Study implications:** Considering OHS implications when analyzing work processes
- ♦ **Investigation:** Investigating workplace incidents and 'near hits' reports, in some cases there may be more than one hazard contributing to an incident.
- ♦ **Feedback:** Getting feedback from employees can often provide valuable information about hazards, because they have hands-on experience in their work area.
- ♦ **Consultation:** Consulting with employees, health and safety representatives and OHS Committee members.
- ♦ **Benchmarking:** Benchmarking against or liaising with similar workplaces.

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

QUESTION 3.**Complete the attached diagram****1. Physical hazards**

<u>Physical</u> Hazard Cause	Potential Disease or Injury
♦ <u>Heat</u>	♦ <u>Heatstroke, cramp, fatigue</u>
♦ Lighting	♦ <u>Headaches, eyestrain</u>
♦ Noise	♦ <u>Hearing loss</u>
♦ <u>Vibration</u>	♦ White finger disease
♦ <u>Ionizing Radiation</u>	♦ <u>Lung cancer</u>
♦ Dust	♦ Silicosis
♦ Pressure	♦ <u>Decompression sickness (bends)</u>
♦ <u>Electricity</u>	♦ Heart failure, burns

2. Mechanical hazards

Mechanical Hazard Cause	Potential Disease or Injury
♦ <u>Manual handling: over exertion, lifting or pulling</u>	♦ Musculoskeletal injury: spinal injury, muscle strains, sprains
♦ Unguarded machines	♦ <u>Acute physical injuries: severed/ crushed limbs</u>
♦ Hydraulic pressure	♦ Acute injury: crushed limbs
♦ <u>Gravitational energy: falls of people or objects</u>	♦ Acute injury: broken bones, brain damage

Requirements achieved

YES

NO

Comments in support of decision

After the process you have to explain the complete Hazard identification process.

This image shows a blank sheet of white paper with horizontal ruling lines. The lines are evenly spaced and extend across the width of the page. There are no margins, text, or other markings on the paper.Comments in support of decision

QUESTION 5.**Define a workplace inspection.**

A workplace inspection is a necessary and critical part of a safety and health program in which the workplace is examined closely on a regular basis for the purpose of:

- ♦ Identifying and recording potential and actual hazards associated with buildings, equipment, environment, processes and practices;
- ♦ Identifying any hazards which require immediate attention, whether they are unsafe conditions or unsafe acts;
- ♦ Ensuring that existing hazard controls are functioning adequately; and
- ♦ Where appropriate, recommending corrective action.

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

Perform a workplace inspection at a designated site identified by the assessor. Use the attached documentation.

This image shows a blank sheet of white paper with ten horizontal blue lines. The lines are evenly spaced and run across the width of the page, providing a guide for handwriting practice. There is no text or other markings on the paper.Comments in support of decision

		Location	Condition	Comments	
TRAINING					
1.	Is training provided for each person newly assigned to a job?				
2.	Does initial training include a thorough review of hazards and accidents associated with the job?				
3.	Is adequate instruction in the use of personal protective equipment provided?				
4.	Is training for the use of emergency equipment provided?				
5.	Are workers knowledgeable in the "Right to Refuse" procedures?				
ENVIRONMENT					
1.	Are resources available to deal with very hot or very cold conditions (drinking water, lined gloves, insulated boots)?				
2.	Is the rain gear that is provided comfortable, and light enough so as not to constitute a hazard?				

ENVIRONMENT				
1.	Are resources available to deal with very hot or very cold conditions (drinking water, lined gloves, insulated boots)?			
2.	Is the rain gear that is provided comfortable, and light enough so as not to constitute a hazard?			
3.	Are work surfaces and grip surfaces safe when wet?			
4.	Do workers know the symptoms of heat cramps, heatstroke?			
WORK PROCESS				
1.	Are repetitive motion tasks properly paced and kept to a minimum?			
2.	Do joint committee members have access to material safety data sheets?			
3.	Are workers informed (by hazard signs and tags)?			
4.	Have all trucks, forklifts and other equipment been inspected and maintained?			
5.	Are lockout procedures followed?			
6.	Is ventilation equipment working effectively?			
7.	Is fume and dust collection hood properly adjusted?			
FIRE EMERGENCY PROCEDURES				
1.	Is there a clear fire response plan posted for each work area?			
2.	Do all workers know the plan?			
3.	Are drills held regularly?			
4.	Are fire extinguishers chosen for the type of fire most likely in that area?			
5.	Are there enough extinguishers present to do the job?			
6.	Are extinguisher locations conspicuously marked?			
7.	Are extinguishers properly mounted and easily accessible?			

