HOW THIS LEARNER WORKBOOK IS COMPILED

This unit standard is designed to provide credits towards the mathematical literacy requirements of the NQF at level 2. The essential purposes of the mathematical literacy requirements are that, as the learner progresses with confidence through the levels, the learner will grow in:

- ♦ An insightful use of mathematics in the management of the needs of everyday living to become a self-managing person.
- ♦ An understanding of mathematical applications that provides insight into the learner's present and future occupational experiences and so develop into a contributing worker.
- ♦ The ability to voice a critical sensitivity to the role of mathematics in a democratic society and so become a participating citizen.

People credited with this unit standard are able to:

- ♦ Convert numbers between the decimal number system and binary number system.
- ♦ Work with numbers in different ways to express size/magnitude.
- ♦ Demonstrate the effect of error in calculations.

You have to study the content and guidelines given in your learner reference guide to complete this workbook.

Remember that this completed workbook must be handed in as it will form part of your formative assessment and will play a role in awarding you the required 05 credits that are to be achieved upon completion of this module.

Write neatly and legibly and ensure that you do not simply copy the information contained in the learner reference guide into your workbook. Give your own opinion and ideas where applicable and write the answers in your own words to indicate your level of understanding and learning.

Good luck with the completion of this workbook.

UNIT STANDARD 9010: Demonstrate an understanding of the use of different number bases and measurement units and an awareness of error in the context of relevant calculations.

4

LEARNING UNIT 1

Number systems and conversions

LEARNING OUTCOMES

A learning credited with this unit will be able to:

- ♦ Represent numbers in different ways.
- ♦ Round different types of numbers.
- ♦ Work with rational and irrational numbers and proper and improper fractions.
- ♦ Perform arithmetic with fractions.
- ♦ Calculate error ranges that result from arithmetic with rounded numbers.
- ♦ Estimate the correct answer to an arithmetic problem.
- ♦ Convert numbers between the decimal and binary systems.
- ♦ Perform addition and subtraction with binary numbers.
- ♦ Understand and work with the SI system of units.
- ♦ Understand the relationship between the SI system and other number systems.
- ♦ Estimate sizes of objects in the SI and UK systems.

LEARNER ACTIVITY 1

Using the columns given, convert the following numbers from binary to decimal:

♦ 111_2

⁶ 2	⁵ 2	⁴ 2	³ 2	² 2	¹ 2	⁰ 2
64's	32's	16's	8's	4's	2's	1's

♦ 11001_2

⁶ 2	⁵ 2	⁴ 2	³ 2	² 2	¹ 2	⁰ 2
64's	32's	16's	8's	4's	2's	1's

♦ 101_2

⁶ 2	⁵ 2	⁴ 2	³ 2	² 2	¹ 2	⁰ 2
64's	32's	16's	8's	4's	2's	1's

Requirements achieved	YES	NO

LEARNER ACTIVITY 2

Convert the following numbers from decimal to binary:

- a) 35
- b) 22
- c) 57

This image shows a blank sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

9

This image shows a blank sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Add the following binary numbers:(Convert these binary numbers to decimal numbers at the end and check to see if the addition is correct)

[illegible]

11

[illegible]

Add the following binary numbers:(Convert these binary numbers to decimal numbers at the end and check to see if the addition is correct)

This image shows a blank sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

13

[illegible]

Add the following binary numbers:(Convert these binary numbers to decimal numbers at the end and check to see if the addition is correct)

◆ $1100_2 + 1101_2$

15

This image shows a blank sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Requirements achieved	YES	NO
Comments in support of decision		

Subtract the following binary numbers: (Convert these binary numbers to decimal numbers at the end and check to see if the addition is correct)

[illegible]

17

[illegible]

Subtract the following binary numbers: (Convert these binary numbers to decimal numbers at the end and check to see if the addition is correct)

Convert the following numbers from scientific to decimal notation:

$$\begin{array}{ll} \text{a)} & 1,23 \times 10^6 \\ \text{b)} & 5,16 \times 10^{-3} \end{array}$$

$$\text{b) } 5,16 \times 10^{-3}$$

25

[illegible]

Convert the following measurements as instructed, writing your answers in scientific notation where necessary.

-
- This image shows a blank sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins or other markings on the paper.

27

[illegible]

- ◆ The boiling point of water is 100°C . You have a tank that has a temperature control in degrees Fahrenheit. What must you set the temperature to in order to boil the water in the tank?
- ◆ Danny is an operator at a bottling plant. Each bottle has a volume of 500 ml. He is given an export order to the USA for 400 gallons of vinegar.
 - i) How many bottles must he fill?
 - ii) Danny's colleague checks his calculations, but he rounds off the conversion rate to 3,8 litres. How many extra bottles would he have filled?
 - iii) The sales manager who took the order has rounded off the conversion rate to the nearest litre. How many bottles has he quoted for?

This image shows a blank sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

SELF-ASSESSMENT

The learner must make use of the following self-evaluation checklist to rate himself against the learning outcomes of this particular training module in establishing the level of mastery of the information.

1. Not able to comply
2. Reasonable compliance (Not acceptable for final evaluation)
3. Able to comply fully

LEARNING OUTCOMES		1	2	3
1	Represent numbers in different ways.			
2	Round different types of numbers.			
3	Work with rational and irrational numbers and proper and improper fractions.			
4	Perform arithmetic with fractions.			
5	Calculate error ranges that result from arithmetic with rounded numbers.			
6	Estimate the correct answer to an arithmetic problem.			
7	Convert numbers between the decimal and binary systems.			
8	Perform addition and subtraction with binary numbers.			
9	Understand and work with the SI system of units.			
10	Understand the relationship between the SI system and other number systems.			
11	Estimate sizes of objects in the SI and UK systems.
