1: Assessors Guide

1. Instructions to Assessor

Introduction:

This assessment guide has been designed as a generic assessment guide and is intended for use by the accredited Security Industry Training Providers.

Purpose of the assessment

The purpose of summative assessment against this unit standard is to:

- ♦ Award credits to the NQF to learners who are able to Handle and defuse security related conflict

Learning assumptions

The following knowledge, skills, attitude and/or equivalent:

- ♦ A knowledge, comprehension and application of language at NQF 02.

Assessment methods

The following assessment methods will be used for the summative assessments:

- ♦ Written and/or/verbal questioning
- ♦ Product sample and on site assessment

2. Assessment Process

General

- ♦ Use the assessment guide and your latest company policies and standard operating procedures to assess the evidence received from the learner.
- ♦ Use the section: Addition Comments/Questions to note down any further comments or questions on the evidence assessed.
- ♦ Use the model answers as a guideline to assess the learner's answers to the assessment questionnaire.
- ♦ The learner can complete the assessment questionnaire orally. In this case, agree a date, time and venue.
- ♦ Provide the learner with a feedback within 10 working days of receiving the evidence.

Step 1 - Planning for the Assessment

Review this assessment guide to:

- ♦ Ensure that you understand all the requirements of the assessment in terms of evidence required to prove competence.
- ♦ Identify and prepare the learner for the assessment by:
 - ⇒ Completing the Assessment Plan with the learner to discuss and agree the details regarding the assessment.
 - ⇒ Completing the Assessment Preparation Checklist and getting the learner to sign.
- ♦ Ensure that you have familiarized yourself with the following:
 - ⇒ The various patrolling functions and standard operating procedures within the company.

Step 2: Complete the Assessment

- ♦ Collect the evidence in accordance with the methods and evidence requirements specified.
- ♦ Mark each question as correct or incorrect in the “Office Use” column.
- ♦ Record the evidence on the assessment guide and indicate “Competent”, “Not Yet Competent” or “Not Assessed” for each assessment criterion. Note down any comments at the back of the assessment guide.
- ♦ Ask the learner additional questions, if necessary, to clarify points. Record these on the guide.
- ♦ All questions must be complete as per the criteria specified.
- ♦ Answers provided must be similar to the model answers.

Step 3 - After the Assessment

- ♦ Prepare the feedback by writing comprehensive, developmental feedback after each section on the Assignment Sheets. In addition to this, you are required to write a summary overall feedback on the Assessment Guide.
- ♦ Provide the feedback to the learner in a safe, undisturbed in nature.
- ♦ Ensure that your feedback is developmental and supportive in nature.
- ♦ Advise the learner on what action to follow in the event of a “Not Yet Competent” rating.
- ♦ Advise the learner on what action to take where he/she feels the need to appeal against your decision.
- ♦ Allow the learner time to provide you with feedback relevant to the process.
- ♦ Record the learner’s feedback in the guide and ensure that it is given to the person responsible for the quality assurance of assessment tools.
- ♦ Ensure that the learner co-signs the assessment guide to indicate agreement with the feedback.

3. Assessment documentation required:

Step 1: Planning for the Assessment

- ♦ Assessment Plan
- ♦ Assessment Preparation Checklist
- ♦ Assessment Policy (including Appeals)
- ♦ Evidence Matrix
- ♦ Assessment Instruments

Step 2: Conducting the Assessment

- ♦ Assessor Guide
- ♦ Learner's workbook
- ♦ Summative assessment pack

Step 3: After the Assessment

- ♦ Assessment Comments
- ♦ Feedback Report

4. Specific Instructions

Please note that Part 3 Assessment Instruments are not included in this guide and are to be included by the assessor on an individual basis.

The actual summative assessments need to be completed and signed off by both learner and assessor. The assessor will take control of the completed assessment instruments and will file them under the tab for Assessment Evidence.

The completed assessment pack will be kept in safekeeping at the training provider for three months after endorsement by SASSETA and will then be returned to the learner.