FIRE EMERGENCY PROCEDURES				
8.	Are all extinguishers fully charged and operable?			
9.	Are special purpose extinguishers clearly marked?			
MEANS OF EXIT				
1.	Are there enough exits to allow prompt escape?			
2.	Do employees have easy access to exits?			
3.	Are exits unlocked to allow egress?			
4.	Are exits clearly marked?			
5.	Are exits and exit routes equipped with emergency lighting?			
WAREHOUSE AND SHIPPING				
1.	Are dock platforms, bumpers, stairs and steps in good condition?			
2.	Are light fixtures in good condition?			
3.	Are all work areas clean and free of debris?			
4.	Are stored materials properly stacked and spaced?			
5.	Are tools kept in their proper place?			
6.	Are there metal containers for oily rags and for rubbish?			
7.	Are floors free of oil spillage or leakage?			
8.	Is absorbent available for immediate clean-up of spills and leaks?			
9.	Are all flammable and combustible products stored appropriately?			
LOADING/UNLOADING RACKS				
1.	Are steps, railings and retractable ramps on raised platforms in good repair?			
2.	Is piping and in-line equipment in good condition and free of leaks?			
3.	Are loading arms operating satisfactorily?			

LOADING/UNLOADING RACKS				
4.	Do submerged filling two-stage valves operate properly?			
5.	Are bonding and grounding cables free of breaks?			
6.	Are connections tight and sound?			
7.	Is the general condition of wiring and junction boxes, etc. in good condition (visual inspection)?			
LIGHTING				
1.	Is the level of light adequate for safe and comfortable performance of work?			
2.	Does lighting produce glare on work surfaces, VDT screen and keyboards?			
3.	Is emergency lighting adequate and regularly tested?			
MACHINE GUARDS				
1.	Are all dangerous machine parts adequately guarded?			
2.	Do machine guards meet standards?			
3.	Are lockout procedures followed when performing maintenance with guards removed?			
ELECTRICAL				
1.	Is the ECA (Electrical Contractors Association) or SABS (South African Bureau for Standards) Electrical Code adhered to in operation, use, repair and maintenance?			
2.	Are all machines properly grounded?			
3.	Are portable hand tools grounded or double insulated?			
4.	Are junction boxes closed?			
5.	Are extension cords out of the aisles where they can be abused by heavy traffic?			
6.	Are extension cords being used as permanent wiring?			

TOOLS AND MACHINERY				
1.	Are manufacturers' manuals kept for all tools and machinery?			
2.	Do power tools conform to standards?			
3.	Are tools properly designed for use by employees?			
4.	Are defective tools tagged and removed from service as part of a regular maintenance program?			
5.	Are tools and machinery used so as to avoid electrical hazards?			
6.	Is proper training given in the safe use of tools and machinery?			
CONFINED SPACES				
1.	Are entry and exit procedures available and adequate?			
2.	Are emergency and rescue procedures in place (e.g. trained safety watchers)?			
HOUSEKEEPING				
1.	Is the work area clean and orderly?			
2.	Are floors free from protruding nails, splinters, holes and loose boards?			
3.	Are aisles and passageways kept clear of obstructions?			
4.	Are permanent aisles and passageways clearly marked?			
5.	Are covers or guardrails in place around open pits, tanks and ditches?			
FLOOR AND WALL OPENINGS				
1.	Are ladder-ways and door openings guarded by a railing?			
2.	Do temporary floor openings have standard railings or someone constantly on guard?			
SOUND LEVEL/NOISE				
1.	Are regular noise surveys conducted?			
2.	Is hearing protection available?			

TEMPORARY WORK STRUCTURES				
1.	Are temporary work structures used only when it is not reasonably practicable to use permanent ones?			
2.	Are excavations properly shored, free of large objects (rocks, etc.) at the edges?			
EMPLOYEE FACILITIES				
1.	Are facilities kept clean and sanitary?			
2.	Are facilities in good repair?			
3.	Are cafeteria facilities provided away from toxic chemicals?			
MEDICAL AND FIRST AID				
1.	Is there a hospital or clinic nearby?			
2.	Are there employees trained as first-aid practitioners on each shift worked?			
3.	Are physician-approved first-aid supplies available?			
4.	Are first-aid supplies replenished as they are used?			
PERSONAL PROTECTIVE EQUIPMENT				
1.	Is required equipment provided, maintained and used?			
2.	Does equipment meet requirements?			
3.	Is it reliable?			
4.	Is personal protection utilized only when it is not reasonably practicable to eliminate or control the hazardous substance or process?			
5.	Are warning signs prominently displayed in all hazard areas?			
MATERIALS HANDLING AND STORAGE				
1.	Is there safe clearance for all equipment through aisles and doors?			
2.	Is stored material stable and secure?			
3.	Are storage areas free from tipping hazards?			
4.	Is charging of electric batteries performed only in designated areas?			

