HOW THIS LEARNER WORKBOOK IS COMPILED

This learner workbook has been compiled to lead learners towards achieving knowledge, skills and attitudes that would enable them to prepare and conduct hand over and take over responsibilities when assuming or relinquishing duties.

1. Prepare for a security patrol.
2. Conduct security patrol.
3. Conclude a security patrol.
4. Demonstrate knowledge of handgun use under adverse conditions.

You have to study the content and guidelines given in your learner reference guide to complete this workbook.

Remember that this completed workbook must be handed in as it will form part of your formative assessment and will play a role in awarding you the required 07 credits that are to be achieved upon completion of this module.

Write neatly and legibly and ensure that you do not simply copy the information contained in the learner reference guide into your workbook. Give your own opinion and ideas where applicable and write the answers in your own words to indicate your level of understanding and learning.

Good luck with the completion of this workbook.

LEARNING UNIT 1

The Patrolling Function

- ♦ Explain and understand the purpose for conducting a patrol.
- ♦ Demonstrate knowledge by explaining the concepts of:
 - ⇒ Denial
 - ⇒ Detection
 - ⇒ Deterrence
- ♦ Demonstrate knowledge by explaining the patrolling function a deterrent method
- ♦ Demonstrate knowledge by explaining the patrolling function a prevention method.
- ♦ Demonstrate knowledge and skills by explaining and performing an aggressive patrol.
- ♦ Demonstrate knowledge and skills by explaining and performing an Conspicuous and inconspicuous patrol.
- ♦ Demonstrate knowledge and skills by explaining and performing the following patrol types.
 - ⇒ External Patrols /foot patrols
 - ⇒ Vehicle patrols/motorcycles
 - ⇒ Bicycles
 - ⇒ Internal Patrol

LEARNER ACTIVITY 1 (page 14)

Explain the purpose of performing an patrol. In your explanation you need to discuss the following:

- ♦ **Denial**
- ♦ **Detection**
- ♦ **Deterrence**

Denial

Denial involves those factors which presents an unauthorised person from entering a property.

This is the first line of defence and includes all the measures and aids which prevents an unauthorised person from entering the premises. This includes the following:

- ♦ Gates
- ♦ Guards
- ♦ Perimeter fences, etc.

If a person is denied access to a specific area he must think of another way to achieve his or her aim. However , if he is successful and does get into the area , the second “D” , detection comes into play.

Detection

Detection may be achieved in a number of ways. The two most common types are the use of guards and alarms.

If detection is to be effective, it must be immediate. An must be discovered, apprehended and removed before he has the opportunity to commit a crime.

Deterrence

The more barriers for the intruder to encounter the lesser his chances become in achieving his aim. Quite often this psychological deterrent is enough to turn him away.

This is the final back-up and the security officer must have proper knowledge of the following:

- ♦ In depth knowledge of aids available.
- ♦ How to use aids effectively
- ♦ Immediate action drills

LEARNER ACTIVITY 2 (page 15)

Explain how a patrol should be performed to prevent a crime to be taken place.

- ♦ Patrol is the most common form of law enforcement activity designed to reduce opportunity for crime or to create the belief that no opportunity exists. Security companies randomly providing intensive patrol service represent the community's most apparent and continuous effort to hold crime in check.
- ♦ Offenses against which conspicuous patrol is most effective are those which are committed on or immediately.
- ♦ Patrol, a term used to describe a wide range of security activities, has broader crime prevention potential than simply the effect achieved by the physical presence of an security officer at a gate. Patrol includes contacts which occur between the officer and the persons on his shift. In this sense, prevention achieved through patrol becomes even more important since it is "you" who serves as the "expert" on crime for the clients. The patrol officer is looked upon as the source of timely warnings regarding special crime problems.
- ♦ Time spent on patrol, to have real value in prevention, must include periodic inspections of businesses to ensure:
 - ⇒ That locks are adequate,
 - ⇒ That all openings to the building are thoroughly secure,
 - ⇒ That night lights are kept burning

[illegible]

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

LEARNER ACTIVITY 3 (page 16)

Explain and demonstrate how a aggressive patrol should be performed.

The assessor will give you a patrol route. This is a verbal assessment. While you perform the patrol you should explained how it needs to be done.