Guidelines where an appeal is lodged

The normal appeal procedure prescribed by SASSETA and described by the provider's Quality Management System will be followed.

PRE-ASSESSMENT MEETING CHECKLIST

ACTION	YES/NO	COMMENTS
Set learner at ease; be friendly, polite and professional.		
Explain to the learner and agree on the following issues. 1. The unit standard that will be assessed 2. Date, time, venue and process to be followed during the assessment. 3. Summative assessment tools to be used for the assessment. 4. The assessment plan 5. Purpose of assessment		
Explain to the learner and agree on the role of all involved during the assessment process.		
Identify possible barriers and or disabilities of the learner.		
Explain the meaning and application of RPL.		
Explain, discuss and provide one complete set of the Appeals process documentation.		
Explain to the learner when final results will be available and how feedback will be provided.		
Discuss previous assessment results if applicable.		

I, _____ (initials and surname of learner), DECLARE THE FOLLOWING:

A copy of the unit standard(s) involved has been given to me prior to this meeting. I know I will be assessed against the criteria, which have been set to the applicable unit standards. The criteria have been discussed with me, and the procedures and purpose of the assessment has been clearly explained to me.

I am well aware of the venue, date and time that I will be assessed. I consider the period of time given to me to prepare myself for the assessment to be fair.

I understand clearly that I have the right to appeal against any decision made by the assessor during the assessment of the evidence provided by me, and that I have free access to the appeals procedures attached to this assessment pack. I understand that I have the right to be accompanied by another person during all procedures, and that I have free access to the Training Division of SBV'S Health and Safety Procedures- filed at the offices.

3: Assessment Evidence

Assessment Instruments

The assessment instruments included in this assessment pack are all summative assessment instruments and are to be read in conjunction with the formative assessment instruments contained in the learner workbook. Both formative (workbook) and summative assessments are to be retained as part of the learner's portfolio of evidence.

A number of the assessment instruments contained in this assessment are workplace knowledge based questions.

This means that you will arrange with the learner, a time that is suitable, during which the learner will complete each questions.

QUESTION 1: Explain the purpose of performing an patrol. In your explanation you need to discuss the following:

- ♦ **Denial**
- ♦ **Detection**
- ♦ **Deterrence**

Denial

Denial involves those factors which presents an unauthorised person from entering a property.

This is the first line of defence and includes all the measures and aids which prevents an unauthorised person from entering the premises. This includes the following:

- ♦ Gates
- ♦ Guards
- ♦ Perimeter fences, etc.

If a person is denied access to a specific area he must think of another way to achieve his or her aim. However , if he is successful and does get into the area , the second “D” , detection comes into play.

Detection

Detection may be achieved in a number of ways. The two most common types are the use of guards and alarms.

If detection is to be effective, it must be immediate. An must be discovered, apprehended and removed before he has the opportunity to commit a crime.

Deterrence

The more barriers for the intruder to encounter the lesser his chances become in achieving his aim. Quite often this psychological deterrent is enough to turn him away.

This is the final back-up and the security officer must have proper knowledge of the following:

- ♦ In depth knowledge of aids available.
- ♦ How to use aids effectively
- ♦ Immediate action drills

This image shows a blank sheet of white paper with horizontal ruling lines. The lines are evenly spaced and extend across the width of the page. There are no margins, text, or other markings on the paper.

Requirements achieved	YES	NO
-----------------------	-----	----

Comments in support of decision

QUESTION 2: Explain how a patrol should be performed to prevent a crime to be taken place.