MATERIALS HANDLING AND STORAGE				
5.	Are dock boards (bridge plates) used when loading or unloading from dock to truck or dock to rail car?			
6.	Are necessary warning devices and signs in use for railway sidings?			
7.	Are specifications posted for maximum loads which are approved for shelving, floors and roofs?			
8.	Are racks and platforms loaded only within the limits of their capacity?			
9.	Are chain hoists, ropes and slings adequate for the loads and marked accordingly?			
10.	Are slings inspected daily before use?			
11.	Are all new, repaired, or reconditioned alloy steel chain slings proof-tested before use?			
12.	Are pallets and skids the correct type and inspected?			
13.	Do personnel use proper lifting techniques?			
14.	Is the size and condition of containers hazardous to workers?			
15.	Are elevators, hoists, conveyors, balers, etc., properly used with appropriate signals and directional warning signs?			

QUESTION 7.

Complete the attached report form to report all the identified hazards during the workplace inspection you have performed during the previous learning activity.

Requirements achieved	YES		NO

QUESTION 8.

Define a unsafe condition. Provide at least five examples of unsafe conditions in your workplace.

Unsafe conditions are any situation existing in the working environment which is a departure from accepted standards which, if not rectified, may be the cause of accidents.

Common Unsafe Conditions

- ♦ Unsupported roof
- ♦ Unsafe construction
- ♦ Defective equipment or machinery
- ♦ Lack of machine and other guards
- ♦ Defective working surfaces such as sharp or slippery surfaces
- ♦ Unsafe floor conditions
- ♦ Overcrowding
- ♦ Defective safety devices
- ♦ No PPE stock
- ♦ Inadequate ventilation
- ♦ Unsafe illumination
- ♦ Unsafe storage/stacking, etc.

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

1. Human error/inefficiency

- ☐ Operating without authority
- ☐ Operating at unsafe speed
- ☐ Making safety devices inoperative
- ☐ Using unsafe equipment
- ☐ Using equipment unsafely
- ☐ Unsafe loading, placing, mixing
- ☐ Taking unsafe position
- ☐ Working on moving or unsafe equipment
- ☐ Distracting, teasing, horseplay
- ☐ Failure to use protective equipment
- ☐ Safety regulations ignored

2. High risk conditions

- ☐ Inadequately guarded
- ☐ Unguarded
- ☐ Defective tools, equipment or substance
- ☐ Hazardous arrangement
- ☐ Unsafe design or construction
- ☐ Poor lighting
- ☐ Unsafe clothing
- ☐ Poor floor conditions
- ☐ Poor ventilation
- ☐ Other

3. Personal factors

- ☐ Lack of knowledge or skill
- ☐ Physical/mental defect
- ☐ Improper attitude or motivation

4. Job factors

- ☐ Inadequate work standards
- ☐ High risk conditions

5. Control steps to prevent a recurrence**Personal factors**

- ☐ Attend training course
- ☐ Instruct how to do or follow revised work standard
- ☐ Have medically examined, hearing/eyesight/alcohol/drugs/disability
- ☐ Transfer to another job
- ☐ Attend safety committee meetings
- ☐ Enforce/warn

Job factors

- ☐ Write work standards
- ☐ Revise work standards
- ☐ Guard
- ☐ Repair
- ☐ Modify
- ☐ Lockout
- ☐ Housekeeping
- ☐ Remove
- ☐ Provide protection

Remarks by Health and Safety Committee			
Remarks by Department of Labour:			

QUESTION 10.**Multiple choice questions**

01. The duties of employers are.....

- [A] To ensure safety
- [B] Supply adequate of health and safety equipment
- [C] Ensure the employee comply to the Act
- [D] All of the above**

02. Every company with _____ employees must have a health and safety representative for each shift at each designated working place at the mine.

