HOW THIS LEARNER WORKBOOK IS COMPILED

This learner workbook has been compiled to lead learners to facilitate learning and to ensure that learners are able to cope with learning in the context of learnerships, skills programs, and other learning programs.

Learners credited with this unit standard are able to:

1. Access and use suitable learning resources.
2. Use learning strategies.
3. Manage occupational learning program materials.
4. Conduct basic research, analyse and present findings.
5. Function in a team.
6. Reflect on how characteristics of the workplace and occupational context affect learning.

You have to study the content and guidelines given in your learner reference guide to complete this workbook.

Remember that this completed workbook must be handed in as it will form part of your formative assessment and will play a role in awarding you the required 05 credits that are to be achieved upon completion of this module.

Write neatly and legibly and ensure that you do not simply copy the information contained in the learner reference guide into your workbook. Give your own opinion and ideas where applicable and write the answers in your own words to indicate your level of understanding and learning.

Good luck with the completion of this workbook.

LEARNER ACTIVITY 1

Read the following passage carefully:

A recent online Shopping Centre poll indicates that 87% of shopping centres believe that owners are likely to opt for centralised Facilities Management contracts in the future. When asked about current arrangements, 18% of centres in the Reliance/Shopping Centre survey say that they have already integrated services such as cleaning, security and building maintenance and a further 16% intend to follow suit within the next five years. The majority of centres (66%) however said that they will continue to take a single service line approach.

When reporting on the effectiveness of security, 41% of centres use a computerised tracking and reporting system to monitor the status of activities such as security patrols, tenant feedback and the completion of security tasks. Of those that don't currently use any system, 43% anticipate a future requirement – half of these expect this to be implemented within one or two years and the remainder within five years.

- ♦ Identify and write down the main idea.