- ♦ Patrol is the most common form of law enforcement activity designed to reduce opportunity for crime or to create the belief that no opportunity exists. Security companies randomly providing intensive patrol service represent the community's most apparent and continuous effort to hold crime in check.
- ♦ Offenses against which conspicuous patrol is most effective are those which are committed on or immediately.
- ♦ Patrol, a term used to describe a wide range of security activities, has broader crime prevention potential than simply the effect achieved by the physical presence of an security officer at a gate. Patrol includes contacts which occur between the officer and the persons on his shift. In this sense, prevention achieved through patrol becomes even more important since it is "you" who serves as the "expert" on crime for the clients. The patrol officer is looked upon as the source of timely warnings regarding special crime problems.
- ♦ Time spent on patrol, to have real value in prevention, must include periodic inspections of businesses to ensure:
 - ⇒ That locks are adequate,
 - ⇒ That all openings to the building are thoroughly secure,
 - ⇒ That night lights are kept burning

This image shows a blank sheet of white paper with horizontal ruling lines. The lines are evenly spaced and extend across the width of the page. There are no margins, text, or other markings on the paper.

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

QUESTION 3: Explain and demonstrate how a conspicuous patrol should be performed.

The assessor will give you a patrol route. This is a verbal assessment. While you perform the patrol you should explained how it needs to be done.

- ♦ Security action cannot deal effectively with the DESIRE of the offender, but it can deal with the suspects belief that the opportunity for criminal activity is present.
- ⇒ To create the belief that the opportunity does not exist, security officers must take measures which place them most frequently in the locations of criminal activity at the times when that activity is greatest. In other words, the criminal must be convinced that there is such patrol coverage in such strength that the risks involved are too great.
- ⇒ The criminal is a gambler. He measures his desire to commit a crime against the chances of being caught.

When the chances of apprehension are low, for example, when patrol coverage is weak or lacking, the crime will be committed and the criminal will escape.

- ⇒ Risks are considered to be too great where aggressive patrol impresses upon the criminal the idea that his activity will either be observed or will result in his apprehension.
- ⇒ The person planning a burglary can be convinced that the opportunity to do so does not exist where he knows patrol officers are active and alert. Just walking, or driving around your area is not patrolling, you must be active and alert.

QUESTION 4: Explain the following patrol types:

- ♦ **External patrols**
- ♦ **Vehicle patrols.**
- ♦ **Internal patrols.**

- ♦ **External patrols**

External patrols covers the grounds, parking areas and streets surrounding the facility buildings.

The basic purpose of the external patrol is.....

- ♦ to protect vehicles and persons entering or leaving the grounds,
- ♦ to provide surveillance of persons attempting to use unauthorised exits,
- ♦ to prevent the carrying of unauthorised property from the facility,
- ♦ and to prohibit or discourage unwanted persons from enter the facility.

- ♦ **Vehicle patrols.**

Vehicle patrols: Can support external patrols either by supplementing foot patrols or in place of them. A prerequisite for a security officer prior to operating a motorised vehicle is to possess a driver's licence. A vehicle offers a security officer mobility while providing protection from the elements. Additionally a vehicle permits a security officer to carry more equipment which can be readily used when needed.

- ♦ **Internal patrols.**

Internal Patrol: internal patrols are a key element in an overall loss prevention program and are an integral part of the daily duties of security personnel. Generally internal patrols are conducted for the same reason as external patrols, to observe, act and report on abnormal or unusual conditions. As part of internal patrols, security personnel should include the following;

- Checking doors and windows, correcting and reporting abnormal conditions (i.e. open, closed, locked, unlocked)
- Checking machinery and/or maintenance instruments.
- Observing fire protection equipment (sprinklers, risers, fire exit, etc) for proper condition.
- General observations.

QUESTION 6: CASE STUDY: Read the case study below and record the situation on the attached documentation.

- ♦ OB
- ♦ Pocket book
- ♦ Incident report.
- ♦ Report

Obtain all the necessary information from the case study below. The documentation needs to be complete and contain all the necessary and correct information as outlined in the case study.

The sound of thunder and bright flashes in the sky may have been a wonderful spectacle last night, but what I didn't realize was that it would cause one of the worst days of my life. I did not know about the power failure at three this morning because I was fast asleep. The first time I realized that my alarm did not go off, was at $\frac{1}{4}$ past five this morning – which meant that I was going to be late for work. I rushed while getting dressed and did not have time to iron my uniform because I had to run to get the last taxi. In my haste I forgot to put my pocket book in my pocket, and I could not find my shoes, so I wore takies instead.