- ♦ Security action cannot deal effectively with the DESIRE of the offender, but it can deal with the suspects belief that the opportunity for criminal activity is present.
- ⇒ To create the belief that the opportunity does not exist, security officers must take measures which place them most frequently in the locations of criminal activity at the times when that activity is greatest. In other words, the criminal must be convinced that there is such patrol coverage in such strength that the risks involved are too great.
- ⇒ The criminal is a gambler. He measures his desire to commit a crime against the chances of being caught.

When the chances of apprehension are low, for example, when patrol coverage is weak or lacking, the crime will be committed and the criminal will escape.

- ⇒ Risks are considered to be too great where aggressive patrol impresses upon the criminal the idea that his activity will either be observed or will result in his apprehension.
- ⇒ The person planning a burglary can be convinced that the opportunity to do so does not exist where he knows patrol officers are active and alert. Just walking, or driving around your area is not patrolling, you must be active and alert.

This image shows a blank sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

LEARNER ACTIVITY 4 (page 17)

Explain and demonstrate how a conspicuous patrol should be performed.

The assessor will give you a patrol route. This is a verbal assessment. While you perform the patrol you should explained how it needs to be done.

This is high visibility patrol with random movement in marked patrol cars. It involves activities which are intended to influence the perceptions of potential criminals as to the likelihood of their being apprehended. By increasing visibility and patrol presence, you intensify the perceived risk of crime and reduce its incidence. This is done by:

- ♦ Staying in the public's eye
- ♦ Patrolling troubled areas
- ♦ Field interviewing potential criminals

[illegible]

Requirements achieved	YES	NO
-----------------------	-----	----

Comments in support of decision

LEARNER ACTIVITY 5 (page 17)

Explain and demonstrate how a in-conspicuous patrol should be performed.

The assessor will give you a patrol route. This is a verbal assessment. While you perform the patrol you should explained how it needs to be done.

The primary purpose is to catch the criminal in the act and make apprehensions, doing so by low visibility in unmarked cars, hiding when performing a foot patrol by:

- ♦ Walking in shadows
- ♦ Walking behind lights and
- ♦ Stop frequently to listen.

It is designed more for apprehension than prevention. Once arrests are made from this the word will travel there are officers in areas which hide or drive with unmarked cars in the area, and the presence of patrol will be reinforced, thereby adding to the prevention of further crime."

This image shows a blank sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins or other markings on the paper.

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

LEARNER ACTIVITY 6 (page 18)

Explain the following patrol types:

- ♦ **External patrols**
- ♦ **Vehicle patrols.**
- ♦ **Internal patrols.**

- ♦ **External patrols**

External patrols covers the grounds, parking areas and streets surrounding the facility buildings.

The basic purpose of the external patrol is.....

- ♦ to protect vehicles and persons entering or leaving the grounds,
- ♦ to provide surveillance of persons attempting to use unauthorised exits,
- ♦ to prevent the carrying of unauthorised property from the facility,
- ♦ and to prohibit or discourage unwanted persons from enter the facility.

- ♦ **Vehicle patrols.**

Vehicle patrols: Can support external patrols either by supplementing foot patrols or in place of them. A prerequisite for a security officer prior to operating a motorised vehicle is to possess a driver's licence. A vehicle offers a security officer mobility while providing protection from the elements. Additionally a vehicle permits a security officer to carry more equipment which can be readily used when needed.

- ♦ **Internal patrols.**

Internal Patrol: internal patrols are a key element in an overall loss prevention program and are an integral part of the daily duties of security personnel. Generally internal patrols are conducted for the same reason as external patrols, to observe, act and report on abnormal or unusual conditions. As part of internal patrols, security personnel should include the following;

- Checking doors and windows, correcting and reporting abnormal conditions (i.e. open, closed, locked, unlocked)
- Checking machinery and/or maintenance instruments.
- Observing fire protection equipment (sprinklers, risers, fire exit, etc) for proper condition.
- General observations.

SELF-ASSESSMENT

The learner must make use of the following self-evaluation checklist to rate himself against the learning outcomes of this particular training module in establishing the level of mastery of the information.

