Learner workbook

S.L. Mawasha.

HOW THIS LEARNER WORKBOOK IS COMPILED

This learner workbook has been compiled to provide learners with a broad introduction to HIV/AIDS in the workplace. It introduces knowledge about HIV/AIDS that will enable learners to be informed and caring workers in an industry and managers to develop appropriate policies to deal with the pandemic.

1. Explaining HIV/AIDS
2. Describing what behaviour is safe and what behaviour carries the risk of HIV/AIDS transmission
3. Interpreting data and trends on HIV/AIDS in order to explain the potential impact on a community, an organisation and a business sector.
4. Investigating the guidelines and assistance that are available to support workers by HIV/AIDS
5. Explaining the implications of the HIV/AIDS pandemic for the community, the economy, an organisation and a specific workplace.

You have to study the content and guidelines given in your learner reference guide to complete this workbook.

Remember that this completed workbook must be handed in as it will form part of your formative assessment and will play a role in awarding you the required 04 credits that are to be achieved upon completion of this module.

Write neatly and legibly and ensure that you do not simply copy the information contained in the learner reference guide into your workbook. Give your own opinion and ideas where applicable and write the answers in your own words to indicate your level of understanding and learning.

Good luck with the completion of this workbook.

LEARNING UNIT 1

Understand HIV

- ♦ Define the term “HIV”.
- ♦ Explain HIV and AIDS.
- ♦ Demonstrate knowledge on the effect of HIV on the body by explaining the effects.
- ♦ Explain the immune system and the functions of it.
- ♦ Explain the effects of HIV on the immune system.
- ♦ Explain what is meant by a window period.
- ♦ Explain the symptoms of HIV.
- ♦ Explain the stages of HIV infection.
- ♦ Understand and explain Opportunistic infections
- ♦ Explain ways on how an individual can get aids.

LEARNER ACTIVITY 1**Multiple choice questions****1. Human Immunodeficiency Virus (HIV) is...a)**

- ☐ [A] Bacterial illness treated with antibiotics
- ☐ [B] A virus which has no cure but can be controlled with medicines
- ☐ [C] The virus that causes AIDS
- ☒ [D] Answers b and c

☐**2. HIV can infect which of the following groups....**

- ☐ [A] Teens, the elderly, and newborns
- ☐ [B] College professors, the homeless, men, women, and all ethnic groups
- ☐ [C] Bisexuals, homosexuals, and heterosexuals
- ☒ [D] All of the above

☐**3. Which of the following increase your risk of HIV exposure...a)**

- ☐ [A] Unprotected anal, oral, or vaginal sex
- ☐ [B] Sharing needles
- ☐ [C] Drug used) infection with another sexually transmitted disease
- ☒ [D] All of the above

☐**4. If I find I am infected, what should I do next...a)**

- ☐ [A] Run away...there's no hope for me.
- ☐ [B] Talk to a doctor asap..earlier treatment means a healthier life.
- ☐ [C] Seek out support from family, friends, loved ones or HIV agencies.
- ☒ [D] Answers b and c are correct.

☐**5. HIV is spread from person to person by...a)**

- ☐ [A] Shaking hands, kissing or hugging
- ☐ [B] Unprotected anal, oral or vaginal sexual contact
- ☐ [C] Sharing needles to inject recreational drugs
- ☒ [D] Answers b and c

☐**6. The best way to prevent HIV infection is...a)**

- ☒ [A] Not to have sexual contact with anyone
- ☐ [B] Stay away from those with HIV
- ☐ [C] Use latex condoms and don't share needles
- ☐ [D] I don't have to worry because I'm not at risk

☐

LEARNER ACTIVITY 2

True and false questions: Please make a right mark next to the correct answer.