I actually made it to work, only 7 minutes late. My co-worker that had just finished night shift was not very impressed with me because he still had to do the handover. He was going to miss his taxi and would have to wait at least $\frac{1}{2}$ hour for the next one. Because I felt guilty about coming late, I told him to go – I would read the OB to get the details of the night shift....

It looked like things were eventually settling down to a normal, boring working day. Cars stop, "morning sir", "who are you visiting sir", "that would be at block C – second building on the left", "have a nice day sir". The same thing, over and over. Sometimes I feel like a tape recorder. Cars come, cars go.

In the mean time I'm still a bit unsettled from all the rushing around this morning and tired from lack of sleep because I had to settle the kids down who were crying because they're scared of the thunder and lightning.

Then the blue BMW stops at the gate about 09:20 . He hoots. So I wasn't quite as observant as I am supposed to be – I am tired, you know. I paste my smile on my face and walk up to the driver's window.

I get as far as saying: "Good morning, Sir."

"Good? – good???; so what's good about it?"

"Where is Mr. Brown? It's ten past nine. These \$%# taxis! They caused an accident that has made me late! Open this #%^ boom!"

"Sir", I say, "I have to search your vehicle before you enter." And I think to myself that this guy is so rude - I haven't done anything to him!

"Never mind about my boot, open this gate, you \$|%&*@& "%&*(%\$(*%\$*0%)@*"

By now I'm getting very upset. Who does he think he is to swear at me and call me names? I'll show him....

"Sir, please get out of your vehicle and open the boot. I will not let you pass until I have searched your vehicle!" I tell him.

"Yes, you *%(%^(%#*% - I'll get out" - he swears at me again. Now he's done it. There's no way that someone insults my mother like that and gets away with it. I will search every inch of his car, and today is the day that he will not pass my boom.

He gets out of the car, and that's the last thing I remember before I see my supervisor's face and feel him shaking me. I am lying on the ground, and the boom is pointing up into the sky with blue BMW paint all over it. My jaw hurts like hell...

QUESTION 7:

Demonstrate the correct care and maintenance of a flash light during a pre-shift check.

		Yes	No	Comments
Did the learner:				
1.	Check the lamp to ensure that it is working.			
2.	Check the battery for good working condition and if it is charged.			
3.	Check the general condition of the flash light.			
Requirements met				

Comments in support of decision

QUESTION 8: Identify at least 5 critical areas of a two way radio that needs to be inspected during a hand over of a shift

During hand over and take over of shifts the officer needs to take note of the working conditions of the following:

- ♦ Antenna
- ♦ Battery
- ♦ On/Off switch
- ♦ Volume
- ♦ Squelch
- ♦ Radio number
- ♦ Condition of radio
- ♦ Channel

Requirements achieved	YES		NO	
-----------------------	-----	--	----	--

Comments in support of decision

QUESTION 9:**Demonstrate the care and maintenance of hand held metal detectors.**

		Yes	No	Comments
Did the learner:				
1.	Check for visible signs of damage to the casing of the HHMD			
2.	Change the battery when hearing the low battery signal.			
3.	Test the unit on himself or a colleague before going on duty, to make sure that it would sense metal objects.			
Requirements met				

Comments in support of decision

QUESTION 10: List the equipment that the security officer needs to check before he/she can leave the site to perform a patrol.

- ♦ Credentials
- ♦ Keys
- ♦ Two way radios
- ♦ Handcuffs
- ♦ Firearms
- ♦ Flashlight, light, and batteries
- ♦ Documentation
- ♦ Pen/pencil
- ♦ Pocket book
- ♦ Batons
- ♦ Mace/OC pepper canisters
- ♦ Electronic equipment
- ♦ Body armor

Requirements achieved	YES		NO	
Comments in support of decision				

QUESTION 11: Explain the approaching techniques when:

- ♦ **Performing a foot patrol**
- ♦ **Vehicle patrol**

- ♦ **Performing a foot patrol**

Waiting for the proper time and location to stop the subject is as important as the stop itself. Therefore, you may have to follow the subject until the situation presents itself to your advantage. While tailing this person, the officer should follow these procedures:

- ♦ Contact the control room and provide the following information:
 - ⇒ Location of activity
 - ⇒ Number of individuals
 - ⇒ Short description of individuals Try to identify the person, not just the clothing.
 - ⇒ Nature of contact
 - ⇒ Any vehicle information, if pertinent
 - ⇒ Start back-up officer
- ♦ Use concealment and cover when possible to conceal your movements. Care should be taken so as not to draw attraction to your movements. Stay in shadows and behind lights.

Usually cover incorporates concealment, but its salient feature is its capacity for protecting you from being seen.

Darkness is not cover merely because it can hide you only. It is tempting to think of darkness as a shield. Standing back in shadow can give you good concealment.

Night time shadows can sometimes be turned into traps by an unexpected swing of cars headlights. Finding genuine cover and keeping it between you and your adversary is as important in the dark as it is in the daylight.

- ♦ Make your movement as casual as possible. Make him believe that he is the farthest thing from your mind.

- ♦ **Vehicle patrol**

The location of the initial stop should afford the officer the best possible safety.

Every effort should be made to reduce the avenues of escape.

- ♦ Stop in the middle of the block, using the building walls as barriers.
- ♦ Avoid stopping near alleys or passage ways.
- ♦ Avoid obstacles which would block your vision if the subject flees.
- ♦ Avoid crowded areas where subject could be lost in the crowd, take hostages, or endanger people.
- ♦ At night, select a well-lighted area.

QUESTION 12: Explain the procedure when lost property is found during a patrol.

Property which is lost or stolen may be found and turned into a patrol officer by clients or simply just found by officers.

When this occurs every effort should be made to establish the owner. The security officer should:

- ◆ Collect the property and obtain all information from the finder. Names and addresses should also be taken from the finder to satisfy reporting requirements.
- ◆ Inspect the property for serial numbers or other identifying numbers to help determine who the rightful owner is.
- ◆ If the serial number is found the officer should record it in the lost/found register as well as the incident in the occurrence book.
- ◆ If no owner can be found the property should be turned into the property control room and complete the required reports.
- ◆ If the owner is found the security officer/control room should contact them and advise them on the procedure to pick up the property.

Requirements achieved	YES		NO	
Comments in support of decision				

QUESTION 13: Explain the consequences of not reporting security concerns identified during a patrol.

After every security patrol an occurrence book entry must be made. If a security breach was discovered during the patrol a security report must always be opened and if needed supported by a statement (refer to detailed discussion under point 3). Any object that is found during a patrol must be recorded in the OB and in the found property book. The object of the found property book is to record all property reported as found on company premises or in company vehicles. Property found elsewhere must be referred to the police. Entries should be serially numbered, with a line ruled immediately beneath each entry. Once an article of found property has been handed in or discovered during a patrol, brief particulars of it should be entered in this register, with the circumstances in which it was found and the name and address of the founder if the property was handed in by some one other than the patrolling security officer. Whenever property is returned to its owner an entry, giving date of return, will be made under the column heading "disposal" and the owner's signature obtained in the appropriate space. Similarly an entry will be made giving particulars of any other disposal of the property, if it is not claimed after a reasonable period.

After each shift change all security equipment must be examined to determine if they are still in working order i.e. radio's, torches etc. Found property must be handed over in accordance to company standard operating procedures. Security officers should note that they should inspect the following registers during handovers and ensure that they reflect all information on what occurred during the security shift or what was detected during security patrols;

- Occurrence Book
- Arms Register
- Lost Property Book
- Disciplinary Register
- Receipt Book
- Duty Register and Duty Rosters
- Security Instruction Register
- Visitors and Personnel Book
- Key Register
- Sick Report Register
- Telephone Message Pads
- Vehicle Register
- Standing Orders
- Phone Numbers of Senior Staff
- Fire Orders
- Alarm and Emergency Orders