1. Not able to comply
2. Reasonable compliance (Not acceptable for final evaluation)
3. Able to comply fully

LEARNING OUTCOMES		1	2	3
1	Explain and understand the purpose for conducting a patrol.			
2	Demonstrate knowledge by explaining the concepts of: ⇒ Denial ⇒ Detection ⇒ Deterrence			
3	Demonstrate knowledge by explaining the patrolling function a deterrent method.			
4	Demonstrate knowledge by explaining the patrolling function a prevention method.			
5	Demonstrate knowledge and skills by explaining and performing an aggressive patrol.			
6	Demonstrate knowledge and skills by explaining and performing an Conspicuous and inconspicuous patrol.			
7	Demonstrate knowledge and skills by explaining and performing the following patrol types. ⇒ External Patrols /foot patrols ⇒ Vehicle patrols/motorcycles ⇒ Bicycles ⇒ Internal Patrol

LEARNING UNIT 2

Identify and monitor security risks

- ♦ Explain what the term 'risk' is.
- ♦ Demonstrate knowledge by explaining what is meant by risk/threat elimination.
- ♦ Demonstrate knowledge and skills by performing a threat prioritization exercise.
- ♦ Demonstrate knowledge and skills by performing a threat analyses while doing a patrol.
- ♦ Use a security survey sheet to constantly monitor threats of a security site.

LEARNER ACTIVITY 1 (page 31)**Define the term risk**

According to Valsamakis et al (1996:24) Athearn & Pritchett define risk simply as a condition in which loss or losses are possible. Pure risks involve only the possibilities of loss or no loss.

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

LEARNER ACTIVITY 2 (page 32)**What does the term risk elimination refers to.**

Prevention through risk elimination or control, rather than insurance policies, is the best means of protecting assets. In addition, it is recognised that regardless the insurance coverage a company may have, full compensation for losses is virtually impossible.

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

LEARNER ACTIVITY 3 (page 33)**Explain the meaning of asset risk prioritization.**

After the internal and external environment have been scanned for information on crime, it is necessary to identify assets that are going to be the most prone to criminal activity.

This is based on the information obtained from your patrol, internal and external environment.

Risk Control begins, logically, with the identification and classification of risk. To accomplish this task it is necessary to examine or survey all the activities and relationships of the enterprise in question and to develop answers to these basic considerations;

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

LEARNER ACTIVITY 4

Conduct a complete risk assessment. The assessor will provide you with a patrol route and the necessary resources he/she requires from you.

Use the attached documentation to complete your assessment.

LEARNING UNIT 3

Reporting systems

- ◆ Explain and understand why safety and security breaches needs to be reported.
- ◆ Complete the following reporting instruments as a method of reporting incidents:
 - ⇒ Operational security report.
 - ⇒ Statement.
 - ⇒ Occurrence book
 - ⇒ Pocket book
 - ⇒ Incident report
- ◆ Explain the important issues that needs to be reported during a security patrol.
- ◆ Explain the consequences for not reporting security concerns.

LEARNER ACTIVITY 1

CASE STUDY: Read the case study below and record the situation on the attached documentation.

- ♦ OB
- ♦ Pocket book
- ♦ Incident report.
- ♦ Report

Obtain all the necessary information from the case study below. The documentation needs to be complete and contain all the necessary and correct information as outlined in the case study.

The sound of thunder and bright flashes in the sky may have been a wonderful spectacle last night, but what I didn't realize was that it would cause one of the worst days of my life. I did not know about the power failure at three this morning because I was fast asleep. The first time I realized that my alarm did not go off, was at $\frac{1}{4}$ past five this morning – which meant that I was going to be late for work. I rushed while getting dressed and did not have time to iron my uniform because I had to run to get the last taxi. In my haste I forgot to put my pocket book in my pocket, and I could not find my shoes, so I wore takies instead.

I actually made it to work, only 7 minutes late. My co-worker that had just finished night shift was not very impressed with me because he still had to do the handover. He was going to miss his taxi and would have to wait at least $\frac{1}{2}$ hour for the next one. Because I felt guilty about coming late, I told him to go – I would read the OB to get the details of the night shift....

It looked like things were eventually settling down to a normal, boring working day. Cars stop, "morning sir", "who are you visiting sir", "that would be at block C – second building on the left", "have a nice day sir". The same thing, over and over. Sometimes I feel like a tape recorder. Cars come, cars go.