Nr.	Question	True	False
1.	Acquired Immunodeficiency Syndrome (AIDS) is a recognized infectious disease in which the body's immune system is damaged and causes those with AIDS to be vulnerable to a number of serious, often fatal, opportunistic infections and cancers.	☒	☐
2.	Signs and symptoms of AIDS or other AIDS-related conditions may include loss of appetite, weight loss, fever, night sweats, skin rashes, diarrhea, tiredness, lack of resistance to infection or swollen lymph nodes.	☒	☐
3.	Casual contact with people with AIDS, or those who are HIV-infected can place others at risk for acquiring AIDS. The virus can be spread by casual contact such as hugging, handshaking, riding in the same car, touching the same papers or using the same office furniture, typewriter or telephone.	☐	☒
4.	The Human Immunodeficiency Virus (HIV) is spread through sexual intercourse, anal or oral sex acts, sharing of hypodermic needles, syringes or other drug paraphernalia by infecting drug users, mother-to-child transmissions during pregnancy or childbirth, or rarely, through transfusions of HIV-infected blood or its components, or other exchanges of HIV-infected blood.	☒	☐
5.	AIDS or its virus cannot be transmitted by using bathroom facilities, sinks, bath-tubs, toilets, drinking from the same water fountain, using dishes, utensils, or food handled by a person with AIDS, or from sneezing, or coughing.	☒	☐
6.	There is a virus antibody test that tells if someone has been infected with the virus (i.e., has a positive test result). This does not mean this individual has AIDS. In fact, many who have HIV may feel well, show no disease symptoms, and may not come down with AIDS for many years.	☒	☐
7.	There is no risk at all that a donor could acquire HIV or AIDS by giving blood.	☐	☒
8.	Dogs, cats, and domestic animals are not a source of infection; but transmission by insects, such as mosquitoes, is a means by which the virus may be acquired.	☐	☒
9.	There is a high risk of contracting HIV or AIDS by being or working around someone with either condition on a daily basis over a long period of time.	☐	☒
10.	You will need to take special measures at the workplace to protect yourself or those you work with from infection by HIV.	☐	☒

LEARNER ACTIVITY 3**Why is it difficult for the immune system to fight off HIV infection.**

HIV attacks the immune system itself

It weakens the system to fight back

It replicates in huge numbers

It has the ability to mutate itself

☐

Requirements achieved	YES			NO	
-----------------------	-----	--	--	----	--

Comments in support of decision

Achieved

LEARNER ACTIVITY 4

Explain in your own words what does it mean if the term “window period” is used.

It is after you being infected by the virus

It is the time when your body takes to produce antibodies

Takes place between 2 and 12 weeks

In smaller cases it can take up to 6 months

☐

Requirements achieved	YES		☐	NO	☐
-----------------------	-----	--	--------------------------	----	--------------------------

Comments in support of decision

Achieved

LEARNER ACTIVITY 5

Discuss the symptoms of HIV during the following stages:

- ♦ **Latent infection**
- ♦ **Early HIV virus progression**
- ♦ **Late HIV illness**

Latent infection

When the immune system starts to break down

This is preceded by the subtle mutation in the virus

The virus becomes more aggressive in attacking white blood cells

☐

Early HIV virus progression

Boils or warts spread all over the body

The mouth become infected by a thick white coating

They feel overwhelmingly tired

☐

Late HIV illness

The final stage is Aids

The germ can hide in the windpipe, the brain or spinal cord anywhere

☐

LEARNER ACTIVITY 6**Explain the various stages of HIV Infection.**

Stage1 Primary HIV infection

Last for a few weeks

Is accompanied by a flu like symptome

Stage 2 Clynically Asymptomatic stage

The may be swollen glands

HIV is very active in the lymph nodes

Stage 3 Symptomatic HIV infection

The immune system becomes severely damaged

As the system deteriorates, the symptomes worsen

Stage 4 Progression from HIV to Aids

The system becomes more damaged

More severely leading to an Aids diagnose

LEARNER ACTIVITY 7**Explain in your own words “opportunistic infections.”**

Patients with advanced HIV infections are vulnerable for infections

Partial list of common infections

Bacterial diseases such as tuberculosis

Protozoal diseases such as toxoplasmosis

Fungal diseases such as PCP

HIV associated malignancies such as Kaposi sarcoma

Requirements achieved	YES			NO	
-----------------------	-----	--	--	----	--

Comments in support of decision

Achieved

LEARNER ACTIVITY 8**List three ways in which you can get HIV.**

By having unprotected penetrative sex

☐

Getting HIV infected blood in your blood system

Mother to baby transmitted disease

Requirements achieved	YES		☐	NO	☐
-----------------------	-----	--	--------------------------	----	--------------------------

Comments in support of decision

Achieved

SELF-ASSESSMENT

The learner must make use of the following self-evaluation checklist to rate himself against the learning outcomes of this particular training module in establishing the level of mastery of the information.