- [A] 20 and more;
- [B] 100 and more;
- [C] 50 and more;**
- [D] 200 and more;

03. Every company _____ employees must have one or more health and safety committees.

- [A] 20 and more;**
- [B] 100 and more;
- [C] 50 and more;
- [D] 200 and more;

04. To qualify to serve as a health and safety representative, an employee must:

- [A] Be employed as a contractor in the designated working place.
- [B] A and C
- [C] Be acquainted with conditions and activities at the designated working place.
- [D] None of the above**

05. An employer shall in respect of each workplace where _____ or more health and safety representatives have been designated, establish one or more health and safety committees

- [A] Two
- [B] Three
- [C] One
- [D] Five**

- 06. To handle a worker complaint you should.....**
- [A] Investigate the complaint to ensure that it is a genuine problem, which cannot be solved immediately.
 - [B] Find out as much as possible from the worker as how he sees the complaint.**
 - [C] Report to the Union
 - [D] A and B.
- 07. An incident is an _____ often caused by unsafe acts and/or conditions that results in, or has the potential for, physical harm to persons and/or damage to property and/or business interruption.**
- [A] Undesired event**
 - [B] Desired event
 - [C] Accident
 - [D] None of the above.
- 08. Unsafe acts are normally a violation of an accepted safe procedure which could permit the occurrence of an accident.**
- [A] Accepted safe procedure**
 - [B] Unaccepted safe procedure
 - [C] Accompanied by a certificate from a service provider stating or declaring that the applicant have attended a training program.
 - [D] None of the above.
- 09. Unsafe conditions are any situation existing in the working environment which is a departure from _____ which, if not rectified, may be the cause of accidents.**
- [A] Accepted safe procedure
 - [B] Un-accepted standards
 - [C] Accepted standards
 - [D] Unaccepted safe procedure**
- 10. Examples of unsafe conditions are**
- [A] Unsupported roof, unsafe construction, Defective equipment or machinery**
 - [B] A and B
 - [C] Lack of machine and other guards, Defective working surfaces such as sharp or slippery surfaces, unsafe floor conditions**
 - [D] None of the above.
- 11. Good housekeeping means a place for everything and everything in its place _____**
- [A] Every now and then
 - [B] Occasionally
 - [C] One a month
 - [D] All the time.**

12. Examples of accidents due to poor housekeeping?

- [A] People tripping over loose objects on floors and articles dropping from above.
- [B] People slipping on greasy, wet or dirty floors
- [C] People bumping against projecting, poorly piled or badly placed materials.
- [D] **All of the above.**

13. Reasons for good housekeeping?

- [A] Space is created when everything is stacked away, It is nice to have everything right, Fire hazards are reduced.
- [B] Space is saved when everything is stacked away tidily, It cuts down the time spent looking for goods, Fire hazards are reduced.
- [C] **Space is saved when everything is stacked away tidily, It cuts down the time spent looking for goods, Fire hazards are reduced.**
- [D] Space is saved when everything is stacked away tidily, It cuts down the time spent looking for goods, Fire hazards are identified.

14. Inspections are essential in the working place because _____

- [A] **They help us to improve workplace safety by identifying sub standards.**
- [B] They help us to create a workplace safety environment by identifying standards.
- [C] They help us to improve workplace safety by identifying accidents.
- [D] None of the above.

15. “HAZARD” _____ health or which may destroy or damage something or somebody, anything we can see, feel, touch, and smell.

- [A] Means unsafe acts which are normally a violation of an accepted safe procedure which could permit the occurrence of an accident.
- [B] **Means a source of or exposure to danger**
- [C] Means an unsafe conditions which are any situation existing in the working environment
- [D] None of the above.

Requirements achieved	YES	NO
-----------------------	-----	----

Comments in support of decision

QUESTION 11: Explain what is meant by the following “ All workers needs on the job training to improve their skills and knowledge”

From the above definition, it is clear that this type of training does not include formal courses that a learner needs to attend at a formal training institution.

The purpose of this type of training is to equip the employee with the necessary knowledge and skills to carry out his/her job, resulting into behavioral change. On-the-job training does not overlap formal courses, but is supplementary to formal courses as it covers those aspects that are important to the post, but were not dealt with during the formal training course.

It might be that the MD wishes to develop the facilitation skills of his/her personnel or train them on how to write a scientific report. However, it should be connected directly with the employee’s ability to carry out the tasks connected to his/her job; otherwise it cannot be regarded as on-the-job-training.

The immediate supervisor is usually responsible for on-the-job training, but the task may be delegated to someone else. Just keep in mind that a task can be delegated, but not the responsibility and accountability that accompanies the task. The immediate supervisor will still stay the responsible and accountable person who has to ensure the quality of services provided.

Requirements achieved	YES		NO