In the mean time I'm still a bit unsettled from all the rushing around this morning and tired from lack of sleep because I had to settle the kids down who were crying because they're scared of the thunder and lightning.

Then the blue BMW stops at the gate about 09:20 . He hoots. So I wasn't quite as observant as I am supposed to be – I am tired, you know. I paste my smile on my face and walk up to the driver's window.

I get as far as saying: "Good morning, Sir."

"Good? – good???; so what's good about it?"

"Where is Mr. Brown? It's ten past nine. These \$%# taxis! They caused an accident that has made me late! Open this #%^ boom!"

"Sir", I say, "I have to search your vehicle before you enter." And I think to myself that this guy is so rude - I haven't done anything to him!

"Never mind about my boot, open this gate, you \$|%&*@& "%&*(%\$(*%\$*0%)@*"

By now I'm getting very upset. Who does he think he is to swear at me and call me names? I'll show him....

"Sir, please get out of your vehicle and open the boot. I will not let you pass until I have searched your vehicle!" I tell him.

"Yes, you *%(%^(%#*% - I'll get out" - he swears at me again. Now he's done it. There's no way that someone insults my mother like that and gets away with it. I will search every inch of his car, and today is the day that he will not pass my boom.

He gets out of the car, and that's the last thing I remember before I see my supervisor's face and feel him shaking me. I am lying on the ground, and the boom is pointing up into the sky with blue BMW paint all over it. My jaw hurts like hell...

LEARNING UNIT 4

Patrol preparations

- ♦ Demonstrate knowledge pertaining the importance of patrol preparation.
- ♦ Demonstrate knowledge of patrol preparation by explaining the various role players involved during patrol preparations.
- ♦ Demonstrate knowledge and skills by explaining maintenance check for all security equipment applicable to patrolling.

LEARNER ACTIVITY 1

Demonstrate the correct care and maintenance of a flash light during a pre-shift check.

		Yes	No	Comments
Did the learner:				
1.	Check the lamp to ensure that it is working.			
2.	Check the battery for good working condition and if it is charged.			
3.	Check the general condition of the flash light.			
Requirements met				

Comments in support of decision

LEARNER ACTIVITY 2 (page 70)

Explain in your own words the pre-shift check that needs to be done on handcuffs.

Pre-shift checks**Pouch**

- No tears in the canvas material.
- The metal rivets are securely in place with no tears in the material around them.

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

LEARNER ACTIVITY 3 (page 66)**Identify at least 5 critical areas of a two way radio that needs to be inspected during a hand over of a shift**

During hand over and take over of shifts the officer needs to take note of the working conditions of the following:

- ♦ Antenna
- ♦ Battery
- ♦ On/Off switch
- ♦ Volume
- ♦ Squelch
- ♦ Radio number
- ♦ Condition of radio
- ♦ Channel

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

LEARNER ACTIVITY 4**Demonstrate the care and maintenance of defensive sprays.**

		Yes	No	Comments
Did the learner:				
1.	Ensure that the safety seal, which indicates whether the trigger has been activated, is still in place.			
2.	Make sure that the pouch is not damaged in any way.			
3.	Check for visible sign of damage to the canister, trigger and safety seal.			
4.	If the seal has been broken, the trigger or pouch damaged or it feels very light, refuse to accept it and request a new canister.			
Requirements met				

Comments in support of decision

LEARNER ACTIVITY 5**Demonstrate the care and maintenance of hand held metal detectors.**

		Yes	No	Comments
Did the learner:				
1.	Check for visible signs of damage to the casing of the HHMD			
2.	Change the battery when hearing the low battery signal.			
3.	Test the unit on himself or a colleague before going on duty, to make sure that it would sense metal objects.			
Requirements met				

Comments in support of decision

LEARNER ACTIVITY 6

Demonstrate the correct care and maintenance of a flash light during a pre-shift check.

		Yes	No	Comments
Did the learner:				
1.	Check the lamp to ensure that it is working.			
2.	Check the battery for good working condition and if it is charged.			
3.	Check the general condition of the flash light.			
Requirements met				

Comments in support of decision

LEARNER ACTIVITY 7 (page 61)

List the equipment that the security officer needs to check before he/she can leave the site to perform a patrol.