1. Not able to comply
2. Reasonable compliance (Not acceptable for final evaluation)
3. Able to comply fully

LEARNING OUTCOMES		1	2	3
1	Define the term "HIV"	☐	☐	✓
2	Explain HIV and AIDS	☐	☐	✓
3	Demonstrate knowledge on the effect of HIV on the body by explaining the effects	☐	☐	✓
4	Explain the immune system and the functions of it	☐	☐	✓
5	Explain the effects of HIV on the immune system	☐	☐	✓
6	Explain what is meant by a window period	☐	☐	✓
7	Explain the symptoms of HIV	☐	☐	✓
8	Explain the stages of HIV infection	☐	☐	✓
9	Understand and explain Opportunistic infections	☐	☐	✓
10	Explain ways on how an individual can get aids	☐	☐	✓

LEARNING UNIT 2

Behaviour

LEARNING OUTCOMES

A learning credited with this unit will be able to:

1. Explain ways on preventing yourself from getting aids or gets infected by the HIV virus
2. Identify safe activities
3. Identify those factors involved when getting tested for HIV
4. Explain the treatment of HIV
5. Explain safe sex practices
6. Identify and explain the risk categories of HIV

LEARNER ACTIVITY 1

List three preventative measures that one can follow to prevent getting infected with the HIV virus.

Safer sex

Use clean needles

Abstaining from needles and sex

Requirements achieved	YES		☐	NO	☐
-----------------------	-----	--	--------------------------	----	--------------------------

Comments in support of decision

Achieved

LEARNER ACTIVITY 2

List three activities which is considered as safe.

Mutual Masturbating

Protected oral sex

Fingering

Requirements achieved	YES	☒	☐	NO	☐
-----------------------	-----	-------------------------------------	--------------------------	----	--------------------------

Comments in support of decision

Achieved

LEARNER ACTIVITY 3**Discuss the following statement****“HIV can not be treated”**

It can be prevented

Through awareness campaigns

At school forums etc

Through testing and counseling

Providing antiretroviral treatment

LEARNER ACTIVITY 4

List the risk categories , provide a explanation of each with at least three practical examples to motivate your understanding of the risk categories

No Risk	Phone sex, Thigh Sex, Masturbation , Hugging
Low risk	Oral sex with a condom, with a latex barrier
Some Risk	Oral sex without a condom, or without a latex barrier
High risk	Unprotected sex
Very high risk	Unprotected anal sex

[illegible]

[illegible]

Requirements achieved	YES	☒	☐	NO	
-----------------------	-----	-------------------------------------	--------------------------	----	--

Comments in support of decision

Achieved

LEARNER ACTIVITY 5

List seven issues which will definitely not result in HIV infection at the workplace.

Kissing

Hugging

Condoms

Eating

Swimming

Sneezing

Sharing bathrooms or toilets

Requirements achieved	YES			NO	
-----------------------	-----	--	--	----	--

Comments in support of decision

LEARNING UNIT 5

Dealing with HIV in the workplace

LEARNING OUTCOMES

A learning credited with this unit will be able to:

1. Understand the importance of writing a HIV/AIDS strategy
2. Explain and apply strategies to prevent HIV/AIDS in the workplace
3. Explain the term voluntary counseling
4. Explain how the workplace can provide support for HIV infected employees
5. Explain how employers can monitor and evaluate the HIV infected employees
6. Explain and apply monitoring and evaluation tools

LEARNER ACTIVITY 1

How can obtain management buy in when a HIV strategy needs to be developed and implemented.

Make them aware of your concerns about HIV affecting the company

Tell them about your action plan and solutions

Ask their opinions & suggestions

Get their consensus or agreement

Requirements achieved	YES			NO	
-----------------------	-----	--	--	----	--

Comments in support of decision

Achieved

LEARNER ACTIVITY 2

List 5 types of management blocks that resulted in the delaying of HIV strategies.

They deny that HIV are a business threat.

Management dont want to take action.

They have a prejudiced attitude.

They make excuses like time pressures

They make excuses like no budget

☐

Requirements achieved	YES		☐	NO	☐