- ♦ Credentials
- ♦ Keys
- ♦ Two way radios
- ♦ Handcuffs
- ♦ Firearms
- ♦ Flashlight, light, and batteries
- ♦ Documentation
- ♦ Pen/pencil
- ♦ Pocket book
- ♦ Batons
- ♦ Mace/OC pepper canisters
- ♦ Electronic equipment
- ♦ Body armor

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

LEARNER ACTIVITY 8 (page 65)**Discuss the role players involved during the preparation of a patrol.**

Role Players: security officers must determine who the role players are in terms of their roles and responsibilities at the facility.

It is of the utmost importance that security breaches detected during security patrols are reported to the correct agencies:

- ♦ Backup patrol officers
- ♦ SAPS
- ♦ Emergency Services
- ♦ Site managers
- ♦ Control supervisor

This should be done in accordance to company / facility standard operating procedures.

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

SELF-ASSESSMENT

The learner must make use of the following self-evaluation checklist to rate himself against the learning outcomes of this particular training module in establishing the level of mastery of the information.

LEARNING UNIT 5

Conduct the patrol

- ♦ Demonstrate knowledge and skills in approaching techniques for the following:
 - ⇒ Approaching/interacting with individuals
 - ⇒ Approaching whilst performing vehicle patrol
- ♦ Demonstrate knowledge by explaining a standard operating procedure applicable to conducting patrols.
- ♦ Explain key elements for detaining persons when committing a criminal offense.
- ♦ Demonstrate knowledge and skills by explaining the conclusion of a security patrol.
- ♦ Demonstrate knowledge and skills by explaining the procedures when dealing with found property whilst performing a patrol.

LEARNER ACTIVITY 1 (page 80)**Explain the approaching techniques when:**

- ♦ **Performing a foot patrol**
- ♦ **Vehicle patrol**
- ♦ **Performing a foot patrol**

Waiting for the proper time and location to stop the subject is as important as the stop itself. Therefore, you may have to follow the subject until the situation presents itself to your advantage. While tailing this person, the officer should follow these procedures:

- ♦ Contact the control room and provide the following information:
 - ⇒ Location of activity
 - ⇒ Number of individuals
 - ⇒ Short description of individuals Try to identify the person, not just the clothing.
 - ⇒ Nature of contact
 - ⇒ Any vehicle information, if pertinent
 - ⇒ Start back-up officer
- ♦ Use concealment and cover when possible to conceal your movements. Care should be taken so as not to draw attraction to your movements. Stay in shadows and behind lights.

Usually cover incorporates concealment, but its salient feature is its capacity for protecting you from being seen.

Darkness is not cover merely because it can hide you only. It is tempting to think of darkness as a shield. Standing back in shadow can give you good concealment.

Night time shadows can sometimes be turned into traps by an unexpected swing of cars headlights. Finding genuine cover and keeping it between you and your adversary is as important in the dark as it is in the daylight.

- ♦ Make your movement as casual as possible. Make him believe that he is the farthest thing from your mind.

♦ Vehicle patrol

The location of the initial stop should afford the officer the best possible safety.

Every effort should be made to reduce the avenues of escape.

- ♦ Stop in the middle of the block, using the building walls as barriers.
- ♦ Avoid stopping near alleys or passage ways.
- ♦ Avoid obstacles which would block your vision if the subject flees.
- ♦ Avoid crowded areas where subject could be lost in the crowd, take hostages, or endanger people.
- ♦ At night, select a well-lighted area.

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

LEARNER ACTIVITY 2 (page 82)**Explain the standard operating procedures for performing a patrol.**

Step 1: Book on duty in Occurrence Book.

Step 2: Book out on patrol in Occurrence Book.

Step 3: Inspect the following for any abnormalities:

- Fence
- Material
- Assets
- Buildings
- Vehicles
- Any other irregularities

Make notes in Pocket Book.

If any abnormalities are found, report it immediately to your Supervisor for rectifying.

Step 4: Book back from patrol in Occurrence Book.

Step 5: Note all abnormalities in the Occurrence Book and also states to whom you have reported it.

Step 6: Report abnormalities to colleague when changing shift.

Number of patrols, in a shift cycle, as per specified site, will be communicated by the Supervisor

Step 7: Book off duty in Occurrence Book.

Requirements achieved	YES		NO	
Comments in support of decision				

LEARNER ACTIVITY 3 (page 83)**Explain the process of detaining a suspect who have been detect and deter.**

A key element of security patrols is not only to **deter and detect** security breaches, but also to detain persons who committed criminal offences. Security patrol officers should however take note of the following:

- ♦ Generally, depending on the context, private security personnel have the same powers as ordinary citizens, drawing most of their powers from the law of contract, the law of property and labour law.
- ♦ Security officers are 'authorized', for instance, to make citizen's arrests, banish trespassers and deny entry, and search personal property by virtue of their status as agents of property owners, employers and 'other powerful persons and institutions in society'.
- ♦ Apart from these legal 'tools' available to private security personnel in the performance of their duties, they also draw on their symbolic status or 'façade of power' and thus rely on public consent and compliance as well as 'public misunderstanding of the law'.

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

LEARNER ACTIVITY 4 (page 85)**Explain the procedure when lost property is found during a patrol.**

Property which is lost or stolen may be found and turned into a patrol officer by clients or simply just found by officers.

When this occurs every effort should be made to establish the owner. The security officer should:

- ◆ Collect the property and obtain all information from the finder. Names and addresses should also be taken from the finder to satisfy reporting requirements.
- ◆ Inspect the property for serial numbers or other identifying numbers to help determine who the rightful owner is.
- ◆ If the serial number is found the officer should record it in the lost/found register as well as the incident in the occurrence book.
- ◆ If no owner can be found the property should be turned into the property control room and complete the required reports.
- ◆ If the owner is found the security officer/control room should contact them and advise them on the procedure to pick up the property.

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

LEARNER ACTIVITY 5 (page 84)**Explain the consequences of not reporting security concerns identified during a patrol.**

After every security patrol an occurrence book entry must be made. If a security breach was discovered during the patrol a security report must always be opened and if needed supported by a statement (refer to detailed discussion under point 3). Any object that is found during a patrol must be recorded in the OB and in the found property book. The object of the found property book is to record all property reported as found on company premises or in company vehicles. Property found elsewhere must be referred to the police. Entries should be serially numbered, with a line ruled immediately beneath each entry. Once an article of found property has been handed in or discovered during a patrol, brief particulars of it should be entered in this register, with the circumstances in which it was found and the name and address of the founder if the property was handed in by some one other than the patrolling security officer. Whenever property is returned to its owner an entry, giving date of return, will be made under the column heading "disposal" and the owner's signature obtained in the appropriate space. Similarly an entry will be made giving particulars of any other disposal of the property, if it is not claimed after a reasonable period.

After each shift change all security equipment must be examined to determine if they are still in working order i.e. radio's, torches etc. Found property must be handed over in accordance to company standard operating procedures. Security officers should note that they should inspect the following registers during handovers and ensure that they reflect all information on what occurred during the security shift or what was detected during security patrols;

- Occurrence Book
- Arms Register
- Lost Property Book
- Disciplinary Register
- Receipt Book
- Duty Register and Duty Rosters
- Security Instruction Register
- Visitors and Personnel Book
- Key Register
- Sick Report Register
- Telephone Message Pads
- Vehicle Register
- Standing Orders
- Phone Numbers of Senior Staff
- Fire Orders
- Alarm and Emergency Orders

SELF-ASSESSMENT

The learner must make use of the following self-evaluation checklist to rate himself against the learning outcomes of this particular training module in establishing the level of mastery of the information.

1. Not able to comply
2. Reasonable compliance (Not acceptable for final evaluation)
3. Able to comply fully

LEARNING OUTCOMES		1	2	3
1	Demonstrate knowledge and skills in approaching techniques for the following: ⇒ Approaching/interacting with individuals ⇒ Approaching whilst performing vehicle patrol			
2	Demonstrate knowledge by explaining a standard operating procedure applicable to conducting patrols.			
3	Explain key elements for detaining persons when committing a criminal offense.			
4	Demonstrate knowledge and skills by explaining the conclusion of a security patrol.			
5	Demonstrate knowledge and skills by explaining the procedures when dealing with found property whilst performing a patrol.
